

MOUNI SAI LALITHA KORAPATI

Indianapolis, Indiana | mkorapat@iu.edu | +1 (317) 389 8575 | linkedin.com/in/korapatimounisailalitha |

Professional Summary

I am a graduate student in Health Informatics with a **dentistry** background and **expertise in clinical data systems**. Skilled in healthcare **data extraction, transformation, and analysis**, including **ETL pipelines**, **mapping SNOMED CT codes and ensuring FHIR interoperability**. Experienced in developing **analytics-ready datasets** to support data-driven research. I aim to apply population and **census data** to address **community health challenges**, build **reliable data pipelines** to improve healthcare data quality, and design accessible data visualizations for **public health communication**. Adept at translating clinical knowledge into **actionable insights**.

Education

Luddy School of Informatics, Computing, and Engineering (IUPUI), Master of Science in Health Informatics	Expected: May 2026
Gitam Dental College and Hospital Visakhapatnam, Bachelor of Dental Surgery	Sep 2017 - Dec 2022

Skills

Healthcare Data Standards: FHIR, ICD-10, SNOMED CT, LOINC, RxNorm

Programming and Analytics: Python, R, SQL, Machine Learning, Statistical Testing, Data Visualization

EHR Systems and Tools: OpenEMR, Athena Browser, Postman, Tableau, phpMyAdmin

Interoperability and APIs: JSON, API Integration

Modeling and Documentation: UML, BPMN, Lucidchart

Soft Skills: Clinical Communication, Team Leadership, Cross-Functional Collaboration

Experience

Projects

FHIR Integration and ETL Pipeline for Clinical Data Exchange Jan 2025 - May 2025

- Built an end-to-end **ETL pipeline** in Python to migrate patient data from **OpenEMR into a FHIR server**.
- Automated the extraction, transformation, and loading of demographics, conditions, and observations.
- Achieved interoperability by **mapping data to SNOMED CT codes** and securing API access with OAuth 2.0.

Socioeconomic Determinants of Tuberculosis Incidence Jan 2025 - May 2025

- Collected, cleaned, and standardized global health and **socioeconomic data from 75 countries**.
- Applied **regression and correlation models** to assess **TB incidence against socioeconomic indicators**.
- Delivered insights on **complex TB incidence trends** and recommended advanced modeling approaches.

Mental Health and Screen Time Analysis Sep 2024 - Dec 2024

- Designed and managed a **MySQL database** for over 10,000 participant records.
- Developed Python scripts for data integration, querying, and statistical analysis.
- Trained and evaluated **machine learning models (Random Forest, XGBoost, SVM, LightGBM)**.
- Created visualizations to communicate **behavioral and demographic patterns**.

Professional Experience: Junior Dentist, CARE 32 ADVANCED DENTAL HOSPITAL March 2023 – May 2024

- Managed over 500 patient cases and documented treatments in EHR systems.
- Conducted more than **500 patient examinations, developed and implemented treatment plans**, and achieved patient satisfaction.
- Utilized EHR systems for patient data management and analysis, ensuring accurate clinical documentation.
