SUMMARY

Data Analyst with expertise in Power BI, SQL, Python, and R, specializing in developing custom dashboards, integrating BI systems, and training clients in data visualization best practices. Proven ability to engage with stakeholders, uncover insights, and deliver actionable recommendations that improve decision-making and operational efficiency.

EDUCATION

Union Commonwealth University, KY

2023 - 2025

Master of Science, Information Systems Management

• **GPA:** 3.74

MGIT, Hyderabad, India

2018 - 2022

Bachelor of Technology, Information Technology

WORK EXPERIENCE

Hexart.in

Nov 2022 - Aug 2023

Research Assistant

- Developed and automated SQL pipelines and dashboards to deliver real-time insights for product and marketing teams.
- Built statistical models in R & Python, improving prediction accuracy by 27% to support campaign performance optimization.
- Conducted A/B testing, boosting user retention by 15%, and presented results through actionable reports and dashboards.
- Collaborated with stakeholders to align BI solutions with business needs, improving operational efficiency and strategic outcomes.
- Trained peers and stakeholders in Power BI and Tableau best practices, enhancing adoption and reporting accuracy.

JNTUH

Jul 2021 - Sep 2021

Manual Tester

- Performed vulnerability assessments (OWASP Top 10) and penetration testing, identifying security flaws and recommending fixes.
- Delivered detailed reports with actionable solutions that improved application security and reduced system risks.

PROJECTS

Real-Time NYC Air Quality Monitoring Web App

- Built a web application with interactive dashboards, automated data refresh, and city-based filtering to monitor live air quality data.

Predicting Food Pantry Demand

- Designed Prophet & ARIMA models achieving 80% forecast accuracy, visualized in Tableau to support university-level planning.

E-Commerce Purchase Tracking Database

- Developed a Python & SQL database system managing 20,000+ records for purchase tracking and trend analysis.

American Sign Language Recognition

- Implemented a deep learning model (CNN & ResNet-50), achieving high recognition accuracy with potential applications beyond sign language.

SKILLS

- **Analytics Tools:** Power BI, Tableau, AWS QuickSight, SQL, Access, R
- **Programming:** Python (Pandas, NumPy, Scikit-learn, TensorFlow), R, JavaScript
- **BI & Data Integration:** Power Query, DAX, ETL Pipelines, Data Modeling
- **Platforms:** AWS, Azure, Salesforce, PL/SQL
- **Certifications:** Google Data Analytics Professional, Tableau Essential Training
- **Other:** Client Training & Support, Dashboard Customization, Predictive Modeling
