

Lakshmi Keerthana Aravapalli

Full Stack Developer | Java | React | AWS | Spring Boot

keerthana@jobitwork.com | +1 (682) 298-6844 | github.com/keerthana-1 | linkedin.com/in/lakshmi-keerthana-aravapalli | Boston, MA (open to relocate)

SUMMARY

Full Stack Software Engineer with 4+ years of experience building scalable web applications using Java, React, Spring Boot, and AWS. Proficient in both frontend (React, TypeScript, HTML/CSS) and backend (Java, Node.js, REST, GraphQL) development. Skilled in designing microservices and APIs, optimizing SQL and NoSQL databases, and deploying cloud-native applications on AWS and Azure. Strong team collaborator in Agile environments, with experience in CI/CD, containerization (Docker, Kubernetes), and high-availability systems.

TECHNICAL SKILLS

Languages: Java 17, JavaScript, TypeScript, Python, SQL, HTML5, CSS, XML, JSON

Frontend: React.js (Hooks, Redux, Context API), Next.js, Bootstrap, HTML/CSS

Backend: Spring Boot, Node.js, Microservices, GraphQL, RESTful APIs

Databases: PostgreSQL, MongoDB, SQLServer, Cosmos DB

Cloud/DevOps: AWS (EC2, S3, CloudFront, Aurora, Redshift), Azure (Web Apps, Cosmos DB, Traffic Manager), Docker, Kubernetes, GitHub Actions, CI/CD, Terraform (basic)

Testing and Tools: JUnit, Selenium, Git, JIRA, GitHub Actions, Visual Studio, IntelliJ

PROFESSIONAL EXPERIENCE

Software Engineer - Full stack, State Street, Boston, MA.

Jun 2024 – Present

- Developed a high-throughput NAV engine using Java 17, Spring Boot, GraphQL, and PostgreSQL, integrating Kafka for real-time processing and event-driven reliability.
- Engineered WebSocket based live market data ingestion with multithreaded consumers to support concurrent asset updates and real-time NAV recalculations.
- Built scalable REST/GraphQL APIs and dynamic React.js UIs with TypeScript, enhancing engagement by 15%.
- Deployed microservices on AWS (EC2, S3, CloudFront) using Docker and GitHub Actions for fault-tolerant CI/CD. Optimized PostgreSQL via JDBC tuning and indexing, reducing query time by 20%.
- Collaborated in Agile teams across design, product, and QA to accelerate delivery.
- Improved code quality with Git, JIRA, and code reviews, reducing bugs by 25%.

Software Engineer - Full stack, Deloitte, India

Jul 2021 – Jan 2023

- Designed and implemented an AI-powered chatbot framework using Azure Bot Services, Bot Framework SDK (Java), LUIS, and QnA Maker for intelligent, real-time user interactions.
- Deployed the chatbot via Azure Web Apps and optimized global performance using Azure Traffic Manager, reducing latency and boosting availability by 15%.
- Architected scalable data storage using Azure Cosmos DB and SQL Database to support high-throughput, low-latency operations with high availability.
- Contributed to full-stack development with secure API integration, role-based access control, and responsive UI components in React.

Software Engineer Intern - Full stack , KPIT, India

Jan 2020 – Jun 2021

- Developed a responsive web application using Spring Boot (Java) and React.js, aligned with microservices architecture for modular scalability.
- Designed and secured RESTful APIs with Spring Boot, integrating seamlessly with the React frontend via Axios for efficient data communication.
- Implemented dynamic and user-friendly UIs using React, Bootstrap, and Axios, enhancing overall user experience and interface responsiveness.
- Optimized SQL Server performance by applying Spring Data JPA with custom JPQL and Criteria API, backed by a normalized relational schema.
- Built CI/CD pipelines using GitHub Actions for automated testing and deployment to Azure App Services, ensuring continuous delivery and high system reliability.

EDUCATION

M.S. Computer Science | GPA: 3.74/4.0

Jan 2023 – Dec 2024

University of Massachusetts - Boston, Boston, MA
