

KUSHWANTH SAI M

San Jose, CA | Email: kushwanthsm@gmail.com | Phone: +1(408) 764 1257 | [LinkedIn](#)

Summary:

- Around 6 years of professional experience in software design and development with a strong **Java, J2EE** background and **UI Development**. Experience in **SDLC, Agile (SCRUM)**, Iterative, Waterfall methodologies and Object Oriented Application Design and Programming.
- Implemented security mechanisms like **OAuth 2.0, JWT**, and encryption to ensure application data protection.
- Skilled in event streaming systems using Apache Kafka for asynchronous messaging and real-time processing.
- Optimized application performance using JVM tuning tools like **VisualVM** and **JProfiler**, achieving significant latency reductions.
- Proficient in cloud platforms such as AWS (EC2, S3, RDS) and Azure for deploying and managing high-availability applications.
- Strong understanding of Object-Oriented Design principles and **J2EE** design patterns, including Singleton, Factory, and DAO.
- Developed backend services integrating **NoSQL** databases (MongoDB) and **SQL** databases (MySQL, Oracle), optimizing queries for performance.
- Experience in using **MVC** based **JavaScript** frameworks like **Angular JS, Back Bone JS, Ext JS, Ember JS** and Knockout JS.
- Extensive experience on MVVM frameworks like **Angular** Versions 2.0 onwards also recently **Angular 9.0& 15.0, Angular Material** and **React** with Redux to develop dynamic web applications.
- Experience working on **RESTFUL** Web Services and Implementing **REST API'S**
- Experienced in using **React.JS** components, Forms, Events, Keys, Router, Animations and Flux concept
- Expertise in Back-end/server-side **Java** technologies such as: Web services, **Java** persistence **API (JPA)**, **Java**. Messaging Service (**JMS**), Rabbit MQ, **Java** Database Connectivity (**JDBC**), **Java** Naming and Directory Interface (**JNDI**).
- Excellent work experience with Database writing highly complex **SQL/PL SQL** queries, with major Relational Databases **MS Access/Oracle/MySQL**.
- Good Experience in **React.js** for creating interactive UI's using One-way data flow, Virtual DOM, **JSX, React Native** concepts.
- Strong experience in developing Single Page Application (SPA), using **MEAN (Mongo, Express, Angular and Node)** stack.
- Experience in working with **NoSQL, MongoDB**, and **Apache Cassandra**.
- Experience in **AWS** Solutions using **EC2, S3, EBS, Elastic Load Balancer**, and Auto Scaling Groups.

Technical Skills:

- **Languages** : C, C++, Java 17, SQL, PL/SQL, Node.JS, Angular JS, Angular 13, React JS.
- **Server-Side Frameworks**: Struts, Spring, Hibernate, Spring MVC, Spring Boot, Spring Web Flow, Spring IOC, Spring AOP, Spring Security, JSF, Junit, SOAP UI, JReport, Rational Rose, RabbitMQ, Spring Boot.
- **Web Technologies**: HTML5, CSS3, JavaScript, JQuery, Bootstrap, TypeScript, Angular 8/15, Angular material, AJAX, Node.JS, React JS, Redux.
- **Web/Application Servers**: Apache Tomcat, IBM WebSphere, Web logic Application server, JBOSS, Camel.
- **Databases**: Oracle, SQL-Server, MySQL server, MS SQL, IBM DB2, MongoDB, NoSQL, Cassandra, Azure Cosmos DB.
- **Cloud Technologies**: AWS, Pivotal Cloud Foundry(PCF), S3, RDS, GCP, Azure cloud service.
- **Tools & IDE**: Eclipse, IntelliJ, Spring Tool Suite(STS), RAD, Adobe Dreamweaver.
- **Version Control**: GIT, SVN, CVS
- **J2SE/J2EE Technologies**: Java, Spring Boot, Spring, Spring IOC, J2EE, RMI, Sockets, JDBC, Servlets, JSP, JMS, Java Beans, JSTL, Jakarta Struts, JSF, EJB 3.0, Spring, Hibernate, JTA, JNDI, JPA, JMS.
- **Message Brokers**: Kafka, RabbitMQ, ActiveMQ, TIBCO, IBMMQ
- **Testing**: JUnit, Mockito, Soap UI, SLF4J, Log4j and JIRA.
- **Build Tools**: Ant, Maven, Docker, Gradle
- **Web Services**: SOAP, REST Microservices, JAX-RPC, WSDL, JAX-RS JAX-WS, UDDI, JAX-B, CFX.
- **Operating Systems**: Windows, UNIX, Mac OS X, Ubuntu, Linux
- **Methodologies**: Agile, Scrum, Waterfall

Project Experience:

LPL Financial, San Francisco ,CA | Sr. Java Full Stack Developer

July 2024 – Present

Responsibilities:

- Designed and developed end-to-end solutions using **Java, Node.js, React.js, React Native**, and **TypeScript**, delivering scalable and responsive applications.
- Built backend services with **Java 8/11/17, Spring Boot**, and **Spring Core** to handle complex business logic and data processing.

- Used **Java 17 features** (e.g., concurrency, parallelism, and JEPs for garbage collection and JIT compilation) to optimize application performance.
- Developed payment processing interfaces and web applications using **Angular 13** for front-end and **MongoDB** for backend data storage.
- Created responsive, high-performance UI with **React.js and Redux**, ensuring seamless cross-device experiences.
- Built and maintained **RESTful APIs using Node.js and Express.js**, efficiently handling thousands of concurrent requests.
- Integrated **Apache Kafka** into microservices architecture for real-time, event-driven communication, optimizing cluster performance through configuration tuning and partitioning.
- Utilized **Docker** for containerization and **Kubernetes** for orchestration, enabling scalable microservices deployment.
- Led CI/CD pipeline optimization using **Jenkins**, automating build, test, and deployment processes for reliable delivery.
- Implemented real-time communication with **WebSockets** and **Python**-based frameworks for chat and notification features.
- Deployed serverless functions with **AWS Lambda** and managed data storage with **DynamoDB, PostgreSQL, and MongoDB**.
- Developed reusable **React and AngularJS** components, ensuring maintainability and adherence to coding standards.
- Collaborated with DevOps teams to deploy and scale **Python**-based services on **AWS and GCP**.

Environment: Java, Spring Boot, GraphQL, GCP, Apache Camel, JUnit, Scala, Kafka, RESTful APIs, Node.js, SQL, Hibernate, Apache Spark, Microservices, AWS (Lambda, SQS, SNS, EC2), Jenkins, YAML, Agile/Scrum, DynamoDB.

HSBC Bank, Hyderabad, India | Java Full Stack Developer

Jan 2021 – Jan 2023

Responsibilities:

- Actively participated in Agile Scrum processes, contributing to sprint planning, user story estimation, and daily stand-ups.
- Designed and developed microservices-based applications using **Spring, Spring Boot, Hibernate, Gradle, JDBC, and Oracle**, leveraging Eureka for service discovery.
- Built user interfaces with **HTML5, CSS3, Bootstrap, JavaScript, Angular 6, and Node.js**, enhancing performance with component-based development.
- Developed **RESTful APIs** with Spring Boot and Node.js, integrating MongoDB for **CRUD** operations and **GraphQL** for data mutations.
- Optimized application performance using Angular 6 and Core Java concepts (multithreading, collections, exception handling).
- Integrated **AWS services (EC2, S3)** for compute and data requirements, ensuring seamless application infrastructure.
- Built single-page applications with **React.js, Redux, and GraphQL**, utilizing **JSX** for clean, HTML-like structures.
- Developed services for catalog data publishing and notifications using **Spring RESTful services and Apache Kafka**.
- Created custom Kafka Connect connectors for legacy system integration and **Kafka Streams** for real-time analytics.
- Designed **Grafana** dashboards to visualize performance metrics and user behavior insights.
- Configured **CI/CD** pipelines with **Jenkins** and **GitHub**, automating deployment to **AWS**.
- Managed **MongoDB** schema design and performed database programming with **Oracle and PostgreSQL**.

Environment: Java 8, GitHub, HTML5, CSS3, Angular (2/4/6/8), jQuery, Bootstrap, Node.js, React.js, Apache Kafka, Spring 4.0, JAX-RPC, Jenkins, CI/CD, MongoDB, GraphQL, AWS, Spring Boot, Hibernate, Microservices, RESTful services, JSP, JUnit, WebLogic.

Baja Finserv, Hyderabad, India | Java Developer

July 2018 – Dec 2020

Responsibilities:

- Designed and developed multi-tiered web interfaces using **Java, Hibernate, Spring**, and multithreading for user account and payment systems.
- Utilized Spring modules (**MVC, Boot, IOC, DAO, AOP, Batch**) to build scalable applications.
- Developed single-page applications with **Angular, React.js, and Node.js**, using **NPM** and **Gulp** for view generation.
- Built **RESTful APIs** with **Node.js and Express**, enabling seamless front-end/back-end communication.
- Implemented CI/CD pipelines with Jenkins and Docker, deploying applications to **Pivotal Cloud Foundry (PCF)**.
- Configured Apache Camel routes for message routing and used **JMS** for asynchronous communication (e.g., payment status reports).
- Designed **Grafana** dashboards for real-time metrics visualization and Splunk for log monitoring.
- Developed data models with **MongoDB and MySQL/PostgreSQL**, integrating with Java and Node.js backends.
- Wrote unit and integration tests using **JUnit** and **Mockito** to ensure code reliability.
- Deployed serverless components with **GCP Cloud Functions** for chatbot functionalities.
- Used Git for version control and **SOAP** web services for financial data transfer.

Environment: Java 8, GitHub, React.js, HTML5, CSS3, Angular (4/6/8), jQuery, Bootstrap, Spring 4.0, JAX-RPC, Jenkins, Apache Kafka, GraphQL, Spring Boot, Hibernate, MongoDB, AWS, Gradle, Microservices, RESTful services, JSP, JUnit, PCF, Swagger.

Education:

- **Master Of Science in Computer Science** - California State University, San Bernardino, California.
