

SANDEEP KUMAR B.R

Mobile: +1 (848)-308-9394

Address: *Dallas, Texas*

Email: ssandeepraghunath1@gmail.com

- 10+ years of experience in the full software development lifecycle, specializing in the design, development, deployment and verification of commercial applications.
- Proficient in web application development using Java, Spring Boot, and Microservices architecture, Design patterns with hands-on experience in AWS cloud services and Pivotal Cloud Foundry.
- Skilled in developing user interfaces using HTML5, CSS3, JavaScript, Angular 12, and ReactJS 18.
- Experienced in applying Java and Microservices Design Patterns to build scalable and maintainable systems.
- Proficient in unit testing with JUnit 5, Mockito, and BDD using Cucumber and the Gherkin framework. Also experienced in testing Angular components using Jasmine and Karma.
- Strong background in Agile/Scrum methodologies, with hands-on experience in iterative development, sprint planning, and daily stand-ups.
- Extensive experience in the healthcare and finance domains.
- Trained in Java/J2EE, SQL, and Hibernate from a reputed institution, with a solid foundation in object-oriented programming and database management.

- **Java SE Platform:**
Strong expertise in **OOPs** concepts, **Collection API**, **Lambda functions**, **Stream API**, **Method references**, **Functional interfaces**, **Event handling**, **Exception handling**, and **Multithreading**.
- **Java EE Platform:**
Extensive experience with **JDBC**, **Servlets**, **JavaBeans**, **Hibernate**, **Spring MVC**, **Spring Boot**, **Spring JPA**, and **Microservices** architecture.
- **Design Patterns:**
Hands-on experience implementing design patterns including **Service Registry**, **Circuit Breaker**, **API Gateway**, **Event-Driven Architecture**, **Factory**, and **Singleton**.
- **Persistence Frameworks:**
Proficient in using **Hibernate** and **JPA** for mapping Java classes to databases and leveraging **HQL (Hibernate Query Language)** for efficient querying.
- **Databases:**
Knowledgeable about **MySQL**, **Oracle**, and **PostgreSQL** databases.
- **Web Technologies:**
Experience with **HTML**, **JavaScript**, and **Angular 12** for building dynamic and responsive user interfaces.
- **AWS Cloud Services:**
Experience working with **AWS** services such as **EC2**, **S3**, **Lambda**, and **RDS** for scalable application deployment and management in the cloud.

- **Rio star of the month** (June 2025) for successfully delivering the fix message delivery system and developing/providing a demo of the bank loan state machine application to clients, demonstrating exceptional collaboration and technical expertise.
- **Spot On A-Team Award** (April 2022) for exceptional teamwork and commitment during a successful client demo.
- **Night on the Town (NOTT) Award** (June 2020) for contributions to the design and development of Java services and BDD functional tests for the "Documentation of Additional Charges" project.
- **Contributor of the Month Award** (September 2018) for demonstrating dedication and commitment to the project's success.
- **Night on the Town (NOTT) Award** (September 2017) for leading the planning, design, and coding of the "Map NDC" functionality at the facility and pharmacy.
- **Night on the Town (NOTT) Award** (October 2016) for outstanding contributions to the Pharmacy Tech Currency projects.

➤ **Redefined Corp.**

Sep-2022 – Present

Client: **JP Morgan Chase.**

Implementation partner: **Cognizant.**

Involvement:

- Spearheaded the design, development, and deployment of the state machine-based bank loan application, from requirements gathering to production deployment, ensuring high performance, scalability, and reliability.
- Designed and implemented cloud-native application using Angular, Spring Boot, AWS and microservices architecture for improved scalability and fault tolerance.
- Automated build, test, and deployment processes using Jenkins and Docker, achieving faster release cycles and ensuring seamless integration and delivery for production environments.
- Maintained and modernized legacy applications on Pivotal Cloud Foundry, utilizing Flyway and Liquibase for automated database schema migrations and version control.
- Conducted in-depth performance analysis and optimization, reducing application response times by 30% through code refactoring, efficient data access, and the implementation of caching strategies
- Developed unit and integration tests using JUnit5 and Mockito and implemented Behavior-Driven Development (BDD) tests using the Cucumber and Gherkin framework to ensure high test coverage and reliability.
- Provided troubleshooting, defect analysis, and support during testing phases to ensure smooth application delivery.
- Monitored application performance and logged events using Splunk for debugging, while creating custom Splunk dashboards to track key metrics. Leveraged Grafana for observability, particularly for visualizing Kafka metrics.
- Led technical interviews and screening processes for junior, mid, and senior Java full stack developers and evaluated candidates' problem-solving abilities, programming/ coding skills.

➤ **Mindtree Ltd.**

Oct-2021 – Aug-2022

Client: **CxLoyalty**

Involvement:

- Designed and developed cloud-based applications on the AWS platform to meet client requirements for functionality, scalability,

and performance, utilizing services such as AWS EC2, S3, EBS, and AWS Lambda for storage and application deployment.

- Upgraded legacy applications from the EJB framework to Spring Boot, developing Java API's optimized for the AWS environment, and migrated database configurations and queries from Oracle to PostgreSQL.
- Implemented a modernized application using ReactJS 18 and Spring Boot, adopting microservices architecture and integrating ActiveMQ as a message broker. Deployed applications on the IBM WebSphere application server.
- Ensured PostgreSQL compatibility by upgrading database configurations and adapting queries to the new database environment.
- Automated build and deployment processes by setting up Jenkins jobs for continuous integration and deployment of all client applications.
- Conducted code reviews for modules developed by team members, ensuring adherence to coding standards and best practices.
- Supported the team with bug fixes and unit testing using JUnit 5 and Mockito, ensuring high-quality code and stability in the pre-production environment.

➤ **Cerner Healthcare Solutions India Pvt Ltd.**

Jan-2015 – Oct-2021

Involvement:

- Contributed to the design phase, ensuring alignment with client requirements and project objectives.
- Developed a new application using the Spring Boot framework and microservices architecture, deployed on the AWS cloud platform.
- Enhanced the user interface with Angular 5, improving the overall user experience and functionality.
- Built RESTful services for backend operations, including order detail management, dose calculation (min/max), and CRUD operations for order-related records, using Spring Boot.
- Created unit tests for the front-end using Jasmine and for the back-end using JUnit 5 and Mockito to ensure high-quality, maintainable code.
- Implemented BDD testing by creating a Cucumber Serenity framework project to validate developed services and ensure comprehensive test coverage.
- Participated in code reviews, providing feedback and ensuring code quality for modules developed by team members.

➤ **Master of Technology in Power Electronics (2013-2015)**

BMS College of Engineering, Bangalore.

Visveshvaraya Technological University.

Aggregate Percentage: 77.667%

Project title: Design and Implementation of Configurable Solar Converter System.

➤ **Bachelor of Engineering in Telecommunication engineering (2009-2013)**

Vemana institute of technology, Bangalore.

Visveshvaraya Technological University.

Aggregate Percentage: 74.426%

Project title: Single Event Effect Testing of DDR-SDRAM.

- Conducted an academic training on the topic “Web application development” as a guest lecturer at New Horizon College,

Bengaluru, Karnataka, India during September 2017..

- Presented the project work in the 3rd International Conference on electrical energy systems held at Chennai in March 2016.
The paper got published in the IEEE conference publications in July 2016.
- Converted to a full-time employee in July 2015 after successfully completing the internship program with outstanding performance.
- Secured 94.14 percentile in EC-GATE 2013.
