

Kshitija Dhananjay More Software Engineer

morekshitija6@gmail.com | 2164214380 | Cleveland, OH | LinkedIn

Summary

Results-driven Software Engineer with 6+ years of expertise in full-stack development, backend optimization, and cloud-based architectures. Proficient in Java, Spring Boot, Python, Flask, FastAPI, Vue.js, and JavaScript with hands-on experience in AWS, Azure, Kubernetes, and Docker. Skilled in designing RESTful APIs, database optimization (MySQL, SQLAlchemy, Redis), and CI/CD pipelines (Jenkins, Groovy scripts). Strong background in automation, ML-based fraud detection, and frontend technologies, enhancing performance, scalability, and user experience.

Technical Skills

- **Languages:** Java, Python, JavaScript, SQL, C/C++, Kotlin, HTML, CSS
- **Backend Frameworks:** Spring Boot, Flask, FastAPI
- **Frontend Technologies:** Vue.js
- **Mobile Development:** Android Studio, Java SDK, Firebase
- **Databases & Optimization:** MySQL, SQLAlchemy, Redis caching, Apache Airflow
- **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda), Azure Functions, Docker, Kubernetes, Jenkins (Groovy scripts), Prometheus, Grafana
- **Machine Learning & Automation:** Scikit-learn, TensorFlow, Selenium, PyAutoGUI, Pandas
- **Testing & CI/CD:** pytest, unittest, Jenkins CI/CD pipelines
- **Design & Project Management:** Figma, Sketch, Adobe Creative Suite, InVision, JIRA
- **Methodologies:** Agile (Scrum, Kanban)

Professional Experience

Software Engineer, Wayfair

01/2023 – Present | Remote, USA

- Designed a backend optimization strategy for a headless e-commerce platform, deploying 30 custom Java functions to achieve a 25% reduction in server response time, enhancing site reliability and operational efficiency.
- Built advanced MySQL query optimization techniques resulting in a 30% decrease in data retrieval time, leading to improved user experience and heightened customer satisfaction metrics.
- Implemented JavaScript for frontend and Java with Spring Boot for backend, achieving a remarkable 40% improvement in response time and enhancing website performance and user engagement.
- Implemented robust monitoring and analytics tools to continuously assess and optimize system performance, ensuring ongoing scalability and responsiveness of critical e-commerce functionalities.
- Collaborated with product management and design teams to translate business requirements into scalable technical solutions, ensuring alignment with development objectives and strategic goals.

Software Engineer, First Citizens Bank

09/2022 – 11/2022 | Remote, USA

- Assisted in developing and deploying Python-based automation scripts using Flask and FastAPI to streamline banking operations, enhancing workflow efficiency and reducing manual effort by 30%.
- Designed and implemented machine learning models (Scikit-learn, TensorFlow) for fraud detection and customer segmentation, improving risk assessment accuracy by analyzing large financial datasets.
- Developed and automated RPA workflows using Python, Selenium, and PyAutoGUI to handle repetitive banking tasks, reducing processing time for loan applications and customer verifications.
- Integrated RESTful APIs with Python-based automation tools to facilitate seamless communication between core banking systems and cloud platforms like AWS Lambda and Azure Functions.
- Optimized data pipelines using Pandas and Apache Airflow, ensuring real-time data processing for KYC verification, compliance checks, and customer onboarding automation.
- Conducted performance tuning, debugging, and log analysis using cProfile, Prometheus, and Grafana, ensuring robust security, scalability, and fault-tolerant automation solutions.

Graphics Designer, MTI News

05/2021 – 12/2021 | Navi Mumbai, India

- Directed and managed budgets for design projects, including meticulous resource allocation and cost control, ensuring financial efficiency and project profitability.
- Proactively stayed informed about industry trends, emerging design tools, and technologies such as Figma, Sketch, Adobe Creative Suite, and InVision to ensure the company's design work remained innovative and competitive.
- Quality Assurance: Ensured the accuracy and quality of design work by conducting thorough reviews and addressing any design errors promptly. Utilized tools like JIRA for issue tracking and resolution.
- Collaborated closely with departments such as marketing, advertising, and product development to understand their design requirements. Leveraged RESTful APIs and integration with backend services to create visually compelling materials that aligned with their objectives and goals.
- Implemented Agile methodologies, including Scrum and Kanban, to enhance project management and delivery efficiency.

Software Engineer, Accenture

12/2019 – 05/2021 | Navi Mumbai, India

- Migrated a desktop-based system to a cloud-based FastAPI & Vue.js web application, streamlining performance and improving runtime by 26% through optimized SQLAlchemy ORM queries.
- Designed and developed RESTful APIs using FastAPI & Flask, ensuring seamless integration with front-end components and achieving a 95% success rate in meeting business requirements.
- Enhanced API responsiveness by implementing Redis caching, query optimization, and efficient asynchronous processing, leading to a 30% performance boost.
- Improved Jenkins CI/CD pipelines with advanced Groovy scripts, automating testing, deployment, and error handling—reducing deployment failures by 40%.
- Leveraged AWS services (EC2, S3, RDS) for cloud-based deployment, ensuring high availability, scalability, and cost efficiency.
- Designed a Docker-based microservices architecture and deployed it on Kubernetes, enabling smooth scaling and streamlined resource management.
- Conducted unit and integration testing using pytest & unittest, maintaining high code quality and system stability.
- Mentored junior developers, led tech workshops, and actively contributed to Agile ceremonies for continuous improvement and innovation.

Android Developer & Tester, Trivia Softwares

12/2018 – 12/2019 | Navi Mumbai, India

- Designed and built mobile applications using Android Studio, Firebase, Java, and SDK, ensuring the delivery of efficient, maintainable, and high-quality code that meets project requirements.
- Collaborated closely with designers to create intuitive and visually engaging user interfaces by translating design mockups and wireframes into responsive, interactive features.
- Diagnosed and resolved code-level issues, performance bottlenecks, and compatibility challenges across various devices and operating system versions to enhance application stability and performance.
- Conducted comprehensive testing, including unit and integration testing, to ensure bug-free, high-performance applications, focusing on quality assurance and seamless functionality.
- Worked with cross-disciplinary teams, including designers and project managers, to understand project goals, gather requirements, and deliver applications on time while meeting all technical and user expectations.

Software Designer & Tester, Sunny's Retreat

07/2017 – 03/2018 | Mumbai, India

- Partnered with Vivekanand Education Society's Polytechnic College to develop a comprehensive hotel management software solution for Sunny's Retreat, seamlessly integrating room bookings and stock management with their existing website.
- Engineered the software to be highly adaptable, allowing for easy implementation by other hotel chains with minimal modifications, enhancing its scalability and versatility.
- Executed rigorous testing protocols to ensure the software's functionality, reliability, and user-friendliness, delivering a seamless experience for both hotel staff and guests.

Education

Master of Science, Cleveland State University
Computer Science

08/2021 - 05/2023 | Cleveland, USA

Bachelor of Engineering, University of Mumbai
Computer Engineering

08/2018 - 07/2021 | Mumbai, India

Diploma, University of Mumbai
Computer Engineering

08/2015 - 06/2018 | Mumbai, India

Projects

Chatbot for Multiple Clients & Servers (Advance Operating Systems), Cleveland, OH

01/2023 - 05/2023

- Server being the central component, hosts the Chatbot, & handles communication with multiple clients.
- Designed the system to handle a large number of concurrent users efficiently. Implemented load balancing and scaling mechanisms to distribute the workload across multiple servers if necessary.
- Provided a seamless and efficient way for users to interact with the chatbot through different computers while ensuring reliable performance and user satisfaction.

Script Scanner & Transcript Generator, (Mobile Communication & Computing), Mumbai, India

07/2020 - 05/2021

- Served as Developer and Lead Testing Coordinator in a new design to convert handwritten text into digitized text & also voice notes.
- Led to the development of the Script Scanner app leveraging Machine Learning and Deep Learning concepts.

Hotel Management Software, (Designing & Prototyping), Mumbai, India

06/2017 - 03/2018

- Worked with Vivekanand Education Society's Polytechnic College to build a hotel management software solution for Sunny's Retreat Hotel.
- Helps with booking rooms and managing stock with a direct connection to their original website.
- Ensured design would support implementation by any other hotel chains with minimal additional work.
