

Krishna Palukuri

Full Stack Developer/ Software Developer

Birmingham, AL | (205)538-1616 | pkrishna9619@gmail.com | <https://www.linkedin.com/in/krishna-fullstack/>

SUMMARY

- **Full Stack Developer** with around 3 years of experience in designing and developing **scalable, secure, and high-performance web applications** using **Java** and modern **frontend** and **backend** technologies.
- Proficient in **React.js**, **Node.js**, and **Express.js**, with strong expertise in integrating **REST** and **GraphQL APIs** for efficient data communication.
- Knowledgeable in deploying cloud-based solutions using **AWS (EC2, S3, Lambda, DynamoDB)**, ensuring system scalability and minimal downtime.
- Expertise in **database design** and **optimization** with **MongoDB**, **PostgreSQL**, and **MySQL**, supporting high-volume transactions and fast data retrieval.
- Engineered automating **CI/CD pipelines** with **Docker**, **Jenkins**, and **GitHub Actions**, streamlining development and deployment workflows.

TECHNICAL SKILLS

- | | |
|--------------------------------|--|
| • Programming Languages | Java, Python, JavaScript (ES6+), TypeScript, HTML5, CSS3 |
| • Frontend Frameworks | React.js, Redux, Angular |
| • Backend Technologies | Django, Flask, Node.js, Express.js |
| • APIs | REST, GraphQL |
| • Databases | MongoDB, PostgreSQL, MySQL |
| • Cloud Technologies | AWS (EC2, S3, Lambda, DynamoDB), Heroku, Netlify |
| • DevOps Tools | Docker, Jenkins, GitHub Actions, Kubernetes |
| • Testing Tools | Jest, Mocha, Postman |
| • Version Control | Git, GitHub |
| • Build Tools | Webpack, Babel, NPM |
| • Project Management | JIRA, Trello |
| • Methodologies | Agile (Scrum, Kanban), SDLC |

PROFESSIONAL EXPERIENCE

Java Full Stack Developer/ Software Developer

Uber, AL

Jun 2024 – Current

- Developed responsive and dynamic user interfaces using **React.js**, **Redux**, and **JavaScript** libraries like **Lodash**, **Axios**, and **Moment.js**, while designing reusable functions and custom libraries to optimize frontend and backend components, streamline application logic, and enhance overall usability and engagement.
- Developed performant **APIs** using **Node.js**, **Express.js**, and **GraphQL** to enable real-time data synchronization for vehicle tracking, route management, fare calculations, and route suggestions, ensuring seamless communication between the **frontend** and data layers for enhanced functionality and user experience.
- Designed and managed **MongoDB** databases to efficiently store and retrieve data for transportation schedules, user profiles, and trip histories.
- Configured **AWS services** such as **S3** and **CloudFront** to deliver frontend assets, decreasing application load times by 40% during peak usage.
- Developed and tested frontend components with **Jest** and **Mocha**, optimized builds using **Webpack** and **Babel**, and implemented **CI/CD** pipelines to enhance performance and streamline deployments for critical transportation applications.
- **Collaborated** with cross-functional teams and facilitated **agile** workflows in **JIRA**, delivering key product features on time while adhering to project requirements.

Software Developer

Dell Technologies, India

Sep 2021– Dec 2022

- Engineered user-focused functionalities for ticket management systems and enterprise applications using **React.js**, **Redux**, and **JavaScript**, enhancing usability and operational efficiency.
- Built and maintained scalable microservices architecture and secure **MongoDB** database models, optimizing data storage, retrieval, and system integration for large-scale IT operations.

- Developed and maintained scalable backend services using **Node.js** and **Express.js**, optimizing **API** performance and ensuring seamless integration with **frontend** systems and third-party services.
- Automated infrastructure provisioning and configuration management using **AWS CloudFormation** and **Terraform**, streamlining development workflows and ensuring consistency across environments.
- Streamlined development workflows by designing custom **JavaScript** libraries and leveraging tools like **Lodash**, **Moment.js**, and **Chart.js** to enhance application performance and visualization capabilities.
- Deployed scalable applications on platforms such as **Heroku** and **Netlify**, ensuring seamless and consistent user experiences across regions.
- Optimized performance through techniques like lazy loading, debouncing, and efficient state management using **Redux Thunk** and **Axios**, improving responsiveness for high-traffic IT platforms.
- Managed and delivered IT projects using **Trello** and **JIRA**, ensuring timely completion aligned with SDLC processes and organizational standards.
- Collaborated with **cross-functional** teams to design and optimize microservices, ensuring scalability and smooth integration within the IT ecosystem.

Intern - Software Developer

Trigent Software, India

Mar 2021 – Aug 2021

- Developed interactive dashboards using **React.js**, optimizing **HR** operations and streamlining employee data management across platforms.
- Built and deployed **backend** services with **Express.js**, designing **RESTful APIs** for seamless updates and synchronization of employee records between systems.
- Created and optimized relational database schemas in **MySQL**, ensuring secure and efficient storage and retrieval of employee data for enterprise **HR** solutions.
- Conducted thorough **API** testing with **Postman**, ensuring reliable communication and data flow between frontend and backend systems in a service-oriented architecture.
- Configured and deployed applications on **Netlify**, ensuring consistent cross-platform accessibility and performance for end-users accessing **HR** services.

PROJECTS

Cloud-Based File Sharing Tool

- Engineered a secure web application for file sharing using **React.js**, enabling seamless uploads and sharing for 500+ users.
- Integrated **AWS S3** for storage and **DynamoDB** for billing, automating email notifications with **AWS Lambda** and **SES**.

E-Commerce Marketplace

- Engineered a scalable product catalog with **React.js** and **Node.js**, supporting advanced filtering and personalized recommendations.
- Implemented secure payment integrations with **Stripe** and **PayPal**, facilitating 500+ daily transactions.

Task Management Application

- Create task assignment and progress tracking modules using **Angular** and **Node.js**, enhancing project efficiency.
- Incorporated real-time reporting features using **Power BI**, enabling data-driven decisions for stakeholders.

Inventory Management System

- Formulated an inventory tracking system with **MongoDB** and **AWS**, managing 10,000+ SKUs and reducing stock errors.
- Automated procurement workflows using **SQL**, optimizing supplier management processes.

EDUCATION

Master of Science in Computer Science

University of Alabama at Birmingham

Jan 2023 – Apr 2024

Birmingham, AL

Bachelor of Technology in Computer Science and Engineering

Puducherry Technological University

Aug 2018 – Apr 2022

Pondicherry, India
