

LAVANYA GANTA

Bridgeport Connecticut, USA | +1 (331)-226-3542 | Lavanya.ganta@aogjob.com

SUMMARY

Data Analyst with 4+ years of experience in developing and optimizing ETL pipelines, AI-driven analytics, and data visualization. Expertise in Python (Pandas, NumPy, Scikit-learn, TensorFlow), SQL, Power BI, and Azure AI. Proven track record in improving data accessibility, reducing redundancy, and enhancing decision-making through predictive modeling and automation. Adept at integrating AI for requirement analysis, optimizing SQL queries, and building insightful dashboards to drive business efficiency and regulatory compliance.

TECHNICAL SKILLS

Methodologies	Software Development Life Cycle (SDLC), Agile/ Scrum, Waterfall
Language & Database	Python, SQL, NoSQL, MongoDB, Postgres, PL/SQL, MySQL, MSSQL, Azure SQL Database
Python Packages	Pandas, NumPy, Matplotlib, SciPy, Scikit-Learn, SeaBorn, PyTorch, TensorFlow, ggplot2
Cloud & IDEs	AWS, GCP, RStudio, PyCharm, Snowflake, Jupyter Notebook
Data Analytics Skills	Data Manipulation, Predictive Analysis, Data Cleaning, Data Mining, Data Visualization, Statistical Modeling, EDA, Data Modelling, Data Governance, A/B Testing, Cohort Analysis
Tools	Tableau, Power BI, ETL, SQLite, Cron Tasks, SharePoint, ServiceNow, Microsoft Excel, Visual Studio Data Tools, Talend, Microsoft office Suite, Jira, SSRS, SAS, Git, GitHub, Jenkins

PROFESSIONAL EXPERIENCE

Data Analyst | PTC, Boston, USA

March 2023 - Present

- Developed and optimized ETL pipelines using Python (Pandas, NumPy) & SQL processing 500,000+ product requirements and test cases from structured and unstructured data sources, improving data accessibility.
- Implemented AI-based duplicate detection models using Scikit-learn, TensorFlow, and NLP techniques (BERT, TF-IDF), reducing redundancy in requirement documentation by 15% and enhancing data consistency.
- Designed and optimized SQL queries and stored procedures, enhancing data retrieval speeds, ensuring real-time updates in the Codebeamer ALM platform and reducing processing latency.
- Led the integration of Microsoft Azure AI for automated requirement generation, reducing manual documentation efforts by, streamlining development workflows.
- Developed AI-based clustering models (K-Means, DBSCAN) to classify similar product requirements, reducing misalignment errors by 10%, ensuring better traceability across software development lifecycles.
- Designed a DAX-based Power BI solution to track compliance trends, increasing regulatory adherence, ensuring software development met industry standards and best practices.

Data Analyst | Sigma InfoSolutions, Bengaluru, India

November 2020 - October 2021

- Analyzed and transformed structured, semi-structured, and unstructured datasets from 15+ sources, including SQL databases, APIs, and cloud platforms, to provide unified and actionable insights.
- Designed and developed 25+ dynamic Power BI dashboards with advanced features like drill-through filters and paginated reports, increasing decision-making efficiency.
- Conducted predictive and statistical analysis using DAX and Python, creating forecasting models that improved sales predictions by 15% and enhanced operational planning.
- Defined and monitored 20+ KPIs for operational efficiency and financial performance, resulting in a 10% reduction in costs and a 12% revenue increase through actionable recommendations.
- Optimized SQL queries and ETL pipelines, reducing data preparation time and query execution time by 35%, enabling real-time reporting and faster insights.
- Documented data models and pipelines, conducted detailed presentations of insights, and implemented best practices in data visualization, ensuring clarity and long-term usability.

Data Analyst | Magna Infotech, Bengaluru, India

October 2019 - November 2020

- Extracted, transformed, and cleaned datasets from various sources, including SQL databases and APIs, improving data quality by 35% and reducing errors by 20%.
- Developed and maintained ETL pipelines using Python and SQL, automating workflows and cutting manual processing time by 50%.
- Designed and optimized SQL queries, reducing query run time by 40%, which enhanced data retrieval speed and improved operational efficiency.
- Collaborated on the development and maintenance of data warehouses, improving data accessibility by 30%.
- Built interactive dashboards using Power BI and Tableau to visualize key business metrics, leading to a 15% increase in data-driven decision-making by stakeholders.
- Conducted statistical analyses and implemented predictive models in Python/R, increasing forecast accuracy by 25% and driving a 10% improvement in sales performance.

EDUCATION

Masters in Computer and Information Sciences

Sacred Heart University, Fairfield

March 2023

Connecticut, CT

Bachelor in Data Analyst

Veltech University

June 2020

Chennai, India
