Professional Summary

Analytical and detail-oriented Data & Business Analyst with a strong foundation in data analytics, financial analysis, and business process improvement. Skilled in collecting, cleaning, and analyzing complex datasets to uncover trends and drive strategic decisions. Experienced in SQL and Excel, with developing expertise in Power BI for building interactive dashboards and KPI reporting. Applied data analytics and visualization skills to real-world datasets through hands-on Master's projects, including financial forecasting, clustering analysis, and data visualization, delivering actionable insights to support strategic decision-making. Adept at translating business requirements into data-driven solutions that enhance operational efficiency and business growth.

Education

Master of Science in Master Of Science In Business Analytics,

Sacred Heart University, Fairfield, CT

06/2025

Fairfield, CT

- Completed advanced coursework in Data Mining, Big Data Analytics, Applied Statistics, AI for Business, and Data Visualization
- Gained hands-on experience using tools like Python, SQL, Tableau, Excel, and Streamlet for business intelligence
- Developed predictive models, performed clustering and PCA, and interpreted real-world datasets
- Delivered stakeholder-style presentations and dashboards to communicate analytical insights effectively
- Worked on industry-relevant projects in finance, healthcare using real Dataset.
- Strengthened skills in problem-solving, data storytelling, and strategic decision-making.

Bachelor of Science in Bachelor Of Science In Information Technology,

Ganpat University, Ganesh Meridian, Gujarat High Court, S.G. Highway

05/2022

Ganesh Meridian,
Gujarat High Court,
S.G. Highway

- Gained foundational knowledge in programming, database systems, and computer networks
- Completed hands-on coursework in web development, system analysis, and IT infrastructure
- Built academic projects involving data structures, front-end tools, and database management
- Strengthened technical communication and teamwork through lab collaborations

High School Diploma,

Navsarjan High School, Natraj Shopping Centre, Ranip, Ahmedabad, Gujrat

03/2019

Natraj Shopping Centre,
Ranip, Ahmedabad,
Gujrat

Skills

Languages

Python, R, SQL

Libraries

pandas, numpy, matplotlib, seaborn, scikit-learn

Soft Skills

Communication, Teamwork, Multitasking, Proactive learning

Data Tools

Excel, Tableau, Streamlit, Power BI (foundational knowledge)

Techniques

Data Cleaning & Visualization, Clustering, PCA, NLP, Sentiment Analysis, Predictive Modeling and Data Modeling

Business & Analytics Skills:

Requirement Gathering, Stakeholder Communication, Process Analysis, Financial Analysis, Reporting, Project Planning, Problem-solving

Interests

- | | | |
|---|--|---|
| • Exploring the intersection of data and real-world business problems | • Building interactive data dashboards and applications using Python & Streamlet | • Sketching and drawing to enhance creativity and attention to detail |
| • Staying updated on emerging tech and AI trends | | |

Capstone Project- M.S. in Business Analytics

Cryptocurrency Performance & Clustering Dashboard, (2021-2024)

01/2024 – 05/2024

Role: Data Analyst (Capstone Project - M.S. in Business Analytics)

Project Overview: Developed an interactive web-based dashboard in Streamlit to analyze, visualize, and forecast the performance of top 10 cryptocurrencies (BTC, ETH, BNB, ADA, XRP, SOL, DOGE, DOT, MATIC, LTC) from 2021 to 2024. The dashboard featured dynamic price and volatility charts, cumulative returns, PCA + KMeans clustering, and time-series forecasting using Facebook Prophet. Integrated ChatGPT for real-time Q&A and implemented automated PDF reporting.

Key Achievements:

- Enabled robust comparison of cryptocurrencies by return, volatility, and regime detection.
- Deployed a forecasting module to predict 60-day future prices with confidence intervals.
- Created an AI assistant tab for natural language user queries leveraging OpenAI's GPT technology.

- Automated PDF exports summarizing top performers, risk metrics, and key market trends.

Certifications

Academic Project

Student Lifestyle & Academic Performance Analyzer, Course Project: Applied Statistics

Tools: Python, Seaborn, Matplotlib, Jupyter Notebook

- Analyzed survey data linking GPA with lifestyle factors (study hours, sleep, physical activity, stress).
- Discovered a strong positive correlation (0.73) between study hours and GPA.
- Built visualizations: scatter plots, boxplots, pie charts, pairplots to uncover key patterns.
- Provided insights on stress level distributions and academic outcomes across different lifestyle choices.
- Proposed future extensions including predictive modeling and broader student behavior segmentation.

Volkswagen Brazil: Strategic Transformation using Balanced Scorecard,

Course Project: Business Strategy | Team Member

Tools: SWOT, Porter's Five Forces, VRIO, Strategic Analysis

- Assessed Volkswagen Brazil's market decline and CEO-led transformation strategy post-2010.
- Applied VRIO, SWOT, and Porter's framework to evaluate operational and strategic positioning.
- Highlighted how Balanced Scorecard aligned corporate goals with measurable performance KPIs.
- Explored localization, lean manufacturing, sustainability, and digital enterprise strategies.
- Identified \$1B investment impact in data analytics and production efficiency (0% growth).
