

Krishna Sorna

srikrishna.sorna@gmail.com | (224) 401-3139

EDUCATION

Northwestern University, Evanston, Illinois

March 2025

Bachelor of Science in **Computer Science** | Minor in **Data Science** | Concentration in **Artificial Intelligence**

Kellogg Certificate Program in Managerial Analytics

GPA: 3.88 (Cum Laude)

Relevant Courses: Data Structures & Algorithms, Human Computer Interaction, Supply Chain Management, Machine Learning

PROFESSIONAL EXPERIENCE

Medline Industries, Chicago, Illinois

June 2025 – Present

Associate Data Engineer

- Developing scalable Python and SQL pipelines to ingest and aggregate 5M+ healthcare records, reducing latency by 40%
- Designing modular ETL components and integrated logging to improve pipeline reliability in a production environment

Medline Industries, Northfield, Illinois

June 2024 – August 2024

Software Engineer Intern

- Engineered a custom GPT-based NLP model to enable patient interaction with medical records via customer-centric design
- Integrated advanced AI-driven capabilities into a web application, enabling real-time UX feedback loops during clinical visits
- Created product pricing strategies based on market analysis of leased contracts, aligning roadmap with strategic business KPI
- Executed API testing and automation using Postman with CI/CD pipelines to ensure continuous validation and delivery

PayPal, San Jose, California

June 2023 – September 2023

Software Engineer Intern

- Optimized high-throughput REST APIs by restructuring payload logic, improving system latency by 15% and securing endpoints with JSON Web Token authentication
- Architected Kafka-based event driven microservices to improve communication latency and supported scalable workflows
- Completing weekly sprint tasks in a Jira agile development platform with product team to deliver via backlog prioritization
- Developing operational workflows through strategic integration of automated batch daemons to increase accuracy by 45%
- Performing functional end to end testing resulting resolution of 95% of defects, supporting product quality assurance

J.B. Hunt Transport Services, Lowell, Arkansas

June 2022 – August 2022

Software Engineer Intern

- Established enterprise level, production ready backend web service using Spring Boot and Java Persistence Queries
- Targeted functionality by acquiring 100% code coverage with JUnit framework regression and integration testing
- Secured web service end points using RHSSO and Spring Security while establishing open authorization access delegation
- Led backend API delivery within Azure DevOps CI/CD framework and shipped enterprise grade control services

TECHNICAL PROJECTS

HealthML

January 2023 - June 2023

Machine Learning Engineer

- Designed an ensemble of learning models using Scikit-learn to predict survival rate of bone marrow transplants in children
- Engineered algorithm that promises an F1 score of 90% which outperforms current baseline models by a 20% increase
- Optimized predictive modelling with supervised learning on multi-layered datasets harnessing NumPy, Seaborn, and SciPy

LEADERSHIP EXPERIENCE

Northwestern University, Evanston, Illinois

January 2024 – March 2025

Computer Science Teaching Assistant

- Collaborating with the Chair of Computer Science to initiate industry panels and community events for engineering students
- Conducting coding workshops and review sessions to foster continuous learning and developing curriculum improvements

Student Holdings, Evanston, Illinois

November 2022 – February 2024

Chief Executive Officer

- Incorporated cloud-hosted Firebase with React Native app to secure access to daily transactions and track monthly KPIs
- Implemented fully functional mobile app to ensure operations team can increase yearly service revenue by 80%
- Engaged with marketing and finance team to pull company out of bankruptcy and garnered \$11,000 within 2 months
- Led cross functional team of engineers, marketing, and finance to rebuild product strategy and feature prioritization

SKILLS

Computer: Java, Python, C, C++, JavaScript, SQL, HTML, MATLAB, React, Git, DSSSL2, R, Spring, Go, Swift, Scikit-learn, LaTeX

Technical : Object-oriented Programming , Cloud Computing , Scalable System Design, Agile Scrum, A/B Testing, Functional Tests
