Qualifications Summary

- Understanding of Core Cybersecurity Concepts
 - Access Control
 - Social Engineering
 - Vulnerabilities
 - Confidentiality, Integrity, Availability (+Authentication and Privacy)
 - Malware
- Competent with Python and C/C++
- Familiarity with SQL
- Familiarity with AWS
- Familiarity with JavaScript, HTML/CSS, JS (Node & React)
- Familiarity with Git and Github in the Command Line and on browser
- Interest in API development and Information Security
- Experience with Windows and Linux OS (Ubuntu both in a VM and through WSL)
- Eagerness to Learn and Use New tools
- Communication, Organization, and Documentation Skills

Education

Northern Arizona University	Graduation <i>May 2025</i>
<i>Flagstaff, AZ</i>	
B.S in Cybersecurity, GPA 3.77 (Cum Laude)	
Dean's List	<i>6 Semesters</i>
Lumberjack Scholarship	<i>All 4 Years</i>

Relevant Experience

Online Grocery Pickup *2021*

Walmart

- Staged, Prepped, and Dispensed Groceries during the Pandemic
 - Emphasis on time management, organization, teamwork, communication, personability, flexibility, and overall work ethic

AWS *Fall 2025*

Northern Arizona University - CS305 Computing Tools III

- Knowledge gained on AWS Well-Architected Framework
- Experience using AWS's EC2 to create, configure, and SSH into an instance

SQL *Spring 2024*

Northern Arizona University - CS345 Database Systems

- Knowledge gained and hands on experience using MySQL Workbench to create, find, and manipulate data in a database

Web Programming

Summer 2023 & 2024

Northern Arizona University - CS212 & 312 Web Programming I & II

- Developed Interest in Web Development
- Many projects that developed knowledge and experience using HTML, CSS, Node (using NPM and Express), and React
 - JavaScript Projects: <https://github.com/kdc392?tab=repositories>
- Used MongoDB with Mongoose library for data persistence
- Experience using Git and Github in a Command Line environment

Github Experience

Fall 2025

Northern Arizona University - CS305 Computing Tools III

- Forked, branched, committed, pushed, and did a pull request for a project as a member, then viewed and merged the changes as the owner, all on the command line using GitHub
 - Overall knowledge and practice using GitHub in the command line
 - Knowledge gained with the usage of LLMs

Lab Projects

Spring 2025

Northern Arizona University - BBA370 Admin IT Security and Assurance

- Analyzed packets on network with WireShark tool
- Analyzed packets from websites using Nmap tool
- Full-Scanned my laptop with MalwareBytes tool and removed unwanted files
 - Knowledge gained with various useful network tools and being detail-oriented

Northern Arizona University - CYB310 Malware Analysis

Spring 2024

- Developed basic understanding of malware topics
- Hands on experience setting up and using Ghidra in a VM environment to analyze malware

Northern Arizona University - CYB404 Network Security

Fall 2023

- Developed understanding of network vulnerabilities and security
- Further experience writing python scripts:
 - Simple brute force ssh worm script
 - Simple port scanner script
 - Simple password cracker script

Northern Arizona University - CYB410 Secure Software

- Experience debugging
 - Static and dynamic analysis techniques
 - Fuzzing, symbolic execution, taint analysis

Information Security Standards, Compliance Law

Spring 2025

Northern Arizona University - BBA370 Admin IT Security and Assurance, Module 6

- Knowledge gained on NIST and ISO
 - Primary goals, functions, and important standards

Phishing Detection Presentation

Spring 2025

Northern Arizona University - CYB499 Contemporary Developments

- Researched Social Engineering and Phishing
- Used a LoRa Fine-tuned RoBERTa LLM to detect phishing in an email dataset
 - Overall knowledge gained in social engineering and phishing

- Knowledge gained with the usage of LLMs

Interests

- Hiking and camping
- Participating in local economy and events
- Watching Movies
- Researching Topics of Interest and staying up to date with current events
