

PROFESSIONAL SUMMARY

I'm a Business Intelligence Analyst with over four years of hands-on experience transforming data into actionable insights that drive smarter decisions. I've worked closely with cross-functional teams and stakeholders to build dashboards, automate reporting processes, and improve overall efficiency. I enjoy using tools like Power BI, SQL, Excel, and Tableau to uncover patterns and trends that matter. My background includes working at a service-based IT company, where I helped deliver custom web solutions for clients across various industries. I also bring in process improvement knowledge through Lean Six Sigma practices.

TECHNICAL SKILLS

Business intelligence & Visualization: - Power BI, Tableau, Power Automate, KPI Tracking, Dashboard Design, Data Storytelling.
Data Analytics & Programming: - SQL, MySQL, R, Python (Pandas, NumPy), DAX, Excel (Advanced Formulas, Pivot Tables)
ETL & Data Management: - Power Query, Data cleaning, SSIS (basic), Data Modeling.
Tools & Platforms: Microsoft Office Suite, PowerApps (basic), Azure Synapse (academic exposure), Git
Methodologies: Lean Six Sigma (Green Belt), Agile, SDLC, Change Management

PROFESSIONAL EXPERIENCE

Data Analyst

IKKON Technologies – Chennai, India | Sep 2019 – Aug 2023

- Partnered with internal teams and clients to deliver customized reporting solutions for web-based platforms developed by the company.
- Created end-to-end Power BI dashboards tracking key performance indicators (KPIs), improving client visibility into operational and financial performance.
- Automated manual reporting processes using Power Automate, cutting report generation time by over 40%.
- Applied Lean Six Sigma methods to streamline ETL processes and improve the accuracy of insights shared with clients.
- Conducted root cause analysis on inconsistent data sets and proposed solutions to ensure data integrity and reporting reliability.
- Worked closely with project managers and stakeholders to ensure timely delivery of BI reports aligned with customer expectations.
- Developed SQL scripts and Power Query logic to transform and prepare data for analysis across multiple client databases.

ACADEMIC PROJECTS

Health Risk Prediction & Performance Dashboard – [Power BI, SQL, Excel, Power Automate]

University of New Haven | July 2024 – Dec 2024

- Applied Lean Six Sigma to improve data analysis flow and automate health alerts. Created Power BI dashboards visualizing patient risk segments using machine learning techniques.

Port Authority – Passenger & Bus Forecasting (2015–2030) – [R, SQL, Power BI, Tableau]

University of New Haven | July 2024 – Dec 2024

- Processed 100+ datasets to forecast passenger volumes. Applied ARIMA and LSTM models; visualized insights in Power BI and Tableau to guide transportation planning.

Education

Master of Science in Business Analytics

University of New Haven

(Aug 2023 – Dec 2024)

Relevant Coursework: Power BI & Dashboarding, Data Visualization, Business Forecasting, Supply Chain Management, Data Mining

CERTIFICATIONS: -

- Microsoft Power BI Data Analyst Associate
