PROFESSIONAL EXPERIENCE

JP MORGAN CHASE & CO. | Houston, USA

Software Development Engineer 2

June '22 - Present

- Developed solutions for EQ-SPARK, the risk management platform for streaming positions within Equities Technology, positively impacting **45K traders** across 6 data centers and **23K systems**
- Implemented Regression visualizer and SRE Dashboard templates, optimizing processes and automating admin tools to **reduce latency by 50%**.
- Designed and implemented a Terraform-based PoC to access **cloud migration** of on-prem infrastructure to AWS, optimizing performance and cost.
- Worked on upgrading internal components from **jdk8 to 17** version to support data center migration.
- Enhanced system performance by upgrading Chronicle to a more resilient, low-latency version while ensuring uninterrupted production operations.
- Partnered with Product and Business teams to define requirements and roadmaps, driving technical improvements through the **Agile development cycle**.

MORGAN STANLEY | Boston, USA

Software Development Engineer

Feb '21 - May '22

- Developed Java-based microservices for financial applications, optimizing database queries to reduce **query execution time by 25%**, and improve system scalability
- Engineered robust **CI/CD pipelines** using Jenkins & GitLab, **cutting deployment time by 40%** while enhancing release efficiency by removing manual interventions.
- Led security enhancements by **implementing automated vulnerability assessments**, compliance checks, and threat detection systems, ensuring robust adherence to regulatory standards and improving response times.
- Collaborated with cross-functional teams to implement risk mitigation strategies and address operational inefficiencies.

TECHNICAL SKILLS

- Languages: **Java**, Python, C, C++, C#, R, JavaScript, SQL
- Databases: **MySQL**, DynamoDB, Chronicle Map, Oracle
- AWS Cloud: Lambda, API Gateway, **S3**, **EC2**, ElastiCache, CloudFormation, CloudTrail, VPC, CloudWatch
- Web Technologies: **React**, HTML5 CSS3, JavaScript, TypeScript
- ML Technologies: Pytorch, **Tensorflow**, Skikit-learn
- Frameworks/Technologies: **Spring**, Google Guice, **Junit**, Mockito, **GitHub**, Build tools (Jenkins, Maven)

EDUCATION

SUNY Binghamton | New York, USA

Aug '19 - Dec '20

Master of Science, Computer Science

Coursework: Data Science, Design Patterns, Cloud Computing, IoT, Machine Learning Algorithms

Research Assistant:

- Global Micro Blogging: Combined design and development skills to deliver an **ML model using twitter hashtags** to analyze data, detect network traffic using various AI algorithms.
- Designed a mentoring website to **match students with the best mentors** using HTML, PHP, and SQL that featured reporting capabilities such as student progress tracking and guideline review.

Vivekanand Education Institute of Technology | Mumbai, India

Jun '15 - May '19

Bachelor of Technology, Information Technology

Coursework: Web programming, Advanced Databases, Business Intelligence, Project Management.

ACCOMPLISHMENTS

- Certificates**: AWS Certified Cloud Practitioner and Developer Associate
- Mentorship**: Successfully onboarded and mentored multiple engineers and interns, fostering a culture of continuous learning and innovation.
- Presented several Business ideas on Cloud Hosting services for Enterprises and Retail services.
- Certificate of appreciation for in-depth analysis of WordPress plugins and responsive theme designs.
