PROFESSIONAL SUMMARY

- Data Analyst with expertise in data visualization, predictive analytics, and business intelligence.
- Proficient in Python (NumPy, pandas, scikit-learn), SQL, AWS, Tableau, Power BI, and Excel.
- Experienced in data extraction, cleaning, and transformation from multiple sources (MSSQL, AWS S3).
- Skilled in building machine learning models (supervised & unsupervised learning) to extract insights and trends.
- Developed and maintained interactive dashboards and reports to monitor KPIs and business performance.
- Optimized SQL queries for efficient data retrieval, improving data processing times and report generation.
- Delivered actionable insights to stakeholders, enabling data-driven decision-making.

TECHNICAL SKILLS

- **Programming Languages:** Python (NumPy, pandas, scikit-learn), SQL
- **Machine Learning:** Supervised & unsupervised learning, regression, classification, clustering
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn, DAX
- **Cloud Platforms:** AWS (S3, EC2)
- **Database Management:** MSSQL
- **Tools & Software:** Excel, Jupyter Notebooks, Git

PROFESSIONAL EXPERIENCE

Data Analyst

Aptech, USA

Aug 2023 – Present

- Extract and clean data from multiple sources, including databases (MSSQL) and cloud platforms (AWS S3), ensuring data quality and consistency for analysis.
- Apply statistical methods and machine learning techniques (supervised & unsupervised learning) using Python libraries like pandas, NumPy, and scikit-learn to identify trends, patterns, and key insights from structured and unstructured datasets.
- Create compelling data visualizations using tools like Tableau, Power BI, Matplotlib, and Seaborn to present findings clearly and effectively to both technical and non-technical stakeholders.
- Creating reports, charts, graphs, and dashboards to visualize data. This helps stakeholders understand key metrics and trends.
- Using Excel features like macros or VBA (Visual Basic for Applications) to automate repetitive tasks, making processes more efficient.
- Develop and maintain reports and dashboards using Power BI and Tableau to track key performance indicators (KPIs) and monitor business trends. Leverage Excel and DAX to perform ad-hoc analysis and automate reports.
- Write and optimize SQL queries to retrieve data from MSSQL databases for analysis, ensuring that data extraction is efficient and accurate.

Junior Data Analyst

Vortex Infotech, USA

Feb 2023 – July 2023

- Assist in building and updating basic dashboards or reports for tracking key metrics using tools like Excel or Power BI.
- Assist senior analysts with complex SQL queries or database management tasks as part of larger data projects.
- Regularly update and maintain KPI dashboards.
- Write SQL queries to extract data required for KPI analysis. For example, pulling sales figures from a database or customer engagement data from a CRM system.
- Configure automatic data refresh schedules for Power BI reports and dashboards to ensure that the data is updated regularly from the data source.

Data Analyst

Wipro Technologies, India

May 2021 – May 2022

- Developed interactive dashboards in Power BI and Tableau, enabling stakeholders to monitor key performance indicators (KPIs) and make data-driven decisions.
- Optimized SQL queries for efficient data extraction, transformation, and analysis, reducing query execution time.
- Automated data pipeline workflows using AWS (S3, EC2), reducing data processing time by 25%.
- Collaborated with business units to gather requirements and translate them into effective data visualization and reporting solutions.
- Integrated multiple data sources into unified dashboards, enhancing accessibility for non-technical users.
- Provided ad-hoc analysis and predictive insights to support business operations and strategies.

Technologies: Power BI, Tableau, SQL, AWS, Data Analytics,

Data Analyst Intern

BSNL Ltd., India

Feb 2019 – May 2019

- Cleaned, transformed, and prepared raw data for analysis, ensuring data quality and accuracy.
- Conducted exploratory data analysis (EDA) and created visualizations to identify customer behaviour patterns.
- Assisted in the design and implementation of data pipelines for data collection, pre-processing, and analysis.
- Supported machine learning model deployment and performance monitoring to ensure scalability and efficiency.

Technologies: SQL, Python, Data Analytics

CERTIFICATIONS

- **AWS Certified Cloud Practitioner – AWS**
- **Learning Certificate in Advanced Programming in Data Science and Machine Learning – IIT Madras**
