

Krushali Patel

Business Intelligence Analyst

+1 551-344-5187 | krushali.p@ajobguide.com | [LinkedIn](#) | [Tableau Public](#)

Professional Summary

- Business Intelligence Analyst with almost 4 years of experience, leveraging expertise in data mining, data visualization (Power BI, Tableau), and data warehousing to transform raw data into actionable insights using Python and SQL.
- Skilled in utilizing data visualization tools such as Power BI, Tableau, Alteryx, QlikView, Python (Matplotlib), and AWS QuickSight to design and deliver interactive, insightful reports and dashboards that drive actionable business decisions.
- Demonstrated proficiency in database architecture for OLTP and OLAP applications, ETL methodologies, and enterprise data warehouse development using SSIS.
- Proficient in data visualization tools such as Power BI, Tableau, Alteryx, Python Matplotlib, and AWS QuickSight creating powerful and actionable interactive reports and dashboards.

Skills

- **Programming & Data Analysis:** Python, SQL, R, NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit-learn, TensorFlow, Keras
- **Business Intelligence & Data Visualization:** Tableau, Power BI, AWS QuickSight, Looker Studio, QlikView, Alteryx
- **Data Warehousing & ETL Tools:** SQL Server Integration Services (SSIS), Informatica PowerCenter, SQL Server Management Studio (SSMS), Azure Databricks, SQLMesh
- **Databases & Query Languages:** MySQL, SQL Server, MongoDB, Snowflake, BigQuery
- **Cloud Platforms:** AWS (S3, EC2, Redshift, QuickSight, SageMaker, Lambda), Azure, Oracle Cloud
- **Machine Learning & Predictive Analytics:** Statistical Modeling, Naïve Bayes, Time-Series Regression, Predictive Analysis, Sentiment Analysis (NLP)
- **Documentation & Collaboration:** Lucidchart, MS Visio, BRD, FRD, SRS, Git, GitHub, Asana

Experience

Bristol-Myers Squibb, New Jersey, USA | Business Intelligence Analyst

Sep 2023 – Present

- Developed and automated over 35+ dynamic dashboards using Tableau and enabling real-time insights across R&D, clinical trials, and regulatory teams, and cutting manual reporting efforts by 60%.
- Analyzed structured and semi-structured health data using Python and T-SQL, uncovering trends that boosted patient adherence program ROI by 20% and reduced churn in therapy continuation by 25%.
- Designed and deployed optimized star schemas and data models in Snowflake and MySQL, supporting real-time drug efficacy tracking and pharmacovigilance reporting across 5+ therapeutic areas.
- Led comprehensive data cleansing and transformation on 10M+ row datasets, improving the accuracy of clinical trial outcome reports, inventory forecasts, and regulatory filings for cross-functional teams.
- Processed and analyzed over 100K patient feedback and product reviews, using NLP techniques to detect sentiment shifts and improve adverse event detection precision by 18%, helping guide formulation and labeling improvements.
- Built advanced Excel-based financial models for drug pricing, rebate management, and cost-benefit analyses, reducing manual errors by 35% and enabling the finance team to deliver faster reimbursement forecasts.

Zensar Technologies, India | Business Intelligence Analyst

Aug 2020 – Jul 2022

- Designed and launched real-time Power BI dashboards integrated with Azure SQL Database, enabling over 50 finance stakeholders to monitor key KPIs, which led to a 20% boost in performance tracking accuracy and faster executive reporting cycles.
- Built a dynamic data visualization system that improved visibility into financial and operational metrics by 45%, significantly enhancing decision-making speed across finance, product, and operations teams.
- Automated financial reporting pipelines using Azure Databricks, streamlining the consolidation of key metrics across departments and reducing manual data prep time by 35%, resulting in quicker monthly closes.
- Developed predictive models to flag early churn indicators, contributing to a 15% drop in customer attrition-related losses, helping refine retention strategies with targeted outreach and customer scoring insights.
- Partnered with BI engineers and finance leads to audit and improve data integrity, resulting in a 25% decrease in data cleaning efforts and faster delivery of forecasts and budgeting models.
- Extracted, cleansed, and transformed high-volume financial datasets from MySQL and Snowflake, increasing the accuracy of downstream reports and cutting analysis cycle times by 20%.

Education

Master of Science in Information Systems | Stevens Institute of Technology, Hoboken, New Jersey, USA

GPA: 3.6/4.0

Bachelor of Engineering in Information Technology | Mumbai University, Mumbai, India

GPA: 9.2/10

Academic Projects

Stock Market Prediction | Data Analytics & Machine Learning | Python, Flask, Data Analysis, ML, Web Dev, Tableau

- Developed a stock price prediction model using Yahoo Finance API, processing over 10,000 data points with Pandas and NumPy, and integrated a TensorFlow model in a Flask app for forecasting stock prices.
- Utilized Linear Regression, Random Forest, and Time Series Analysis for predictive modeling, enhancing data-driven investment strategies through feature engineering and model optimization contributing to a 30% increase in portfolio returns.
- Created interactive dashboards with Tableau for stock price trend visualization, achieving 85% accuracy in 30-day price predictions.

Certifications

- Analyzing Data in Tableau, Data Camp Skills Track 2024
- SQL Essential Training 2024
- Microsoft Power BI: Complete Introduction to Microsoft Power BI 2023
- Oracle Cloud Infrastructure: Certified Foundations Associate, 2023
