## SUMMARY

Software Developer and Full-Stack Developer with **around 3 years** of experience in building scalable web applications using **Java SE 8+, Spring Boot, JPA, and React.js**. Skilled in developing **RESTful APIs**, implementing **JWT/OAuth 2.0** security, and optimizing data access with **PostgreSQL** and **Hibernate**. Hands-on with **Docker, AWS EC2, and GitLab CI/CD** for microservice deployment, along with test automation using **JUnit, Mockito, and Selenium**. Projects include real-time apps, **LMS** platforms, and integrated payment systems using **WebSocket, Thymeleaf, and MySQL**.

## TECHNICAL SKILLS

|                                   |                                                                                                                                                           |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Languages &amp; Core Java:</b> | Java SE (8+), Java EE, OOP, Data Structures & Algorithms, Python                                                                                          |
| <b>Back-End Development:</b>      | Spring Boot, Spring MVC, Hibernate, JPA, RESTful API, Microservices                                                                                       |
| <b>Front-End Development:</b>     | HTML5, CSS3, JavaScript, React.js, Angular, Vue.js, jQuery, Express.js, Node.js                                                                           |
| <b>Database &amp; ORM:</b>        | MySQL, PostgreSQL, MongoDB, SQL, Database Design                                                                                                          |
| <b>API &amp; Integration:</b>     | RESTful APIs, SOAP, JSON, XML, API Integration                                                                                                            |
| <b>Testing &amp; QA:</b>          | JUnit, Mockito, Selenium, Unit & Integration Testing, Debugging Tools                                                                                     |
| <b>DevOps &amp; Cloud:</b>        | AWS, Azure, GCP, Docker, Kubernetes, CI/CD Pipelines Version Control & Collaboration: Git, GitHub, GitLab, Agile, Scrum Architecture & Design: MVC, MVVM, |
| <b>Security:</b>                  | OAuth 2.0, JWT, Authentication & Authorization, Encryption, Security Annotations                                                                          |

| <ul style="list-style-type: none"><li>Designed and implemented 12+ production-grade RESTful APIs using Spring Boot, Java SE 8, and JPA, supporting modular integration across logistics and finance platforms.</li><li>Developed scalable front-end components using React.js, HTML5, and CSS3, delivering intuitive UIs for internal portals accessed by over 500 users.</li><li>Refactored legacy PostgreSQL queries and optimized ORM layers in Hibernate, improving transaction response times by 1.5 seconds across 3 core modules.</li><li>Enforced JWT and OAuth 2.0 security protocols within microservices, bolstering authentication reliability and reducing security-related bugs during UAT.</li><li>Automated 100+ test cases using JUnit, Mockito, and Selenium, integrating them into the CI/CD pipeline to accelerate QA turnaround by 2 days per release.</li><li>Deployed microservices with Docker on AWS EC2, orchestrated rollout via GitLab CI/CD, and managed rollback/versioning strategies across 6 production environments.</li><li>Partnered with cross-functional teams in <b>Agile</b> ceremonies to deliver 20+ sprint goals, aligning backend, frontend, and</li></ul>                                                                                                                                           |                                         |

- DevOps workflows for faster product iterations.
- Executed 30+ unit and integration test cases using JUnit and Mockito, identifying and resolving logic issues early in the SDLC to improve code reliability in staging environments.

## EDUCATION

**University of Central Missouri | Kansas, USA**

**Aug 2023 – May 2025**

Master's in Computer Science

**Saveetha School of Engineering | Chennai, India**

**Jul 2018 – Jul 2022**

Bachelor's in Computer Science

## CERTIFICATIONS

- Oracle Certified Associate** – Java SE 8 Programmer
- AWS Certified Solutions Architect** – Associate
- IBM Certified Developer** – Apache Spark 1.6
