Education

University of Illinois Chicago, MS in Computer Science August 2023 – May 2025

- **Coursework:** Data Science, Database Systems, Computer Vision, Computer Algorithms, Data Structures, Object Oriented Programming, UX Research Methods, Data and Text Mining, High Performance Processors and Systems, NLP

Experience

Java Backend Developer, Infosys – Telangana, India June 2022 – August 2023

- Modernized Java and Spring Boot applications using the Red Hat Migration Toolkit, reducing technical debt by 30%.
- Developed scalable and highly available systems and microservices using Java 8, Spring Boot, SQL, and NoSQL, processing over 10,000 daily transactions and integrating with RESTful APIs.
- Achieved more than 90% test coverage with 80 JUnit test cases; led system and integration tests.
- Optimized SQL queries and designed efficient data access layers using best practices and design patterns of software development, reducing integration errors by 25%.
- Resolved 150 SonarQube issues and improved code quality through peer reviews and static analysis.
- Fixed over 50 critical REST API bugs in AWS-hosted services, leveraging data analytics to improve back-end stability by 35%.
- Managed Agile workflows with 30 JIRA tickets per sprint; contributed to CI/CD processes using Jenkins and Git.

Software Developer, Tech Encryptors – Remote May 2020 – June 2022

- Developed scalable backend services using Python and Node.js, integrating RESTful APIs and utilizing SQL for data management to improve system throughput.
- Collaborated with Agile teams to deliver user-facing features alongside product and data teams.
- Integrated AWS cloud technologies, including S3, Lambda, and EC2; streamlined CI/CD pipelines using Docker and GitHub Actions.
- Managed data storage and retrieval using PostgreSQL and MongoDB for high-volume applications.
- Guided in system design discussions and conducted code reviews to ensure code quality and architectural consistency.
- Built an internal automation tool for data labeling, reducing manual effort by 60%.

Projects

Weather App (JavaScript, jQuery, HTML5, CSS3, AccuWeather API)

- Implemented real-time weather features using asynchronous AJAX calls and AccuWeather API.
- Enhanced user experience by implementing a system refreshing weather data every 15 minutes, utilizing JSON parsing and AccuWeather API, leading to 99.9% uptime and zero reported data accuracy issues.

Restaurant Website (JavaScript, Bootstrap, HTML5, CSS3)

- Designed a responsive static site with interactive menu filtering and online table booking feature.
- Revamped UX with image gallery and CTAs, resulting in an estimated 35% reduction in bounce rate.

Skills

Languages & Frameworks: C, C++, Java, Python, Go, PHP, JavaScript, TypeScript, HTML5, CSS3, Kotlin, Rust, Ruby, Spring Boot, Angular, Node.js, J2EE, Django, Bootstrap

Libraries: JUnit, Hibernate, Kafka, React, jQuery, Maven, RESTful APIs

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Jenkins, Git, GitHub, Bitbucket, CI/CD Pipelines, Infrastructure as Code (IaC)

Databases: SQL, MySQL, PostgreSQL, MongoDB, Redis, Amazon DynamoDB, Amazon RDS, Oracle

Operating Systems: Linux, Ubuntu, macOS, Windows
