

SUMMARY

- Around 4 years of experience in object-oriented programming (OOP), design, and development of multi-tier distributed, Enterprise applications using Java and J2EE technologies with Software Development Life Cycle.
- Ability to install and configure AWS cloud services like Lambda, EC2, S3, SQS, SNS, CloudFormation, and DynamoDB.
- Expertise in all spring framework modules such as Spring IOC, AOP, Spring REST, Spring Web, Spring Web Flux, Spring Batch, Spring Security, and Spring MVC architecture.
- Proficient in Developing User Interface (UI) Rich Web Applications using Front End/User Interface (UI) technologies using HTML5, CSS3 frameworks, Bootstrap, JavaScript (ES5 & ES6), React.JS, jQuery, and AJAX by managing all facets and pipelines of application.
- Experience with version control and configuration management tools like GIT and GitHub.

SKILLS

Methodologies: SDLC, Agile/Scrum, Waterfall

Languages: Python, Java, C#, SQL, Go, Typescript, JavaScript

Frameworks/Libraries: Spring Boot, Spring MVC, JSF, Hibernate, React.JS, Node.JS

Spring Frameworks: Spring REST, Spring Web, Spring Web Flow, Spring Batch, Spring Security.

J2EE Technologies: Servlets, JSP, JSTL, JavaBeans, JDBC, Microservices

Web Technologies: HTML5, CSS3, Bootstrap5, jQuery, Ajax, JSON, XML, Redux

Cloud/Application Server: AWS (API Gateways, CloudWatch, Lambda, S3, SQS, ECS, EKS), GCP

Database: PostgreSQL, MongoDB, DynamoDB

Tools: Docker, Jenkins, JIRA, Postman, Git, GitHub, JUnit

Operating Systems: Windows, Linux

EDUCATION

Master of Science in Computer Science

University of Florida, Gainesville, FL

May 2023

GPA: 3.4/4.0

Coursework: Data Structures, Analysis of Algorithms, DBMS, Software Engineering, Operating Systems, Computer Networks, Agile Project Management.

WORK EXPERIENCE

Synchrony Financial, NJ

Jan 2023 – Current

Full Stack Developer

- Work in an Agile environment, with the ability to accommodate and test the newly proposed changes at any time during the release.
- Implement robust asynchronous messaging with SQS queues, enabling system components to handle 50% higher load without performance degradation.
- Streamline Java application delivery by orchestrating 15+ CI/CD pipelines with Docker, Jenkins, and GitLab, achieving 50% faster deployment cycles.
- Establish Java Spring Boot REST APIs that seamlessly integrate with AWS RDS databases to deliver real-time data to client applications.
- Utilize JUnit with continuous integration (CI) pipelines to automatically run tests on every code change, providing rapid feedback and improving development velocity.
- Integrate third-party libraries like React Router and Redux, enhancing user experience and application functionality.
- Applied DynamoDB Streams to trigger real-time event processing, reducing batch processing latency by 18%.

Draxo Infotech, India

Jan 2019 - July 2021

Full Stack Developer

- Automated Spring Boot application builds and deployments using Jenkins and Maven, resulting in faster release cycles and improved team efficiency.
- Created 20+ custom React hooks to encapsulate complex DOM logic and promote code reusability.
- Enhanced API testing with Postman collections and scripts, achieving 10% test coverage and reducing manual testing effort by 15%.
- Orchestrated deployment of Spring Boot microservices in Docker containers on Amazon ECS using the AWS Management Console.
- Developed and maintained server-side functionalities using Node.js, handling concurrent connections efficiently.
- Utilized Git branching and merging strategies for efficient collaboration with 10+ team members.
- Designed and developed the End Points (Controllers), Business Layer, and DAO Layer using the Hibernate/JDBC template, using Spring IOC (Dependency Injection).
- Orchestrated efficient NoSQL database solutions with DynamoDB, optimizing data retrieval times by 25% and implementing partition key strategies for reduced query latency.
- Optimized React component rendering using code-splitting, resulting in a 15% reduction in initial page load time.
