

LAKSHMI KORLAKUNTA

Saint Louis, MO | +1-314-281 7036 | lakshmi.kdata@gmail.com

Professional Summary

Data Analyst with a Master's in Applied Computer Science and hands-on experience in transforming raw data into actionable insights. Proficient in SQL, Python, and cloud data warehouses, with a strong track record in building scalable dashboards using Tableau and Power BI. Skilled in data modeling, statistical analysis, and creating efficient ETL pipelines while optimizing workflows across AWS and Snowflake environments. Eager to continue growing in data analytics, with a strong foundation in SQL, data visualization, and business-focused reporting. Excellent communicator experienced in partnering with product, sales, and marketing teams to turn complex data into high-impact business strategies.

Skills

- **Programming:** Python, SQL, Java, C++
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Power BI, Tableau, Looker Studio, Data Reporting, Data Analysis, Ecommerce Experience
- **Databases:** PostgreSQL, MySQL, MS SQL Server, Snowflake, MongoDB, Redshift, Cloud Data Warehouses
- **Data Engineering:** Apache Airflow, PySpark, Kafka, ETL/ELT Design, dbt
- **Cloud Platforms:** AWS (Lambda, S3, RDS, Glue), Azure, GCP
- **Web Technologies:** HTML, CSS, JavaScript, TypeScript
- **DevOps Tools:** Git, Docker, Kubernetes, Terraform, Azure DevOps, GitHub Actions
- **CI/CD & Automation:** Jenkins, Airflow, AWS Step Functions
- **Monitoring & Logging:** Datadog
- **Project Management & Collaboration:** Agile, Scrum, JIRA, Confluence

Professional Experience

UnitedHealth Group

Jun 2024 - Present

Data Analyst

Saint Louis, MO

- Conducted data wrangling and statistical analysis using Pandas and NumPy to transform raw data into actionable insights for dashboard development.
- Worked with large-scale structured and unstructured data using Python and Spark for modeling and analytics.
- Hands-on experience with Snowflake, ETL tools like Airflow, and Python-based pipelines on AWS.
- Demonstrated expertise in designing, developing, and maintaining Tableau dashboards and analytics solutions to enable data-driven decision-making and enhance business performance.
- Automated recurring Power BI reports using scheduled data refresh and row-level security configurations for secure distribution.
- Created automated dashboards and ad hoc reports using **Google Sheets** with integrated **SQL connectors** and data validation for business users.
- Optimized ETL workflows, reducing data delivery time from 8 hours to 30 minutes.
- Worked with Google Big Query for scalable data analysis and reporting.
- Built automated reporting solutions using **Google Data Studio**, connecting with Google Sheets and cloud databases via SQL connectors to deliver self-serve, real-time business insights.
- Built custom data replication pipelines between AWS S3 and Snowflake using Python APIs.
- Transformed JSON logs into Parquet format via AWS Glue, significantly reducing storage expenses by 35%.
- Developed Python APIs to synchronize data between AWS S3 and Snowflake, cutting manual intervention by 90% while ensuring clean data sets.
- Extracted CRM data from Salesforce using SQL connectors for revenue analytics and GTM dashboarding.
- Engineered DynamoDB schemas for real-time IoT telemetry, achieving sub-10ms query responses and supporting quick decision-making.
- Collaborated with executives and business stakeholders to gather reporting requirements and translate them into actionable dashboards.
- Constructed REST APIs using FastAPI to enable scalable and real-time data access for business users. Experience working in globally distributed teams and Agile (Scrum) environments.
- Implemented dbt testing and Pytest-based validation scripts to ensure data pipeline reliability and accuracy.
- Defined and documented key metrics and KPIs for recurring GTM reports and dashboards, enabling consistent cross-team interpretation.

- Utilized Jupyter and Matplotlib for in-depth data exploration and trend visualization, aligning data insights with business strategy.
- Architected robust data systems with AWS ECS, incorporating load balancing and fault tolerance to manage high-volume data streams.

Tetrasoft Private Limited

Jan 2022 - Dec 2022

Associate Data Analyst

Hyderabad, India

- Managed high-frequency IoT datasets in battery telemetry simulations, ensuring data integrity for accurate reporting.
- Optimized SQL queries through advanced indexing and partitioning, reducing execution times by 40% and enhancing data analysis efficiency.
- Utilized DAX functions (e.g., CALCULATE, FILTER, ALL) in Power BI to create dynamic measures and KPIs for executive dashboards.
- Supported near real-time data sync using Airflow and Snowflake for reporting use cases.
- Worked on financial data pipelines, supporting reporting needs in the banking/finance sector.
- Built retention and activation funnel dashboards to track user engagement and adoption for product-led initiatives.
- Built and maintained robust data pipelines using Airflow and Python, forming part of a modern data stack with Snowflake and dbt for scalable analytics.
- Developed analytical queries in Snowflake, effectively handling semi-structured data to produce clean data sets for reporting.
- Coordinated PySpark jobs using AWS Step Functions, increasing pipeline reliability by 25% and supporting consistent data delivery.
- Implemented role-based access control and scheduled backups for MS SQL Server environments to maintain data security and availability.
- Applied test-driven development (TDD) principles using Pytest for unit and integration tests, ensuring data quality and pipeline stability across deployments.
- Designed normalized data models for PostgreSQL and Redshift, improving query performance and ensuring data integrity for detailed analysis.
- Supported Agile development cycles by delivering backend features with test-driven development, contributing to timely project completion.

Education

Southeast Missouri State University

May 2024

Master's, Applied Computer Science

KKR & KSR Institute Of Technology and Sciences

June 2022

Bachelor's, Electronics and Communication Engineering
