SUMMARY

Digital/Data Analyst with **5+** years of experience in analytics, cloud infrastructure, marketing performance reporting, and business intelligence across global clients and high-growth startups.

EXPERIENCE

Genpact, Data & Content Analyst

Apr 2022 - Jul 2023

Worked as a Data & Content Analyst for Facebook's Trust & Safety division at **Genpact**, supporting large-scale moderation operations to ensure platform integrity, community safety, and compliance with global content policies. Reviewed and analyzed high volumes of user-generated content -including text, images, and videos for policy violations using a combination of **manual moderation and automated tools**, maintaining high accuracy and turnaround metrics. Utilized SQL to extract and manipulate structured datasets from moderation platforms and internal databases, uncovering insights on content trends, violation patterns, and regional risk areas. Created real-time dashboards and visualizations in Power BI and Microsoft Excel, reporting on key operational metrics such as **flagged content volume, reviewer performance, escalation frequency, and policy enforcement effectiveness**. Conducted root cause analysis on recurring policy violations, collaborating with global teams to recommend workflow improvements and contribute to policy iteration and reviewer training modules. Leveraged AWS services such as Amazon S3 (for secure storage of review datasets) and EC2 (for compute instances supporting automated moderation processes), enhancing data accessibility and operational efficiency. Worked cross-functionally with quality, policy, and engineering teams to escalate sensitive or high-risk cases, ensuring timely resolution and adherence to legal/regulatory requirements. Performed trend and sentiment analysis to identify emerging risks (e.g., misinformation, hate speech, spam), contributing to the proactive development of enforcement strategies and response playbooks. Documented findings, presented insights to internal stakeholders, and supported continuous improvement initiatives through data-backed recommendations and performance tracking. Familiar with additional tools and technologies such as **Jira, Tableau, Excel VBA, and Looker Studio** to support project management, data visualization, and automated reporting.

Call Bharat, Business Analyst | Marketing Strategist

Aug 2020 - Jan 2022

Collaborated with **50+ international clients** across industries such as **eCommerce, healthcare, fintech, and education** to deliver scalable data analytics solutions and actionable business insights. Conducted detailed requirement analysis to translate business objectives into technical specifications, supporting performance monitoring, strategic planning, and operational efficiency. Designed and developed interactive dashboards using **Power BI and Looker Studio**, visualizing KPIs such as **conversion rates, customer lifetime value (CLV), churn rates, and financial forecasts**. Utilized **MySQL** for querying, cleaning, and transforming large datasets; created complex JOINS, CTEs, window functions, and stored procedures to optimize data pipelines and reporting. Applied **Python (pandas, NumPy, Matplotlib, seaborn)** for data cleaning, exploratory data analysis (EDA), automation of reporting workflows, and developing basic predictive models (e.g., churn prediction, sales forecasting). Implemented **AWS Cloud services such as S3, EC2, and RDS** to manage secure data storage, deploy analytics tools, and support real-time, cloud-hosted dashboards with high availability. Streamlined reporting workflows by **integrating automated email alerts, scheduled refreshes, and data validation checks, improving report delivery accuracy and frequency**. Presented insights using data storytelling techniques and dynamic visuals, simplifying complex findings for non-technical stakeholders and enabling data-driven business decisions. Built modular analytics frameworks and **custom KPI templates**, ensuring scalability across projects and consistent delivery standards for clients. Collaborated with cross-functional teams including marketing, finance, and product stakeholders to align data initiatives with broader business goals.

Maintained top-rated profiles on Upwork and Freelancer, consistently delivering high-quality deliverables and meeting client deadlines with **95%+ satisfaction scores**.
Performed data governance, including data cleaning rules, schema normalization, anomaly detection, and documentation of data lineage for transparency and compliance.

Questionmag, Digital Analyst

Apr 2018 - Jul 2020

Worked as a Digital Analyst at Questionmag, a knowledge-sharing platform, where I applied data analytics to optimize marketing strategies, improve platform engagement, and drive performance-based decision-making.

Leveraged AWS cloud services including Amazon S3 for secure data storage and Amazon Redshift for large-scale data warehousing, enabling efficient querying and reporting of high-volume user activity and campaign metrics.

Used SQL (MySQL and Redshift dialects) to query, clean, and transform data from internal databases, building custom reports to track **KPIs such as user acquisition, retention, campaign ROI, and content engagement**.

Developed Python scripts for data cleaning, **trend analysis**, and automation of **recurring reports**, ensuring real-time availability of performance metrics and operational insights.

Created and maintained **interactive dashboards in Power BI**, delivering actionable insights on user behaviour, conversion funnels, and marketing effectiveness to internal teams and stakeholders.

Conducted market and competitive analysis, integrating third-party data to refine marketing approaches, user segmentation, and content strategies across multiple campaign channels.

Collaborated with marketing, product, and tech teams to present findings, **improve UX design**, and make data-informed adjustments to paid campaigns, email journeys, and content strategy.

Played a key role in aligning analytical outputs with business goals, enabling data-backed decision-making and continuous optimization of platform features and outreach efforts.

Provided regular data-driven updates and strategic recommendations to internal stakeholders and partners, directly contributing to increased user engagement and improved **campaign ROI**.

Gained hands-on experience in cloud analytics infrastructure, automated reporting, and performance intelligence within an earlystage digital product environment.

EDUCATION

Indiana Wesleyan University

Data Analytics – 3.9

SKILLS

AWS Cloud Services • Power BI • Microsoft Excel • Google Sheets • Looker Studio • Tableau • Jira • Confluence • Data Visualization & Reporting Dashboards • Data Cleaning Rules
