EDUCATION

Rice University, School of Engineering

Major: Bachelor's in Computer Science
GPA: 3.6

Houston, Texas

August 2020 - May 2024

Relevant Coursework: Advanced Algorithms; Object-oriented Programming; Parallel Programming; Programming Design; Advanced Systems; Programming Languages; Statistics; Computer Ethics; Machine Learning; Artificial Intelligence;

EXPERIENCE

Computer Science Researcher under Dr. Anshumali Shrivastava

Computer Science Research Department, Rice University

Houston, Texas

November 2021 – December 2024

- Developed probability-based data structures for genome-sequence search indexes utilizing novel uses for bloom filters
- Spearheaded advanced techniques to improve efficiency of Retrieval-Augmented Generation systems
- Supervised creation of various machine learning systems, in particular ones utilizing cutting-edge LLM technology

Head Teaching Assistant for Basic Algorithms; Advanced Algorithms

Computer Science Department, Rice University

Houston, Texas

January 2023 – December 2024

- Managed over 20 TAs for classes of up to 200 students, including supervising grading homework and exams
- Worked with instructors on developing and executing course policy
- Collated solutions and wrote rubrics for 15+ different homework assignments across different classes

Lead Student Maintenance Representative

Housing & Dining, Rice University

Houston, Texas

August 2022 – May 2024

- Managed maintenance of over 1000 rooms for 2500+ students living on campus
- Supervised 10 other maintenance representatives by assigning daily tasks, scheduling meetings, and ensuring goals were met
- Coordinated plans and communicated issues with Rice University Housing & Dining administration

LEADERSHIP & PROFESSIONAL DEVELOPMENT

College Treasurer

Hanszen College, Rice University

Houston, Texas

March 2021 – March 2023

- Created and managed annual operating budget of ~\$60,000 for the residential college, including proactively reducing spending to prepare for impending budget cuts as well as creating several savings funds for future use
- Supervised and approved all finances for the residential college of over 400 students

PROJECTS

TACTIC: An Ultimate Tic-Tac-Toe Player

- Built browser-based ultimate tic-tac-toe game in JavaScript with current ~80% win rate against human opponents
- Tested various adversarial algorithms (i.e. naive minimax, alpha beta pruning, Monte Carlo tree search) to find optimal strategy

OTHER SKILLS & INTERESTS

Computer: Experienced in Python, C++, Java; Proficient in data analysis, use of LLMs, JavaScript, SQL, R; Basic proficiency in TensorFlow, PyTorch

Language: Conversational proficiency in Spanish
