

BHOOMITA MODI
Data Analyst / Power BI Developer
Email: bmodi1317@gmail.com | Mobile: 224-833-5431

Summary

- 4+ Years of professional experience as Data Analyst /BI Developer.
- Collaborated in Software Development Life Cycle (SDLC) using different methodologies.
- Experience in large datasets of Structured and Unstructured data, Data Visualization, Predictive modeling, and Data Validation.
- Skill in performing data transfer between different heterogeneous System (Excel, Flat files, XML files, SharePoint List, SharePoint Online List, Web, Azure SQL Server, ODATA) and SQL server as part of Data migration, Data maintenance.
- Developed and implemented reporting, analytics, and Data Visualization solutions with Power BI.
- Working Knowledge of Power BI (Power Pivot, Power View, Power BI Online, Power BI Desktop, Power BI Publisher) and DAX.
- Design and implement reporting solution using Reporting service, Power BI, and other data visualization tools.
- Design and develop reporting data module for Market Analysis.
- Experienced in developing logical and physical data models and organizing data.
- Experienced with complex business challenges and manipulating large data sets using statistical techniques.
- Developed common ETL and written Python code to format XML documents which can help to source data from different platforms.
- Used Power BI and SQL for data cleaning, data visualization, risk analysis and predictive analytics.
- Experience in creating Power BI Dashboards (Power View, Power Query, Power Pivot, and Power Maps).
- Creating Row Level Security with Power BI desktop and integration with Power BI Service portal.
- Experience in Optimizing reports and setting up Power Service, gateways, and scheduling Data Refresh.
- Experience at Creating, configuring, and maintaining system database.

TechnicalSkills

- Programming Languages: Html, CSS, JavaScript C, C++, C#, SQL, PL/SQL, Python, JAVA, DAX Data Techniques: Data visualizations, Data mining, Data cleaning, Mathematics, Statistics, Risk analysis, Predictive analytics
- Database: MySQL, MS SQL Server, PostgreSQL, SharePoint List
- Data Visualization Tools: Power BI, Tableau, Seaborn, Matplotlib
- Tools | Frameworks | Library: MS SQL Server, SSRS, Power BI, MS Office Suite, SharePoint List Framework, ETL, Crystal Reports, Pandas, Jira
- Methodology: Agile, Waterfall
- Operating Systems: Windows, MacOS

Education

GTU University, Anand, India

Graduated: May 2017 Madhuben & Bhanu Bhai Patel Institute of Technology (MBICT) Bachelor of Engineering Degree in Computer Science Engineering

Certifications

- Certification of "iSMAC- Java Business Application Developer" from IIHT.
- Certification of "Java Programming Masterclass covering Java 11 & Java 17" from Udemy, Instructors by TIM Buchalka learning Programming Academy
- Certification of "The Data Science Course2022: Complete Data Science Bootcamp" from Udemy, Instructor by 365 Careers,365 Career Team.

Experience Professional

JEWEL-OSCO Grocery Store, United States

Front End Support Manager

August 2023-Current

- Service Desk function to maximize sales earnings, expense control, Customer satisfaction.
- Working with SSH express ordering, Run CICS Maintenance program. Managing Inventory in store and E-com.

- Managing DUG (Drive-up & Go) handling using Power BI. Analysis of different types of report.
- Examine our Store best Sales products, Customer requirements, out of stocks, Customer satisfaction, waiting times, Total sales, etc.

Cashier / SCO SCOT

August 2022-August 2023

- Assisted 50+ daily customers with Checkout, solved billing problems and answered customer inquiries.
- Collaborated with 7 other Cashiers, aiding teammates during busy times.
- Managed inventory and directed support staff to assist customers who asked for specific grocery items.
- Operate POS cash register, handling more than 95 transactions on average daily.

Sonata-Software, India

January 2020-February 2022

Data Analyst / BI Developer

- Involved in complete software development life cycle (SDLC) - Requirement Analysis, Conceptual Design, and Detail design, Development, System and User Acceptance Testing (UAT).
- Worked on customer requirement analytics and improved overall customer satisfaction.
- Create, analyze and distribute ongoing reports as needed by Key stakeholder by turning multiple data sets into valuable and interactive insights.
- Understand, own, and support Operational dashboards, business performance dashboard, interpret the results.
- Experience in publishing Power BI Desktop reports created in Report view to the Power BI service.
- Understood, identified, acquired, and analyzed data from multiple sources to streamline the delivery of information across the company platforms using ETL tools and Ms. SQL server.
- Collected, cleaned, sanitized, and analyzed data in large volume and automated for self-monitoring, self-diagnosing, self-correcting solutions and for optimizing key processes.
- Performed data modeling operations using Power BI, and SQL.
- Implemented several DAX functions for various fact calculation for efficient data visualization in POWER BI.
- Extensive use of DAX (Data Analysis Expressions) functions for the reports and create Calculated columns, Measures.
- Managing the Reporting/Dashboarding for the Key metrics of the business.

Plaxonic Technologies, India

July 2017-December 2019

Data Analyst

January 2018-December 2019

- Analysis of functional and non-functional categorized data elements for data profiling and mapping from source to target data environment.
- Worked extensively on Data Profiling, Data cleansing, Data Mapping and Data Quality.
- Designed and created data extracts, supporting SSRS, Power BI visualization reporting applications.
- Performed data analysis and data profiling using complex SQL on various sources system.
- Performing statistical data analysis and data visualization using Python.
- Created SSIS packages for ETL processes by using control flow and data flow components.
- Worked on Power BI reports using multiple types of visualizations including Doughnut chart, Pie chart, Slicers, tables, matrix, KPI, scatter plots, etc.
- Design and development of ETL processes and ETL tool for dimension and fact file creation.
- Create the Business metric KPI (Key Performance Indicator) to evaluate factors for different modules.
- Performance tuning and SQL query tuning. Write and tune the PL/SQL code effectively to maximize performance.

Data Analyst (Intern)

July 2017-December 2017

- Conducted independent statistical analysis, descriptive analysis, and Logistic Regression.
- Imported the claims data into Python using Panda's libraries and performed various data analysis.
- Created Power BI Dashboards with interactive views, trends, and drill downs along with user level security. Performed Logical & Physical Data Modeling - ER Modeling& Dimensional Modeling.
- Analysis of Trends, Forecasting, and KPI's that directly/indirectly affect overall consumer awareness and product management.
- Performed data cleaning and data visualization using Seaborn and Matplotlib and used it to perform feature selection. Write Python scripts to parse JSON documents and load the data in database.
- Assisted in creating and presenting informational reports for management based on SQL data.
