EXPERIENCE

The Concept Lab- Gujarat, India

Management Trainee (Finance Department)

Jun 2023–Jul 2023

- Conducted a comprehensive financial analysis of the sales department, identified revenue trends, and cost inefficiencies and based on this, were able to improve financial performance by 20% through data-driven recommendations.
- Developed and implemented a financial dashboard using Excel, combining key financial metrics, and automating reporting procedures such that the time spent on manual reporting was reduced by 30% and the accuracy of data was enhanced.
- Identified cost-saving opportunities through rigorous expense analysis, eliminating unnecessary expenditure and optimizing budget allocations, resulting in a 15% reduction in operational costs.
- Implemented measures to automate data collection and financial reconciliation, which enhanced the accuracy of the reporting to 99% and made it easier for senior management to make decisions based on data.
- Collaborated with cross-functional teams to enhance financial workflows, reducing processing time for financial reports by approximately 25% while also remarkably improving interdepartmental efficiency to a certain degree.
- Prepared and presented financial insights, providing fact-based suggestions that considerably increased prediction correctness by 18%, thus assuring improved fiscal strategy and resource allocation.

PROJECTS

Financial Fluidity & Earnings in the Indian Textile Industry: A Comparative Study

- Carried out a comparative study on leading Indian textile companies by using correlation analysis, trend analysis, and operating cycle methods to examine the relationship between liquidity and profitability.
- The project was based on 10 years of financial data and provided clear insights into how financial fluidity affects earnings in the industry.

Beneath the Balance Sheet of ‘The Concept Lab’: A Comprehensive Financial Analysis

- Performed a detailed financial analysis of The Concept Lab using ratio analysis, trend analysis, and valuation techniques, offering strategic insights and recommendations to enhance its financial health and long-term sustainability.

Financial Analysis of Varun Beverages Limited

- Analyzed the financial performance of Varun Beverages Limited through ratio, trend, and SWOT analysis, delivering actionable insights on the company's financial standing and operational effectiveness.
