

KRISHNA PRIYA LAVU

Denton, Texas, USA | +1(513)-764-5314 | krishna.p@aogjob.com | [Linked In](#)

PROFESSIONAL SUMMARY

- 4+ years of experience as a Data Analyst across diverse industries, delivering actionable insights from complex datasets.
- Proficient in SQL, Python, and ETL processes, with a strong focus on data extraction, transformation, and analysis.
- Expert in developing interactive dashboards and reports using Power BI and Tableau to support data-driven decision-making.
- Skilled in building advanced statistical models and automating analytics workflows using Python.
- Adept at optimizing query performance and ensuring adherence to HIPAA, GDPR, and other data governance standards.

TECHNICAL SKILLS

BI & Visualization Tools:	Power BI, Tableau, OTBI, Alteryx
Programming & Scripting:	Python, SQL
Database Management:	SQL Server, PostgreSQL, MongoDB, Oracle
Cloud Technologies:	Azure (Azure SQL, Azure Data Factory, Azure Synapse Analytics, Azure Databricks), AWS
Methodologies:	Agile, Lean, Six Sigma
Data Handling:	Data Management, ETL, Data Governance, Data Quality (Informatica DQ), Data Cleaning, Data Mining, Data Visualization, data modeling
Data Analytics Skills:	Predictive Analysis, Statistical Modeling, EDA, A/B Testing, Linear regression, GAP analysis, root cause analysis
Tools:	SharePoint, ServiceNow, Microsoft Excel, Jira, SSRS, SAS, GitHub, Microsoft power point, Visual Studio Code, Jupyter Notebook.
Soft Skills:	Analytical Thinking, Data Storytelling, Communication, Attention to Detail, Cross Functional team collaboration, Requirement gathering.

CERTIFICATION

- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Data Engineer Associate (DP-203)
- Microsoft Power BI Data Analyst (PL 300)

PROFESSIONAL EXPERIENCE

Data Analyst, CVS Health, Remote	June 2024 - Present
• Managed 25M+ healthcare records (demographics, encounter data, EHR systems, patient data), integrating data from 11+ sources using ETL pipelines and optimized API integrations, reducing data acquisition time and enhancing real-time data accessibility. • Utilized advanced statistical techniques, regression, time series forecasting, and clustering, k-means, to predict healthcare costs (Patient Readmission Rates, Claim Denial Trends, and Cost Per Encounter) improving forecasting accuracy by 20% and reducing readmission rates. • Designed Power BI dashboards for 20+ stakeholders, visualizing patient outcomes and claims data. • Optimized performance with DAX and Power Query, reducing refresh times by 30% and improving decision-making processes to drive efficiency gain in claims handling. • Implemented Snowflake SQL features like materialized views and clustering to enhance query performance and scalability. • Established robust data governance policies, ensuring HIPAA compliance through encryption, role-based access, and data lineage tracking. • Leveraged Git for version control, streamlining collaborative development and code management.	
Reporting Analyst, Hexaware Technologies, Chennai, India	September 2020 – December 2022
• Analyzed financial and operational data using Excel, Python (Pandas), and SQL, improving network efficiency by 20% through process optimization and advanced techniques like regression analysis and clustering. • Built 15+ interactive dashboards in Tableau and Power BI, reducing reporting time by 15% and enabling real-time tracking of key KPIs such as revenue growth, operational costs, and customer retention. • Developed API integrations for automated data extraction and real-time updates, streamlining ingestion workflows and enabling dynamic visualizations in dashboards. • Performed variance analysis and created monthly and quarterly exception reports to support financial planning and executive decision-making. • Conducted 25+ ad-hoc analyses using SQL, Power Query, and Python, including advanced time series forecasting and predictive analytics to support strategic initiatives. • Automated ETL workflows using SSIS and Python, reducing manual effort by 35% and improving data quality and pipeline reliability. • Implemented data governance frameworks ensuring compliance with HIPAA, GDPR, and internal security standards for secure reporting.	

- Implemented data governance frameworks ensuring compliance with HIPAA, GDPR, and internal security standards for secure reporting.
- Collaborated with cross-functional teams to define and track KPIs using Snowflake, Tableau, and Power BI, leveraging statistical models for deeper operational insights.
- Optimized performance in Snowflake using materialized views, clustering keys, and Snowflake-specific SQL, effectively managing large-scale data warehouse operations.
- Managed financial data using Oracle PeopleSoft, utilizing financial modules to track budgets, analyze expenditures, and integrating with SQL and Power BI for real-time reporting.

Data Analyst Intern, XT Global, Telangana, India

January 2020 – August 2020

- Collected, cleaned, and analyzed large datasets using SQL, Excel, and Python, ensuring high data accuracy and reliability for decision-making.
- Designed dashboards in Power BI, enabling real-time tracking of key performance indicators for senior management.
- Conducted data wrangling and preprocessing with Python libraries using Python using Pandas,NumPy improving data quality and consistency by 20%.
- Developed and optimized SQL queries for efficient data extraction, streamlining reporting workflows and reducing processing time by 10%.
- Built predictive models using Python and scikit-learn, forecasting business trends and enhancing strategic planning initiatives.
- Collaborated with cross-functional teams to gather requirements, present analytical insights, and align solutions with business objectives.

EDUCATION

Master of Science in Information Technology
University of Cincinnati

January 2023 – May 2024
Cincinnati, OH

Bachelor of Technology in Electrical and Electronics Engineering
R.V.R & J.C College of Engineering

July 2016 – August 2020
Guntur, India

ACADEMIC PROJECTS

Risk Management Dashboard for Financial Services: (Power BI, Snowflake, Informatica)

- Developed risk analysis dashboards in Power BI and Snowflake, tracking financial risk exposure and compliance metrics.
- Automated data ingestion and validation using Python and Informatica DQ, ensuring data quality and governance.

Azure Data Migration Project: (Azure Data Factory, Databricks, Synapse Analytics, Power BI, SSMS, Azure Key Vault)

- Led an end-to-end Azure Data Engineering project, migrating data from Microsoft SQL Server to Azure Cloud, designing and optimizing data pipelines with Azure Data Factory and Databricks, and transforming data in Azure Synapse for secure and efficient reporting

Predictive Analytics for Ridesharing: (Azure Machine Learning, Azure Data Factory, Azure Data Lake Gen2, Power BI)

- Performed predictive analysis on the impact of adverse weather on ridesharing services, utilizing machine learning models and optimizing workflows with Azure tools, resulting in a 15% improvement in transportation efficiency.

Six Sigma Implementation(Project on Supply chain)

- Identified and analyzed discrepancies between physical inventory and database stock, uncovering root causes through detailed investigation.
- Applied Six Sigma methodologies to streamline inventory management processes, reducing operational costs and improving stock accuracy.
- Optimized supply chain workflows, enhancing inventory visibility, minimizing stock variances, and boosting customer satisfaction through improved fulfillment rates.
