Professional Summary

Detail-oriented and impact-driven Data Engineer with 3+ years of experience architecting and deploying scalable, high-performance data pipelines in cloud-native environments. Proficient in designing real-time and batch ETL/ELT workflows using Python, PySpark, and SQL, orchestrated via tools like Apache NiFi, Apache Airflow, and Azure Data Factory. Adept at ingesting structured and unstructured data from APIs, SaaS platforms, and external data lakes into analytics-ready formats. Skilled in leveraging Databricks, Terraform, and CI/CD pipelines for data infrastructure automation across Azure, AWS, and Google Cloud Platform (GCP). Experienced in implementing data validation, schema enforcement, RBAC policies, and collaborating with cross-functional teams including data science, BI, and DevOps to support AI/ML initiatives and data governance compliance.

Professional Experience

Data Engineer | Tenet Healthcare

USA | Dec 2023 – Present

- Designed and optimized scalable ETL pipelines using PySpark, SQL, and Azure Databricks to streamline cross-functional data workflows and accelerate analytics capabilities.
- Automated data ingestion workflows from REST APIs and cloud-native sources using Azure Data Factory and Data Lake Storage Gen2, supporting both real-time streaming and batch processing architectures.
- Prepared production-ready datasets for machine learning model training and inference, reducing model deployment cycle time by 25% through efficient data preprocessing and validation.
- Integrated Azure Synapse Analytics for distributed querying and data transformation, resulting in a 30% improvement in dashboard refresh and report generation speed.
- Implemented enterprise-grade data security controls using Role-Based Access Control (RBAC), Azure Key Vault, and data masking strategies to ensure compliance with organizational and regulatory standards.

Data Engineer | Genpact

India | Jan 2021 – Jul 2022

- Engineered low-latency batch and streaming data pipelines using Apache Spark, Pig, and Kafka, reducing overall data processing latency by 25% and supporting real-time analytics workloads.
- Developed scalable ETL solutions leveraging Apache NiFi and Talend to integrate diverse data sources, including REST APIs, SaaS platforms, and multi-cloud environments (AWS/Azure).
- Implemented workflow orchestration using Apache Airflow, managing complex job dependencies, automated retries, and ensuring pipeline reliability across production environments.
- Collaborated cross-functionally with product and data science teams to deliver clean, curated datasets optimized for downstream machine learning models and BI analytics.
- Built interactive dashboards and operational reports using Power BI and SSRS, empowering finance and operations stakeholders with self-serve insights and reducing reporting turnaround time by 40%.

Technical Skills

- **Programming & Scripting:** Python, PySpark, SQL, R, Shell Scripting
- **Big Data Technologies:** Apache Spark (RDD, DataFrame, SparkSQL), Hive, Kafka (Producers/Consumers, Streams), Pig
- **ETL & Data Integration:** Apache NiFi, Azure Data Factory (ADF), Talend, Apache Airflow (DAGs, scheduling), SSIS
- **Cloud Platforms:** *Azure:* Data Factory, Synapse Analytics, Data Lake Storage Gen2, Azure Databricks, Azure Key Vault
AWS: S3, EC2, Lambda, Glue, IAM, Terraform for Infrastructure as Code (IaC) | *GCP:* BigQuery, DataProc, Cloud Storage, Composer
- **Databases & Storage:** PostgreSQL, SQL Server, MySQL, MongoDB, Amazon Redshift, Google Cloud SQL
- **Data Visualization & BI Tools:** Power BI (DAX, Power Query), Tableau, SSRS, Looker
- **CI/CD & DevOps Tools:** GitHub, GitLab, Azure DevOps, Jenkins, Docker, Terraform
- **Data Security & Governance:** Role-Based Access Control (RBAC), OAuth 2.0, Azure Key Vault, Data Lineage, Data Quality Frameworks, GDPR/SOX/CCPA compliance

Education

Master of Science in Management Information Systems
Bachelor of Engineering in Electronics & Communication

Lamar University, TX | Oct 2023
R.V.R. & J.C. College, India | May 2022
