DATA ANALYST | BUSINESS ANALYST

Results-driven Data Analyst with strong experience in business analysis, data modeling, and statistical analysis. Proficient in SQL, Python, R, Tableau, and Power BI to transform complex datasets into actionable insights. Proven ability to deliver data-driven solutions that improve business processes and operational performance.

RELATED SKILLS

Programming & Querying: SQL, Python, R

Data Visualization & BI Tools: Tableau, Power BI, Matplotlib

Statistical Analysis: Regression, A/B Testing, Hypothesis Testing, Predictive Modeling

Data Engineering & Databases: Extract, Transform, Load (ETL), Data Wrangling, Data Cleaning, MySQL, PostgreSQL

Cloud Technologies: Azure, Snowflake

Business & Data Analysis: KPI Development, Trend Analysis, Stakeholder Requirements

Project Management: Agile, Scrum, JIRA

PROFESSIONAL EXPERIENCE

Business Analyst, Tacoma, WA

Jun 2023 – Jun 2024

MultiCare OCED

- Built a predictive ML model in Azure ML Studio (**98% accuracy**) to forecast daily patient volume and integrated it with a PowerApps application, replacing manual inventory tracking and optimizing resource allocation, improving patient satisfaction.
- Developed interactive [Tableau dashboards](#) for four locations to track patient volume, seasonal trends, and demographics, reducing door-to-doctor time by **8 minutes** and total patient time by **30 minutes** at two sites, driving measurable improvements in key operational KPIs.
- Collaborated with cross-functional stakeholders to gather requirements, define project objectives, and design streamlined business workflows, delivering dashboards and ML-driven forecasting solutions that informed strategic decision-making.
- Extracted, cleaned, and transformed 300K+ patient records using MySQL, Excel, and R (dplyr, stargazer, forecast, ggplot), ensuring data accuracy and enabling regression analysis that delivered strategic insights for improved patient care and operational efficiency while maintaining HIPAA compliance.

Data Analyst, Tacoma, WA

Dec 2023 – Jun 2024

ISSIP

- Collaborated with stakeholders to simulate an AI Sandbox and analyze historical service innovations, developing a playbook for generative AI adoption to enhance service delivery and guide future AI strategy.
- Conducted hands-on evaluation of **50+** prompts across **15 AI tools**, generating images, videos, and text outputs, and curated the top-performing results on a web portal for internal reference and knowledge sharing.
- Turned AI testing results into clear recommendations, helping the team work more efficiently, make better decisions, and adopt innovative AI tools faster.

RELEVANT PROJECTS

Breast Cancer Detection Predictive Model

- Built a two-class neural network in Azure Machine Learning Studio, achieving 98.2% accuracy in predicting breast cancer, leveraging data modeling and predictive analytics to enhance early detection capabilities.

Amazon Kindle E-books Market Analysis

- Conducted exploratory data analysis on Amazon Kindle E-books using Tableau, creating interactive dashboards that revealed key trends and informed pricing strategies, enhancing market positioning for publishers and authors.

Stock Price Prediction Using Text & Structured Data

- Developed a Python model that combined tweet sentiment analysis with stock data to predict next-day prices, achieving 93% accuracy, showcasing expertise in data analysis, Python programming, and statistical modeling.

EDUCATION

Master of Science in Business Analytics, University of Washington–Tacoma, WA, 2024, GPA: 3.9/4.0
