

SAI KRUPESH GOUD ALGANI

Jersey City, NJ | P: +1 2012415509 | krupesh.goud1799@gmail.com | www.linkedin.com/in/krupeshgoud

PROFESSIONAL SUMMARY

Java Full Stack Engineer with **5+ years of experience** building and supporting **enterprise-grade banking and healthcare applications**. Strong expertise in **Java, Spring Boot, Microservices, REST APIs, and CI/CD pipelines**, with hands-on experience in **secure, regulated environments**. Proven ability to improve system reliability, performance, and maintainability in production systems.

WORK EXPERIENCE

Citi

Java Full stack Developer

Jersey City
Sep 2025 - Present

Project Description:

Enterprise banking applications supporting **business-critical financial workflows** and internal user operations in a regulated environment.

- Owned the **design and enhancement of Java / Spring Boot microservices** supporting transaction-oriented backend systems used by multiple internal teams.
- Designed and maintained **RESTful APIs** with emphasis on reliability, low latency, and backward compatibility for downstream services.
- Led development of **React and TypeScript UI components** for internal platforms, reducing manual workflow steps and improving usability.
- Implemented **OAuth2 authentication and role-based access control (RBAC)** in alignment with banking security policies and audit requirements.
- Identified and resolved performance bottlenecks through **SQL query optimization and service-level tuning** in production systems.
- Collaborated cross-functionally with database and upstream/downstream teams to ensure **data consistency and integrity** across Oracle and PostgreSQL environments.
- Supported **production releases and incident triage**, contributing to stable deployments across dev, QA, and production in Agile/Scrum teams.

Tech Stack: Java, Spring Boot, Spring MVC, Microservices, REST APIs, React, TypeScript, OAuth2, Oracle SQL, PostgreSQL, Jenkins, Git, Maven, CI/CD, Agile/Scrum

NYU Langone Health

Software Engineer

New York
April 2025 - Sep 2025

Project Description:

HIPAA-compliant healthcare member portal supporting patient registration, enrollment, and profile management.

- Developed and maintained **Spring Boot microservices** supporting core healthcare workflows and member data processing.
- Took ownership of **modernizing legacy SOAP integrations**, migrating them to REST APIs to improve maintainability and long-term support.
- Implemented **OAuth2 security and RBAC**, ensuring compliance with healthcare security and privacy regulations.
- Improved application responsiveness and stability through **database tuning, caching strategies, and JVM optimization**.
- Strengthened release quality by developing **unit and integration tests** for critical service paths.
- Contributed to **CI/CD pipeline setup and enhancements**, enabling smoother deployments across environments.
- Participated in **production support and root-cause analysis**, helping stabilize live systems during active user usage.

Tech Stack: Java, Spring Boot, JPA/Hibernate, REST APIs, Oracle SQL, OAuth2, Jenkins, Maven, JUnit, Selenium, Cucumber, Swagger, Git, Agile

New Jersey Institute of Technology (NJIT)

Graduate Research Assistant

Newark, NJ
Aug 2024 - Dec 2024

- Designed and deployed **AWS-based cloud applications** for academic research workloads.
- Developed **Java and Python services** for data ingestion and distributed processing.
- Built REST APIs and automation scripts to support research validation workflows.
- Analyzed cloud resource usage and applied optimization strategies to control infrastructure costs.
- Assisted in **cloud architecture design and technical documentation**.

Tech Stack: AWS (EC2, S3), Java, Python, REST APIs, SQL, Git, Linux

Larsen & Toubro Infotech Mindtree

Software Engineer

Hyderabad, India
Aug 2019 - Aug 2023

Project Description:

Enterprise applications developed using microservices-based architectures for distributed systems.

- Developed and enhanced backend services using Java and Python, gradually taking on **ownership of service design and code reviews** within the team.
- Built and maintained REST APIs integrating internal and third-party systems, supporting **multiple client applications across environments**.
- Automated CI/CD pipelines using Jenkins, GitHub Actions, and Azure DevOps, **reducing manual deployment steps and improving release consistency**.
- Improved application performance through **database and service-level optimization**.
- Performed root-cause analysis and implemented fixes for recurring production issues.
- Supported UAT and production deployments in Agile teams.

Tech Stack: Java, Python, Spring Boot, Microservices, REST APIs, AWS, Azure, SQL, NoSQL, Jenkins, Git, Agile

PROJECTS

High-Volume Performance Monitoring Platform (AWS + Grafana + Athena)

- Engineered a serverless telemetry pipeline ingesting performance metrics from distributed systems.
- Queried logs with Amazon Athena and visualized trends in AWS Managed Grafana, reducing performance troubleshooting time by 50%.

End-to-End CI/CD Automation (GitHub Actions + IaC)

- Migrated manual deployment processes to a fully automated CI/CD workflow using AWS CDK (TypeScript).
- Enabled one-click environment provisioning, ensuring consistent test and production setups.

TECHNICAL SKILLS

Certifications: AWS Certified Developer - Associate

Languages: Java, Python

Frameworks: Spring Boot, Spring MVC, JPA/Hibernate

APIs & Architecture: REST APIs, Microservices, OAuth2, Swagger

Databases: Oracle, PostgreSQL, MySQL, MongoDB

CI/CD: Jenkins, GitHub Actions, Azure DevOps, Maven

Cloud: AWS, Microsoft Azure

Testing: JUnit, Selenium, Cucumber, TestNG

Methodologies: Agile/Scrum, SDLC, TDD

EDUCATION

New Jersey Institute of Technology

Master's in Computer Science

Newark, NJ
Sep 2023 - Dec 2024

Jawaharlal Nehru Technological University Hyderabad

Bachelor's in Computer Science & Engineering

Hyderabad, India
Aug 2016 - Aug 2020
