

KRUNAL VAGHASIYA

Boston, MA | (857) 421-9551 | vaghasiya.k@northeastern.edu | Portfolio | LinkedIn | GitHub

SUMMARY

Data Analyst with expertise in **Python, SQL, and statistical modeling**. Skilled in **data integration, transformation, and orchestration using Apache Spark and Airflow**, building **dashboards with Tableau/Power BI**. Experienced in **cloud data warehousing on GCP/AWS**, utilizing services like **S3, Redshift, and BigQuery**. Passionate about transforming **complex data into actionable insights** that drive business impact.

EDUCATION

Northeastern University | Boston, MA

Expected Dec 2026

Master of Science in Data Analytics - Concentration in Applied Machine Intelligence

GPA: 3.78/4.0

- Coursework - Data Mining, Database Management System, Statistical Modeling, Data Warehousing

LDRP Institute Of Technology And Research | Gujarat, India

May 2024

Bachelor of Technology in Computer Engineering

GPA: 3.6/4.0

PROFESSIONAL EXPERIENCE

Healthcare Data Analyst Intern

Feb 2024 – Jul 2024

Phreesia | India

- Analyzed CHF readmissions, built cohorts in SQL, establishing baseline metrics and department-level gaps.
- Cleaned and validated EHR data using SQL checks, improving reporting accuracy and stakeholder confidence.
- Identified high-risk patients through trend analysis, enabling targeted follow-ups and resource prioritization.
- Built Power BI dashboards from curated data; enabled KPI tracking, pilot achieved 4% readmission decline.

Data Analyst Intern

Jun 2023 – Jan 2024

Technonifirm Solutions LLP | India

- Supported initiative to increase Customer Lifetime Value by 15%, analyzing shopper data for retention insights.
- Cleaned customer and marketing datasets using SQL, ensuring accurate CLV and purchase-pattern analysis.
- Identified drivers of loyalty and repeat purchases, recommending personalized offers and cross-sell strategies.
- Built Power BI dashboards visualizing CLV and churn trends, enabling management to boost revenue 8%.

PROJECTS

Healthcare Wait Time Optimization Analysis | Python, Random Forest, Power BI

Sep 2025

- Analyzed 110,000 hospital appointments identifying bottlenecks reducing patient wait times from 29 to 22 days
- Built Random Forest model using Python predicting patient no-shows with 79% accuracy enabling interventions
- Created Power BI dashboard tracking 12 KPIs enabling administrators to monitor patient flow optimize scheduling
- Developed optimization strategy through analysis projecting 15% no-show reduction saving 4,500 appointments

Financial Portfolio Risk Analytics Dashboard | Python, Power BI, Monte Carlo Simulation

Jul 2025 - Sep 2025

- Analyzed 5-year market data for 15-asset portfolio calculating VaR Sharpe ratios achieving optimal 11.2% returns
- Built portfolio optimization model using Python scipy reducing portfolio risk by 18% while maintaining returns
- Created Power BI dashboard tracking 12 financial KPIs enabling real-time monitoring of \$2.5M investment
- Developed Monte Carlo simulation with 1,000 iterations projecting 87% probability of achieving 10% returns

AI-Powered Customer Churn Prediction Dashboard | Python, SQL, Power BI, XGBoost

Nov 2024

- Engineered predictive churn model using Python and XGBoost achieving 82% accuracy on 7,000 customer records
- Analyzed customer behavior through SQL queries identifying month-to-month contracts had 3x higher churn
- Built interactive Power BI dashboard visualizing \$2.3M revenue at risk across customer segments and services
- Extracted actionable insights recommending contract upgrades service bundling reducing predicted churn by 18%

TECHNICAL SKILLS

Programming Languages: Python (Expert), SQL (Expert), R, PowerShell, VBA, DAX

Frameworks / Libraries: Pandas, NumPy, Matplotlib, scikit-learn, TensorFlow, Seaborn, PyPlot, ggplot2, tidyverse

Database Systems : MySQL, NoSQL, MongoDB, RDBMS, Oracle, Snowflake, Azure Data Studio, Hadoop

ML Frameworks: Regression, Classification, Clustering, NLP, Time Series, Deep Learning(LSTM)

Data & Visualizations Tools : Power BI, Tableau, Qlik, Informatics, Alteryx, Databricks

IDE & Tools: RStudio, GitHub, Jupyter Notebook, PyCharm, Anaconda, Visual Studio, Google Analytics, AWS
