PROFILE SUMMARY

As a GIS Analyst with a background in forestry and expertise in Geographic Information Systems(GIS), I am passionate about solving spatial challenges and inspiring future geospatial professionals. My goal is to demonstrate how spatial analysis unlocks insights, drives solutions, and informs decision-making. I strive to foster a deep understanding of geospatial concepts through hands-on learning experiences.

EDUCATION

2021 - 2025

**MASTER'S OF SCIENCE IN
REMOTE SENSING & GIS**

- IGIS, National University of Sciences & Technology, Islamabad

2015-2019

**BACHELOR OF SCIENCE IN
FORESTRY.**

- PMAS-Arid Agriculture University, Rawalpindi.

TECHNICAL SKILLS

- Proficient in GIS software (ArcGIS, QGIS, ERDAS Imagine) , PostgreSQL - Basic Understanding.
- Expertise in spatial data analysis, visualization, and cartography
- Python- Basic Understanding,
- MS Office.
- Cartography

LANGUAGES

- English: Fluent
- Urdu: Fluent
- Pashto: Basics
- Punjabi: Intermediate

WORK EXPERIENCE

Environmental Sciences Contemporary Associates, Islamabad

GIS Intern

October 2022 - April 2023

- Conducted 10+ Environmental Impact Assessments (EIA), evaluating hydrological and ecological risks using GIS.
- Developed thematic maps and spatial models that improved land-use planning accuracy by 50%.
- Assisted in urban growth modeling and master plan preparation, contributing to sustainable infrastructure strategies.
- Authored 10+ technical reports and policy briefs, influencing key environmental planning decisions.

National University of Sciences and Technology, Islamabad

Teachers's Assistant

February 2022 - June 2023

- Delivered step-by-step tutorials for key ArcGIS features such as geocoding, spatial joins, and raster analysis.
- Graded lab assignments and provided feedback.
- Assisted students with ArcGIS software in lab settings, providing hands-on support for spatial data analysis, mapping, and geoprocessing tasks.

Silver Oaks School (Darwin Branch) , Islamabad

Teacher

September 2019 - August 2021

- Adapted curriculum for remote/hybrid learning environments, ensuring continuity of instruction and student engagement during school closures.

National Agricultural Research Center, Islamabad

Internee

July 2019 - August 2019

- Conducted a research project focused on the determination of heavy metal contamination (lead) in water and soil samples from NARC, utilizing GIS for spatial data analysis and mapping environmental impacts
