

Krishna Sai Yakkala

Software Engineer

OK, USA | +1 (405) 493 1488 | krishnayakkal5522@gmail.com |

SUMMARY

Experienced Software Engineer with 4 years of expertise in designing, developing, and deploying scalable web applications using Python, Java, and .NET technologies. Proficiency in full-stack development, leveraging React.js, Angular, ASP.NET MVC, Django, Flask, and Node.js to build interactive front-end interfaces and robust back-end architectures. Well-versed in database management using MySQL, SQL Server, Oracle, PostgreSQL, MongoDB, etc., optimizing data storage, retrieval, and performance. Expertise in RESTful API development, GraphQL, and microservices architecture, enhancing system interoperability and scalability. Hands-on experience with AWS (EC2, S3, CloudFront, Redshift, ELB), Azure, Kubernetes, and Docker, ensuring high-availability cloud solutions and efficient DevOps practices. Adept in application security, implementing authentication and authorization mechanisms using Spring Security, OAuth2, and ADO.NET to protect sensitive data.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Languages: Python, Java, SQL, PL/SQL

IDEs / Web Server: Visual Studio Code, Jupyter Notebook, PyCharm, IIS

.NET Technologies & Frameworks: C#, React.js, ASP.NET MVC, ADO.NET, .NET 4, VB.net, WPF, Restful, .NET Framework, SOAP

Python Packages: NumPy, Pandas, Matplotlib, TensorFlow, Scikit-learn, Seaborn, SciPy

Frameworks: Django, Flask, Node.js, Express.js, React, Angular, Spring (MVC, Boot, Security), Microservices, Hibernate, JPA, JSF

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Java Mail

Web Technologies: HTML, CSS, JavaScript, AJAX, XML, JSON, jQuery, Bootstrap, Restful API, Redux, Kotlin, Front-End frameworks

Application Server: Apache Tomcat, IBM Web Sphere

Cloud Technologies: AWS (EC2, S3, CloudFront, Redshift, ELB), Azure, Kubernetes, Docker, Logic Apps, DevOps, CI/CD, Data Factory

Databases: MySQL, SQL Server, Oracle, PostgreSQL, MongoDB, Firebase

Version Control/Other Tools: GitHub, Git, GitLab, Jira, UML, MS Visio, TFS, Maven, Gradle, Jenkins, Junit, MS Excel, JMeter

Operating Systems: Windows, Linux, Mac

EXPERIENCE

Honeywell, USA | Nov 2024 - Present

Software Engineer

- Established and maintained scalable microservices-based applications using Java, Spring, and JDBC, enhancing system modularity and boosting performance by 40%.
- Manufactured dynamic and responsive web applications using React, Angular, HTML, CSS, JavaScript, AJAX, and Bootstrap, enhancing user experience and engagement.
- Designed and developed scalable web applications using C#, React.js, ASP.NET MVC, and ADO.NET, improving system efficiency by 30% and reducing load times by 25%.
- Constructed and maintained RESTful APIs within the .NET Framework and Django, enhancing data exchange efficiency and reducing API response time by 40%.
- Developed dynamic and interactive user interfaces using Redux, Kotlin, JSP, and JSTL, increasing user engagement by 35% and improving application responsiveness.
- Implemented cloud-based solutions using AWS services (EC2, S3, CloudFront, Redshift, ELB) to optimize application scalability and reliability.
- Adjusted MongoDB and Firebase for scalable data storage, improving query performance by 50% and enhancing overall data management efficiency.

Meta Systems, India | Jan 2020 - Jul 2023

Software Engineer

- Engineered and deployed scalable web applications using Flask, Node.js, and Express.js, enhancing system efficiency and performance.
- Industrialized and integrated machine learning models using Python, TensorFlow, NumPy, Pandas, and Matplotlib, improving predictive accuracy by 20% and automating key decision-making processes.
- Developed and maintained applications using .NET Framework and VB.NET, ensuring high-performance and scalable software solutions.
- Optimized deployment workflows with Docker, Logic Apps, DevOps, and CI/CD pipelines, reducing software release time by 35% and enhancing system stability.
- Designed and implemented RESTful APIs, reducing data exchange latency by 35% and improving communication between front-end and back-end systems.
- Deployed and managed cloud-based applications using Azure and Kubernetes, ensuring 99% uptime, strengthening security, and scaling infrastructure to support growing user demand.
- Designed and implemented WPF-based desktop applications, enhancing user experience through dynamic and interactive UI components.
- Conducted data analysis and management using SQL and MS Excel, enabling accurate reporting and strategic business insights.
- Leveraged Git for version control and Jira for project management, maintaining code integrity and enhancing collaboration within cross-functional teams.
- Designed and optimized relational databases with MySQL and SQL Server, improving data retrieval speed and reliability.

EDUCATION

Master of Science in Computer Science | Belhaven University, Jackson, MS

Dec 2024

Bachelor of Engineering in Computer Science and Engineering | KL University, Guntur, Andhra Pradesh, India

Jul 2020
