EDUCATION

Florida International university

Miami, FL

Masters - Computer Science

August 2023 – April 2025

Koneru Lakshmaiah Educational Foundation

Guntur, India

Bachelor of Technology in Computer Science and Engineering

July 2017 – April 2021

SKILLS

- **Programming:** Python, SQL, HTML/CSS, Java Script, Java
- **Tools, Platforms & Data Analytics:** GitHub, Unix/Linux, Excel, SSMS, Power BI, Azure Data Factory, Azure Databricks, Microsoft Power Automate Flow, Docker, Azure synapse, GCP, AWS, Looker, Apache Spark, Data Manipulation, Statistical Analysis
- **Databases Operating Systems:** SQL Server, MySQL, Oracle, Linux, Windows, IOS, Android

PROFESSIONAL EXPERIENCE

Florida International University

Miami, USA

Teaching Assistant

Jan 2024 - May 2025

- Assisted in teaching Excel, Power BI, Tableau, and Business Intelligence to undergraduate students at Florida International University. Conducted hands-on labs on SQL, data modeling, DAX, Python-based data transformation, ETL workflows, and Excel automation, improving reporting accuracy by 30% for 60+ students. Developed interactive learning materials and workshops to simplify complex BI and data engineering concepts, and evaluated assignments to enhance students' skills in Excel, SQL, Python, data visualization, and cloud platforms (Azure, AWS, GCP). Mentored students through real-world projects and practical demonstrations, promoting a collaborative learning environment. Ensured students could effectively apply theoretical knowledge to data-driven decision-making.

Cyber Secured India

Mumbai, India

Internship

Nov 2022 – Aug 2023

- Monitored 100+ network assets using Splunk, ELK Stack, and QRadar, improving threat detection efficiency by 30%.
- Responded to 20+ security incidents, with CrowdStrike, SentinelOne, and Carbon Black, reducing recovery time by 25%.
- Performed digital forensics on 50+ endpoints with Autopsy, FTK, EnCase, Volatility, X-Ways while ensuring 100% evidence integrity.

MAQ Software (Microsoft Power BI Partner)

Hyderabad, India

Software Engineer 1 (Full Time)

Nov 2021 – Sep 2022

- Devised T-SQL Procedures, triggers, and index for pipelines, processing data and ETL up to 100+GB per day.
- Enhanced the UI/UX for over 10+ reports, significantly improving their usability and aesthetic appeal, which led to multiple client signoffs and high satisfaction workflows.
- Utilized ArcGIS to analyze spatial data and optimize routes, Improving operational efficiency and decision-making speed by 25%
- Extracted raw files from Azure Data Lake Storage (ADLS) and applied data transformations using Azure Databricks (ADB), ensuring data accuracy and consistency.
- Skilled in building solution- driven Power BI dashboard with diverse chart types (Crosstabs, Heat/Geo/Tree Maps, Pie/Bar, line/Area, Scatter, Bullet, Histograms). Reduced data analysis time by 35% and increased reporting accuracy by 20% for stakeholders.
- Spearheaded the development of a proof of concept for Azure Databricks, utilizing a comprehensive suite of Azure services to optimize data processing and analytics.
- Directed discussion of Cross- functional team of 12, managed on- site POC'S and client calls to elicit requirements.

TECHNICAL PROJECTS

NewsNest: Web Data Extraction and Management

Jan 2024 – April 2024

- Deployed a real time news scraping and analysis pipeline, using GCP – Cloud functions and Fast APIs.
- Engineered the pipeline with airflow, vector databases, Open AI and data warehouses for efficient data flow.

Data Lakehouse for Customer 360° View

- Integrated customer data from CRM, transaction logs, and website activity into a unified Lakehouse using Databricks and Delta Lake.
- Automated ETL with PySpark and Airflow, and created Power BI dashboards to track customer behavior, lifetime value, and churn signals.
