

KRISHNA MAYAVAT

Location: MN | Phone: +1857-271-8143 | Email: mayavatkrishna07@gmail.com |

LinkedIn: <https://www.linkedin.com/in/krishna-mayavat-aba5701a1/>

SUMMARY

- **Innovative Software Engineer** with a **Master's in Information Systems** and **5+ years of experience** across **e-commerce**, **financial services**, and **enterprise software domains**.
- Proficient in **full-stack development** using **Java**, **Python**, **JavaScript**, and frameworks like **Spring Boot**, **React**, and **Node.js**.
- Expertise in designing **scalable microservices architectures**, **RESTful APIs**, and **cloud-native solutions** using **AWS services**, including **API Gateway**, **Lambda**, **CloudFormation**, and **Elastic Beanstalk**.
- Skilled in **SQL** and **NoSQL database management** (PostgreSQL, MySQL, DynamoDB, MongoDB), with a track record of optimizing **query performance** for large-scale systems.
- Hands-on experience with **CI/CD pipelines** using **Jenkins**, **GitLab**, **Terraform**, **CloudFormation**, **Docker**, and **Kubernetes**, improving deployment times by 40%.
- Strong focus on **DevOps practices**, including **Infrastructure as Code (IaC)**, container orchestration with **Kubernetes**, and monitoring using **Prometheus**, **Grafana**, and **CloudWatch Logs**.
- Knowledgeable in **API security** practices, including **OAuth**, **JWT**, **encryption**, and **SSL/TLS**, ensuring secure software development and deployment.
- Experienced in **Agile (Scrum, Kanban)** methodologies to deliver high-quality, scalable solutions.

TECHNICAL SKILLS

Programming Languages	: Java, Python, C, JavaScript, TypeScript, NodeJS, SQL, C++, React.js
Cloud Platforms	: AWS (Lambda, EC2, S3, API Gateway, CloudFormation, CloudWatch, Fargate, RDS, RedShift, Glue, Elastic Beanstalk, Route 53), GCP, Azure
Containers & Orchestration	: Docker, Kubernetes, OpenShift
CI/CD Tools	: Jenkins, GitLab, Ansible, Terraform, CloudFormation, AWS CDK, Git
Frameworks	: Spring Boot, Spring MVC, Spring Security, Hibernate, React.js, GraphQL, Node.js, Express.js
Methodologies	: Agile (Scrum, Kanban), SDLC
Databases	: MySQL, PostgreSQL, MongoDB, Oracle, DynamoDB, Redis, Memcached
Security & Compliance	: IAM Roles, OAuth, JWT, Encryption, SSL/TLS, SaaS/PaaS Security
Monitoring & Logging	: Prometheus, Grafana, CloudWatch Logs, Splunk
Testing Tools	: Selenium, Postman, JUnit, Mockito, TDD, BDD
Version Control	: Git, GitHub, Bitbucket
Other Tools	: Jira, Elasticsearch, Splunk, Confluence

EDUCATION

Master of Science, Information Systems

Northeastern University, Boston, MA

Sep 2021 - May 2023

Bachelor of Technology, Computer Science

Gujarat Technological University, Gujarat, India

Aug 2015 - May 2019

PROFESSIONAL EXPERIENCE

Chewy Inc, Minneapolis, MN | Software Engineer

Jun 2023 - Current

- Developed 50+ T-SQL queries for **database performance tuning**, **indexing**, and **query optimization** for large-scale databases with over **1 million records**.
- Built **microservices** and **RESTful APIs** using **Spring Boot**, **React**, and **Node.js**, improving scalability and performance.
- Implemented **CI/CD pipelines** using **Jenkins**, **Terraform**, **Docker**, and **Kubernetes**, reducing deployment times by 40%.
- Utilized **AWS (Lambda, EC2, API Gateway, CloudFormation, Fargate)** for **cloud-native deployments**, ensuring high system availability and performance.
- Integrated **Kubernetes orchestration** to improve scalability and reliability of containerized applications, while monitoring using **Prometheus** and **CloudWatch**.

Northeastern University, Boston, MA | Graduate Teaching Assistant / Software Engineer

Sep 2022 - Dec 2022

- Mentored over **100+ master's students** on **Java**, **AJAX**, **JSON**, **jQuery**, and **Spring Boot MVC**, guiding them through web development concepts and tools.
- Conducted online classes, hands-on labs, and project reviews, helping students build web applications using **Spring Boot MVC** and **RESTful APIs**.
- Assisted in course delivery and provided technical support during labs, resolving issues related to **AJAX**, **JSON**, and **Hibernate** for seamless development.
- Evaluated student projects, offering feedback on code quality, design, and the use of **Spring Boot** and **Hibernate** for backend optimization.
- Collaborated with the professor to create assignments that integrated **Spring Boot**, **AJAX**, and **JSON** for dynamic, data-driven web applications.

Amazon Inc, Seattle, WA | Software Development Engineer Intern

Jun 2022 - Sep 2022

- Designed and implemented 20+ scalable RESTful APIs using **Java8**, **AWS**, **MVC**, and **DynamoDB** to facilitate data processing between microservices, reducing latency by 50ms, balancing traffic distribution, and enhancing data consistency across multiple systems.

Master of Science, Information Systems	Sep 2021 - May 2023
Northeastern University, Boston, MA	
Bachelor of Technology, Computer Science	Aug 2015 - May 2019
Gujarat Technological University, Gujarat, India	

PROFESSIONAL EXPERIENCE

Chewy Inc, Minneapolis, MN Software Engineer	Jun 2023 - Current
• Developed 50+ T-SQL queries for database performance tuning, indexing, and query optimization for large-scale databases with over 1 million records. • Built microservices and RESTful APIs using Spring Boot, React, and Node.js, improving scalability and performance. • Implemented CI/CD pipelines using Jenkins, Terraform, Docker, and Kubernetes, reducing deployment times by 40%. • Utilized AWS (Lambda, EC2, API Gateway, CloudFormation, Fargate) for cloud-native deployments, ensuring high system availability and performance. • Integrated Kubernetes orchestration to improve scalability and reliability of containerized applications, while monitoring using Prometheus and CloudWatch.	
Northeastern University, Boston, MA Graduate Teaching Assistant / Software Engineer	Sep 2022 - Dec 2022
• Mentored over 100+ master's students on Java, AJAX, JSON, jQuery, and Spring Boot MVC, guiding them through web development concepts and tools. • Conducted online classes, hands-on labs, and project reviews, helping students build web applications using Spring Boot MVC and RESTful APIs. • Assisted in course delivery and provided technical support during labs, resolving issues related to AJAX, JSON, and Hibernate for seamless development. • Evaluated student projects, offering feedback on code quality, design, and the use of Spring Boot and Hibernate for backend optimization. • Collaborated with the professor to create assignments that integrated Spring Boot, AJAX, and JSON for dynamic, data-driven web applications.	
Amazon Inc, Seattle, WA Software Development Engineer Intern	Jun 2022 - Sep 2022
• Designed and implemented 20+ scalable RESTful APIs using Java8, AWS, MVC, and DynamoDB to facilitate data processing between microservices, reducing latency by 50ms, balancing traffic distribution, and enhancing data consistency across multiple systems. • Engineered dynamic and responsive web applications using Angular, constructing modular components and connecting them with backend APIs, ensuring smooth data flow and elevating the overall user experience across diverse platforms. • Developed 100+ unit tests and integration tests using JUnit and Mockito for bug detection and critical error handling, ensuring comprehensive test coverage and maintaining code reliability in projects with 5000+ lines of code.	

- Implemented a CI/CD pipeline using AWS CDK, Git and CloudFormation for automating builds and deployments, ensuring production-readiness of the code and actively participating in code reviews to maintain high code quality.
- Orchestrated containerized services using **Docker** and **Kubernetes**, improving scalability and reliability of microservices.
- Followed SDLC methodologies including requirements analysis, design, development, testing, and deployment, ensuring that each phase of the development lifecycle was aligned with project goals and best practices to deliver robust software solutions.

Exxat Systems, Gujarat, India / Software Engineer/ Product Analyst

Apr 2021 - Aug 2021

- Architected and built a highly available e-commerce site using Java, Spring Boot, and Spring MVC to manage large product catalogs and support up to 100,000 concurrent users.
- Integrated Spring Data MongoDB to design appropriate models for product availability, user and order information to enhance query time for speedy product search coupled with real-time tracking of inventory.
- Designed the front-end of the application using HTML5, CSS3, and JavaScript, employing Bootstrap for better structure, ensuring seamless shopping cart accessibility across various devices for more than 100+ daily users.
- Integrated as an Agile (Scrum) team member responsible for continuously enhancing features like recommended products, customers' feedback, and discount offers.
- Analyzed and utilized version control with Git for creating branches that other team members work in and for resolving conflicts with a merge between feature branches and the main branch for deployment.
- Deployed the e-commerce platform on AWS EC2 instances using and auto-scaling, ensuring stability during peak traffic.
- Conducted thorough API testing using Postman, creating comprehensive test suites for critical e-commerce workflows including user registration, product browsing, cart management, and checkout processes, covering over 100 test cases.

Thomson Reuters, Gujarat, India / Product Associate II (Tech Support)

Jun 2019 - Jan 2021

- Developed and deployed Java-based microservices on AWS using Spring Boot and AWS Lambda, improving scalability and optimizing the use of cloud resources for application deployment.
- Utilized Elasticsearch and PostgreSQL to develop a monitoring tool that tracked and analyzed critical performance metrics for internal and client servers and databases, identifying potential issues before they impacted system performance.
- Designed and managed SQL databases (PostgreSQL) to support large-scale applications, ensuring high performance and data integrity, and implementing optimized queries for enhanced data retrieval efficiency.
- Developed critical components of the Import Management System using Spring Boot, AWS, and PostgreSQL, enhancing system processing capabilities and enabling faster operations while maintaining seamless interaction with SQL databases.
- Built ETL pipelines using Apache Spark, ingesting and processing large amounts of data from various sources, which improved data accuracy and ensured compliance with industry standards.
- Collaborated closely with customers in an Agile environment, leading technical discussions, creating detailed software documentation, and providing training on cloud technologies and SQL databases to improve customer adoption.
- Automated test scripts using Selenium WebDriver with Java to ensure robust testing of web applications, increasing test coverage and improving overall software quality through continuous integration pipelines.
- Managed multiple code repositories in GitHub, ensuring version control for a team of developers and implementing branching strategies that streamlined development and release processes across several projects.

Trinity Technolabs, India, India / Software Engineer Intern

Dec 2018 -

May 2019

- Engineered and sustained a strong e-commerce application with Java and Spring Boot, integrating RESTful APIs and microservices to ensure efficient performance and robustness, handling high traffic and transactions continuously.
- Enhanced SQL queries and crafted 50+ stored procedures for the e-commerce platform database to maximize performance and minimize query processing time.
- Designed and developed interactive and adaptable web layouts using HTML, CSS, and JavaScript, combined with front-end frameworks like React.js, to improve usability and attract more visitors to the e-commerce website.
- Utilized MongoDB NoSQL database management solutions, implementing data models and indexes for flexible storage and retrieval of unstructured product and user data.
- Followed software development life cycle (SDLC) frameworks such as Agile to systematically plan, design, implement, and deploy project deliverables, achieving 5 project milestones.
- Employed Git for version control, managing code repositories, branches, and merges during the development of the e-commerce platform, ensuring seamless collaboration among development teams.

PROJECTS

EventHub App, Northeastern University

Developed an application using **Java**, **Spring Boot**, **Java Persistence**, and **Hibernate** for event management.

Talk Your Mind, Northeastern University

Built a **MERN stack** application utilizing **React.js**, **Redux**, **Node.js**, and **MongoDB**, improving performance by 25%
