

Kidist A. Abebe

Full-Stack Developer

Dallas, USA |  [+1-872-227-2427] |  [abate.kidist@gmail.com] | 
<https://www.linkedin.com/in/kidistabate/>

Profile Summary

Detail-oriented and highly motivated Full-Stack Developer with over 7 years of hands-on experience in designing, developing, and deploying modern, scalable web applications. Proficient in Node.js, React.js, and AWS, with a strong track record of delivering secure, high-performance solutions. Adept at translating complex business requirements into effective technical implementations and leading full software development lifecycle (SDLC) projects in collaborative, cross-functional teams

Technical Skills

Languages: Nodejs, Reactjs, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Redux, Hooks, Tailwind CSS, Bootstrap, Material UI, Axios

Backend: Node.js, Express.js, REST APIs, JWT, WebSockets, MVC architecture

Database: MySQL, PostgreSQL, MongoDB (basic knowledge)

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, IAM, Route 53), Docker, Jenkins,

Testing & Tools: Postman, Swagger, Git, GitHub, Bitbucket, Jira, VS Code, Jest

Work Experience

Full-Stack Developer

SAN Engineering PLC, Addis Ababa, Ethiopia • July 2017 - September 2024

Worked closely with the product and engineering teams to deliver responsive, user-centric applications and backend services using a modern JavaScript stack.

- Built and maintained interactive dashboards and CRUD-heavy web modules using **React.js**, Bootstrap, and Styled Components.
Developed reusable, performance-optimized React components using functional programming patterns and **React Hooks** (useState, useEffect, useContext).
- Implemented **state management** using **Redux** and **Context API** to handle complex application state across multiple components.
- Applied **React Router** for dynamic routing and seamless navigation between views in single-page applications (SPAs).

- Followed **component-driven development** principles and integrated with Storybook to document UI components.
- Ensured cross-browser compatibility and responsiveness using Flexbox, Grid, and mobile-first CSS practices.
- Conducted unit testing of React components using **Jest** and **React Testing Library**, improving front-end reliability.
- Developed backend APIs using **Node.js** and **Express.js**, structured around RESTful principles and modular design patterns.
- Built secure authentication and authorization workflows using **JWT tokens**, middleware, and session management.
- Integrated error handling, request validation (using **Joi** and custom middlewares), and logging mechanisms for robust API development.
- Implemented background processing tasks and scheduled jobs using **Node Cron**.
- Managed environment configuration with **dotenv** and followed 12-factor app principles for scalable microservices.
- Designed and optimized **MySQL** database schemas, including table relationships, indexes, and constraints to ensure data integrity and query performance.
- Wrote complex SQL queries, joins, and stored procedures to support advanced reporting, filtering, and transaction handling features.
- Configured **AWS EC2** for application deployment and used **S3** to manage static assets and document uploads.
- Integrated third-party APIs for analytics (Google Analytics), and transactional emails (SendGrid).
- Wrote modular, reusable frontend components and introduced internal UI component libraries to improve development efficiency.
- Assisted in implementing CI/CD practices using GitLab CI for faster development iterations and QA deployments.
- Participated in weekly code reviews and helped implement Git best practices and branching strategies
