PROFESSIONAL SUMMARY

- 3+ years of IT experience in Analysis, Design, Development, Implementation, Testing and Support of Data Warehousing and Data Integration Solutions using Informatica Powercenter.
- 3+ years of experience in using Informatica PowerCenter (9.6.1/10.2.1)
- Proficiency in developing SQL with relational database like Oracle.
- Skilled in all phases of Software development life cycle (SDLC) - Project Analysis, Requirements, Design Documentation, Development, Unit Testing, User Acceptance Testing, Implementation, Post Implementation Support and Maintenance
- Have extensively worked in developing ETL program for supporting Data Extraction, transformations and loading using Informatica Power Center.
- Experience with dimensional modeling using star schema and snowflake models.
- Understand the business rules completely based on High Level document specifications and implements the data transformation methodologies.
- Created UNIX shell scripts to run the Informatica workflows and controlling the ETL flow.
- Strong with relational database design concepts and also worked with different non-relational Databases such as Flat files, XML files, Mainframe Files
- Worked extensively with Data migration, Data Cleansing, Extraction, Transformation and Loading of data from Multiple Sources to Data Warehouse
- Instrumental in setting up standard ETL Naming standards & BEST Practices throughout the ETL process (Transformations, sessions, maps, workflow names, log files, bad files, input, variable, output ports)
- Extensively worked with Informatica performance tuning involving source level, target level and map level bottlenecks.
- Strong business understanding of verticals like Banking and Insurance.
- Independently perform complex troubleshooting, root-cause analysis and solution development.
- Ability to meet deadlines and handle multiple tasks, decisive with strong leadership qualities, flexible in work schedules and possess good communication skills.
- Team player, Motivated, able to grasp things quickly with analytical and problem-solving skills.
- Comprehensive technical, oral, written and communicational skills.

TECHNICAL SKILLS

Operating Systems: Windows, Linux

Software Applications: MS Word, MS Excel, Outlook, PowerPoint, Teams

Database: Oracle 10g

ETL Tools: Informatica PowerCenter 9.6.1/10.2.1, Informatica PowerExchange 10.2.1

Scheduling Tools: Autosys, Control M

Languages: SQL, PL/SQL, HTML, XML, C, JAVA

Tools/Application: TOAD, GitHub, Jenkins, Putty, WinSCP, SecureCRT

EDUCATION

Rivier University – Nashua, NH (USA)

Oct 2023- May 2025

Masters of Science in Computer Information Systems

WORK EXPERIENCE

Tata Consultancy Services, India :

Designation: Systems Engineer

Client: Zurich-Farmers Insurance

Project: PLA(Personal Lines Applications)

Duration: March 2021 – August 2023

Role: ETL Developer

Description:

PLA system deals with all the policy, client details for HOME and AUTO and Umbrella policies of Farmers Insurance. It handles the discounts/surcharges provided to the client based on the client data.

Signal is an important APP which has been developed by Farmers Insurance. Signal is a smartphone app that monitors your driving behavior, things like your braking habits, phone use, speed, and rush-hour driving. It can help you stay better focused on driving by encouraging you to put down the phone and practice safer habits. Upon policy renewal, you can save money based on your safe driving.

Receive feed daily from another vendor and will be loaded into database, Later ETL process extract the data from database and transforms it and loads the data to database as per the requirements.

Responsibilities:

- Developed code in Informatica/SQL/Shell Script as per the business requirements.
- Interacted with Business Owner and other Stakeholders during requirement gathering.
- Created shell scripts to fine tune the ETL flow of the Informatica workflows.
- Production Support has been done to resolve the ongoing issues and troubleshoot the problems.
- Performance tuning was done at the functional level and map level. Used relational SQL wherever possible to minimize the data transfer over the network.
- Effectively used Informatica parameter files for defining mapping variables, workflow variables, FTP connections and relational connections.

- Effectively worked in Informatica version based environment and used deployment groups to migrate the objects.
- Used debugger in identifying bugs in existing mappings by analyzing data flow, evaluating transformations.
- Pre and post session assignment variables were used to pass the variable values from one session to other.
- Jobs Automation done in Autosys tool and Dealt with Policy related information
- Reviewed and analyzed functional requirements, mapping documents, problem solving and trouble shooting.
- Identified problems in existing production data and developed one time scripts to correct them.
- Method followed: Agile

Designation: Assistant Systems Engineer

Client: CNA

Project: Merlin

Duration: February 2020-February 2021

Role: ETL Support/Enhancement

Description:

CNA Financial Corporation, headquartered in Chicago, is one of the largest U.S. commercial property and casualty insurance companies. With over 125 years of experience, CNA offers a broad range of standard and specialized insurance products and services for businesses and professionals across the U.S., Canada, and Europe. CNA focuses on risk management, claims support, and client service.

Merlin is a Enterprise Datawarehouse where it will store all the UpStreams data. [Data feed will be through Daily batch cycles, Weekly batch cycle, Monthly batch cycle]. According to the business ETL will generate the reports and will send the data to DownStreams from the Merlin Datawarehouse.

Responsibilities:

- Developer Team member in Data warehousing team, Participated in Production Support activities.
- Involved in Design, Development and Maintenance of database for Data warehouse project.
- Involved in Business Users Meetings to understand their requirements.
- Designed, Developed and Supported Extraction, Transformation and Load Process (ETL) for data migration with Informatica 9.6.1
- Monitoring Batch Jobs using Workflow Monitor, Tracking and Fixing job abends.
- Jobs Automation in Control-M tool and Dealt with Claim related information.
- Worked on the tickets/incidents raised by the business.
- Method followed: Waterfall
