

KRITI KRITI

kakriti623@gmail.com | +1(530)7461462 | Davis, CA (Ready to relocate) | [linkedin.com/in/kriti-dev](https://www.linkedin.com/in/kriti-dev)

Full stack Software Engineer with 3+ years work experience building scalable web applications, REST APIs and cloud-native systems. Looking to join an engineering team where I can solve real-world problems- available April 2025.

EDUCATION

University of California, *Master of Science in Computer Science*, Davis, CA (GPA: 3.98/4.0) Sep 2022 - Mar 2025

Coursework: Software Engineering, Algorithms, ML, AI, Information Security

- Teaching Assistant in Public Speaking: Tutored 300+ students, enhancing technical and communication skills.

Guru Gobind Singh Indraprastha University, *B.Tech in Computer Science*, Delhi, India Aug 2016 - Sep 2020

- Graduated top 1% of class | Published in Taylor & Francis ([F-RBM for Text Summarization](#))

SKILLS

Technical Skills: Java, JavaScript, TypeScript, Python, SQL (Oracle, PostgreSQL), MongoDB, Elasticsearch, AWS, Docker, Kubernetes, RESTful APIs, WebSockets, Spring Boot, React, Angular

Systems & Design: Object-Oriented Programming, System Design, Microservices, Concurrency, Multithreading, Data Processing & Visualization

Tools & DevOps : CI/CD (Jenkins, GitLab CI/CD), Unit Testing, Agile Methodologies, Kafka, SonarQube, Git, Jira, Postman, Swagger, Maven, Gradle, Prometheus, Grafana, Spring Security, Gerrit

EXPERIENCE

Graduate Student Researcher, UC Davis Health | Sacramento, CA Mar 2024 - Dec 2024

- Developed a **CNN-based** image classification pipeline to analyze composite microscopy images of mice intestines, improving Inflammatory Bowel Disease diagnostics in collaboration with GI specialists.
- Engineered end-to-end data pipelines on **AWS EC2** to automate EMR processing and apply ML models (**clustering, logistic regression**) for identifying patient subgroups in ASD/NDD datasets.

Software Engineer Intern, iLife Technologies | Remote, CA Jun 2024 - Aug 2024

- Designed and deployed **RESTful APIs** using **Spring Boot** to automate premium calculations, integrating actuarial data and ensuring low latency responses for **1K+ daily quote** requests.
- Optimized React front-end by reducing bundle size and lazy-loading components, improving load time and boosting user engagement by **25%**.
- Tuned **PostgreSQL** query performance by adding composite indexes and analyzing execution plans, reducing average query latency by **10%**.

Software Engineer, S&P Global | New Delhi, India Aug 2020 - Aug 2022

- Built a real-time corporate actions dashboard using **Angular** and **Spring Boot**, integrating **data validation APIs** to **reduce support queries by 40%** and help clients access accurate market data instantly.
- Migrated legacy systems to **AWS EC2**, configuring auto-scaling and CI/CD to **reduce infrastructure costs by 15%** and **speed up deployments by 30%** with zero downtime.
- Upgraded **Oracle DB to 19c** and migrated legacy data access code to Spring JDBC, reducing query latency by 15% and increasing throughput by **25%** under concurrent load.
- Developed a **Kafka-based** real-time alerting system for service outages and anomaly detection, cutting average incident response time by 60%.

PROJECTS

Reddit Clone | *Angular, Java, Spring Boot, Spring Security* Jan 2024 - Feb 2024

- Developed a Reddit clone with advanced user authentication using **JWT** and Spring Security.
- Implemented user verification system with unique codes, facilitating user engagement by posts, likes/comments.

Placement Software, IEEE MSIT | *Django, Python, Javascript* Aug 2023 - Sep 2023

- In collaboration with **GGSIU** college's placement cell, streamlines candidate shortlisting and communication.
- Automated the process based on individual company requirements using Python and Django.

Speech Enhancement | *Python, Generative AI, NumPy, Keras, Tensorflow* Dec 2020 - Apr 2021

- Implemented a speech enhancement model using **Generative Adversarial Networks**, Librosa, and PyTorch.
- Significantly improved speech quality by reducing noise while optimizing processing time.

ACHIEVEMENTS

- Recipient of S&P Global '**Star Award**' for exceptional performance throughout and being an excellent team player.
- **Chairperson, IEEE WIE MSIT (Volunteering)** – Promoted women in STEM by outreach to **Aastha Nishta Foundation**.
