SUMMARY

I'm currently working as a Software Engineer at Adapt Health and have a Master's degree in Computer Science. I excel in Java, C and Python utilizing them effectively in embedded systems and networking. With 2.5+ years of experience, I'm seeking an entry-level position at a reputable company where I can apply my skills to significantly contribute to the company's success while fostering my personal growth. I am deeply passionate about crafting innovative solutions to enhance customer experiences. I actively engage in collaborative efforts with interdisciplinary teams to ensure seamless project implementation.

PROFESSIONAL EXPERIENCE

Software Engineer (Java)

Adapt Health

01/2024 – present
Winter Park, USA

- Spearheaded the design and development of scalable software solutions, demonstrating expertise in Java, JavaScript, AWS Services S3, Redis, Dynamo DB, Lambda along with SQL and MongoDB.
- Involved in a team of 8 engineers in implementing agile methodologies to increase project efficiency and ensure timely delivery of projects.
- Implemented CI/CD pipelines using Jenkins and Docker, reducing deployment time, and ensuring seamless software delivery.
- Engineered robust RESTful APIs, GraphQL APIs capable of handling over 10 million requests daily monitored thru Dynatrace, leveraging advanced features of Spring Boot. Handled Async communication using Kafka topics.

Java Developer

ITIS Pro

05/2023 – 12/2023
Atlanta, USA

- Designed, coded, tested, and debugged software applications using Java, SQL, Python, and analytical skills.
- Developed and implemented RESTful APIs, enabling seamless communication between frontend and backend, resulting in 30% faster data retrieval.
- Assisted with code reviews, actively providing constructive feedback to improve code quality and maintainability, fostering a culture of code excellence.
- Engineered an automated testing framework using JUnit, increasing test coverage by 25% and reducing defects.
- Developed software applications using Java and integrated them with data processing pipelines, improving data processing efficiency.
- Demonstrated problem-solving and analytical skills, addressing complex challenges to deliver robust software solutions that led to a 5% reduction in application crashes.

Associate Software Engineer

Cognizant Technological Solutions

12/2021 – 01/2022
Bangalore, India

- Creating pipelines, data flows and data transformations and manipulations using Azure Data Factory (ADF) and PySpark.
- Conducted tuning and optimization of complex SQL queries using Teradata Explain.
- Responsible for Collect Statistics on FACT tables.
- Wrote numerous BTEQ scripts to run complex queries with Databricks.
- Developed Python scripts for ETL load jobs using Panda functions, reducing data processing time by 40% and increasing overall efficiency.
- Developed Spark applications using PySpark and Spark-SQL for data extraction, transformation and aggregation from multiple file formats for analyzing & transforming the data to uncover insights into the customer usage patterns.
- Created a Dashboard on QuickSight as per the customers' requirements.

CERTIFICATIONS

- AWS Developer Associate
- COMPTIA Security+

SKILLS

- Programming: Java, C, Python, Embedded C.
- Tools: Eclipse, Visual Studio, Microsoft Azure, Power BI, Cadence.
- Operating Systems: Mac OS, Windows, Linux.
- Databases: MySQL, Microsoft Azure Studio.
- Microsoft Tools: MS Word, MS Excel, MS Power point.
- IDE: Eclipse, IntelliJ, NetBeans.
- Web Technologies: HTML, CSS, JavaScript, Angular JS, React
- Framework: Spring boot, Spring, Agile.

EDUCATION

Masters in Computer Science
University of Missouri Kansas City
GPA -3.57/4.0

Kansas City, MO

PROJECTS

House Party Music Player-Spotify Room

Skills: Python, React.js, Django

House Party Music Player is a collaborative full stack web application developed with React.js and Django. It enables users to create and join rooms for a shared music playback experience. By integrating with the Spotify Web API, this application offers real-time music control and authentication.

AWS Serverless Website

Skills: AWS Lambda, Amazon API Gateway, Amazon DynamoDB.

Use of various cloud services to implement the web based application and making it available to the users specific to the region that it is implemented for. It is a simple serverless web application using AWS components – AWS Lambda, Amazon API Gateway, Amazon DynamoDB, Amazon Cognito and AWS Amplify Console.
