

Vamshi Kumar Reddy Kovvuri

Hoboken, NJ vamshikumar3103@gmail.com +1 (973)-699-9106 kovvuri-vamshi-kumar-reddy

Summary

Graduate student in Computer Science at Stevens Institute of Technology (May 2026) with experience in backend development, microservices, and database management. Skilled in Java, Spring Boot, MongoDB, and CI/CD tools (Jenkins, GitLab) with exposure to Kafka and DevOps practices. Currently enhancing expertise through coursework in JavaScript, Node.js, React, Redis, Hadoop, Spark, and Cloud Practices. Proven ability to deliver reliable, secure, and scalable solutions through internship and hackathon experience in fast-paced, cross-functional environments.

Education

Stevens Institute of Technology (*MS in Computer Science*) **GPA: 3.3/4.0** May 2026

Course Work: Web Programming, Big Data Technologies, Algorithms, Database Systems, Agile Software Methodologies

ICFAI University, Hyderabad (*B-Tech in Computer Science*) **GPA: 8.7/10.0** May 2024

Course Work: Blockchain Technologies, JAVA Programming, Operating Systems, Data Visualization

Skills

Programming Languages: JAVA, JavaScript, Python, SQL

Web Frameworks: Spring Boot, Express.JS, NodeJS, React

Databases: MongoDB, PostgreSQL, Microsoft SQL Server

Tools: Git, GitHub, GitLab, Jenkins, Kafka, Postman, JIRA, Plane

Experience

Backend Developer Intern, LetsMobility Software Solutions – India Jan 2024 – Aug 2024

- Developed and deployed RESTful APIs using Spring Boot, progressing from supervised training to independently leading full backend development.
- Optimized existing APIs for performance, security, and stability while maintaining core functionality.
- Implemented Role-Based Access Control (RBAC) for user management modules to ensure secure access.
- Integrated meta-APIs for customer chat management and OTP-based authentication workflows.
- Collaborated with cross-functional teams to ensure smooth product delivery and alignment with business goals.
- Participated in scrum meetings and stakeholder discussions to contribute to feature planning and product scaling.
- Mentored interns and conducted knowledge transfer sessions, improving team efficiency and code quality through peer reviews.
- Gained hands-on experience with Git, Jira, Plane, Jenkins, and CI/CD pipelines for version control, project tracking, and automated deployment.

Software Engineering Student Intern, Skillbanc Inc – United States May 2022 – Aug 2022

- Designed an innovative web-based educational platform focused on simplifying complex academic concepts through interactive visualization.
- Developed dynamic learning modules with SVG animations to enhance student engagement.
- Conducted pilot programs in local schools, demonstrating platform effectiveness to students and faculty.

Graduate Peer Mentor, Stevens Institute of Technology– United States Aug 2025 - Present

- Mentoring a group of 3 students, providing guidance on academic and personal adaptation in a new country.
- Facilitated open communication, helping mentees navigate coursework and campus resources without directly solving academic problems.
- Assisted in organizing campus events, promoting inclusivity and engagement among the student community.

Projects

Duck Hub (Jan 2025 – May 2025)

Tech Stack - JavaScript, Node.js, Express.js, MongoDB, HTML, CSS, Cloudinary API

- Contributing to the development of a centralized web platform for Stevens's students that integrates course reviews, discussion forums, campus search, and user profiles.
- Collaborating with a team to implement key modules aimed at improving student engagement and overall platform usability.

Simp0.ai (Feb 2024 – June 2025)

Tech Stack - Java, Spring Boot, Microservices, MongoDB, GitLab, Jenkins, REST APIs, OpenAI APIs, meta-APIs

- Programmed and remodeled REST APIs for an automatic website builder using Java and Spring Boot, implementing microservices architecture and dependency injection to optimize backend development.
- Deployed and managed version control using GitLab, Jenkins for continuous integration.
- Debugged more than 150-200 critical bugs, significantly enhancing platform stability and functionality.

Medi-Buzz (Future Development – PM Pro Hackathon Winner)

- Designed the system architecture for an elderly-focused medication adherence solution, with development set to begin pending funding approval from faculty and the department; features include QR-based pharmacy integration and multi-channel alert systems
