

Kurupati Veda Samhitha

Business Analyst

Location: Texas, USA | Ph: (469) 553-0930 | Mail: vedasamhitha022@gmail.com

PROFESSIONAL SUMMARY:

Business & Data Analyst with 3+ years of experience performing financial analysis, pricing support, sales analytics, and data modeling across enterprise environments. Skilled in using SQL, Excel (Pivot Tables, nested formulas), Power BI, Tableau, and Python to extract, transform, and analyze large datasets and deliver actionable insights. Experienced in proposal pricing, cost modeling, sales performance reporting, and market intelligence research to support strategic planning and revenue optimization. Adept at building dashboards, preparing price submissions, documenting business requirements, and collaborating with cross-functional teams across finance, product, analytics, and operations. Strong problem-solving ability with a track record of improving reporting efficiency, supporting data-driven decision-making, and enhancing business performance.

TECHNICAL SKILLS:

Business & Financial Analysis: Pricing Models, Cost Analysis, Discounts & Commissions, Revenue Forecasting, Market & Competitor Analysis, KPI Measurement

Reporting & Analytics: Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, XLOOKUP, Nested Formulas, Charts), Sales Performance Dashboards

Data Extraction & Modeling: SQL, Data Modeling, ETL Logic, Large-Dataset Manipulation

Systems & Tools: SAP (Basic Understanding), Jira, Confluence, Microsoft Office, CRM Systems

Business Documentation: BRD, FRD, Business Cases, Price Submissions, Requirements Gathering

Soft Skills: Stakeholder Collaboration, Presentation Skills, Problem Solving, Cross-Functional Alignment

PROFESSIONAL EXPERIENCE:

Morgan Stanley – TX | Business Analyst | August 2024 – Present

- Streamlined financial data analysis processes using Python (Pandas, NumPy, Scikit-learn) and SQL, boosting risk assessment precision by 40% and strengthening credit decision-making and fraud detection.
- Created and launched dynamic Tableau dashboards, cutting reporting time by 50% and expediting executive insights into financial performance.
- Gathered, documented, and analyzed business requirements (BRD, FRD, SRS) for compliance, risk management, and investment banking projects, ensuring regulatory conformity.
- Authored user stories and use cases for AML/KYC automation, applying machine learning models to improve fraud detection efficiency and lower false positives.
- Conducted cost-benefit and risk evaluations for investment portfolios, ensuring risk-adjusted yields and optimizing asset distribution strategies for institutional investors.
- Executed GAP analysis for SOX compliance, spotting control gaps and deploying mitigation actions, strengthening audit efficiency and regulatory adherence.
- Modeled comprehensive banking processes via Microsoft Visio, aligning financial operations with Basel III, IFRS 9, and Dodd-Frank mandates to mitigate risks.
- Prepared and updated operational reports in Excel, performed precise data entry, and escalated workflow or system issues to leadership, supporting smooth end-to-end operations in a fast-paced environment.
- Coordinated daily operational tasks and managed large volumes of time-sensitive requests, ensuring accurate documentation, timely follow-ups, and seamless communication across internal teams and external stakeholders.
- Oversaw and coordinated UAT testing with HP ALM and Zephyr, working with QA teams to ensure smooth rollouts of lending, trading, and core banking systems.
- Engineered SWIFT and FIX protocol integration workflows, enabling faster securities trading, payments, and settlements, minimizing transaction delays.
- Partnered with operations and HR business partners to strengthen employee relations, streamline performance management, and align workforce plans with organizational goals across multiple departments.
- Supported talent acquisition and onboarding processes by coordinating candidate evaluations, training sessions, and new-hire documentation in compliance with EEO and OFCCP standards.
- Led initiatives to enhance **employee engagement** through structured feedback programs, career development plans, and recognition activities that boosted retention and team morale.

- Performed pricing and financial modeling using Excel (Pivot Tables, nested formulas) and SQL to calculate discounts, commissions, and cost scenarios, supporting proposal pricing decisions and improving pricing accuracy.
- Designed and automated Tableau/Power BI dashboards tracking sales performance, conversion rates, and product profitability, enabling leadership to identify growth opportunities and optimize pricing strategies.
- Analyzed market data, competitor insights, and industry reports to estimate market size, evaluate competitive positioning, and provide strategic recommendations for business planning.
- Analyzed workforce data in ADP Workforce Now and Power BI to monitor timekeeping accuracy, labor productivity, and compliance metrics, enabling informed HR decision-making.
- Built and sustained a requirements traceability matrix (RTM), ensuring alignment with scope, regulatory standards, and risk control strategies.
- Provided Level-2 IT and system support across Microsoft 365, Azure, and Windows Server environments—troubleshooting network connectivity, Active Directory, and security issues to ensure 99.9% uptime.
- Developed and maintained technical documentation and runbooks for system architecture, backup configurations, and recovery procedures, aligning with compliance and vendor support requirements.

Zensar Technologies – India | Business Analyst | May 2021 - July 2023

- Boosted customer satisfaction scores by 30% through leading the rollout of a modern CRM system and optimizing support operations, delivering faster, more tailored customer interactions.
- Built interactive Power BI dashboards analyzing sales funnels, conversion metrics, customer trends, and revenue opportunities, improving forecasting accuracy and driving data-informed decisions.
- Delivered ad-hoc business reports for product and sales teams, transforming raw data into actionable insights that supported campaign strategy and operational improvement.
- Delivered a 20% rise in AOV by applying customer behavior insights to design and implement upselling and cross-selling strategies, elevating user experience and revenue growth.
- Prepared detailed Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) to ensure project alignment, supporting effective stakeholder communication and project delivery.
- Produced clear user stories and use cases outlining system capabilities and user journeys, enabling development teams to accurately meet user expectations.
- Created process flow diagrams to represent current and future workflows, helping stakeholders identify efficiencies and visualize operational enhancements.
- Partnered with cross-functional groups via Jira and Confluence for agile collaboration, documentation, and project tracking, ensuring on-time achievement of milestones.
- Performed advanced sales data analysis with SQL and Power BI, extracting actionable insights to guide management's strategic business growth decisions.
- Designed and updated a RACI matrix to define project team responsibilities and roles, driving accountability and transparent task ownership.
- Worked with the marketing team to optimize digital campaigns using Google Ads and Facebook Ads Manager, achieving stronger ROI and improved campaign outcomes.
- Implemented strict data privacy protocols in compliance with GDPR and ISO 27001, ensuring secure handling of customer information and regulatory adherence.
- Collaborated with business and operations leaders to design and roll out employee performance appraisal frameworks **and** succession-planning dashboards for internal career growth tracking.
- Drove change-management and training programs that increased adoption of new HR and operations systems, improving process consistency and employee satisfaction by 25%.
- Supported policy development, ADA/FMLA administration, and corrective-action documentation, ensuring alignment with corporate and legal HR compliance standards.
- Partnered with HRIS and payroll teams to maintain accurate employee records, optimize **timekeeping** and scheduling, and ensure seamless data integration with **Enterprise eTime**.

EDUCATION:

Master of Information Tech Management - Webster University, Texas, USA

Bachelor of Information Science and Technology - New Horizon College of Engineering, Karnataka, India

CERTIFICATIONS:

- **Certified Associate AWS Data Engineer** – Amazon
- **Certified Associate Azure AI Engineer** - Microsoft
