SUMMARY

4+ years of experience as a Java Programmer. Proficient in SDLC phases: Analysis, Planning, Design, Implementation, Testing, and Maintenance. Expertise in Agile (SCRUM), Waterfall, and Test-Driven Development (TDD), with extensive use of JUnit. Strong understanding of Core Java and OOP concepts, with expertise in Collections, Multi-Threading, Exception Handling, etc. Extensive programming experience in Java/J2EE, utilizing JDBC, Servlets, JSP, EJB, Spring, Hibernate, etc. Skilled in front-end technologies: HTML, CSS, React.JS, Bootstrap, JavaScript, TypeScript, AJAX, JSON, XML, jQuery. Hands-on experience in Single Page Applications (SPAs) using React.JS. Proficient in ORM frameworks like Hibernate, Eclipse, NetBeans, and MVC frameworks like Struts, JSF, and Spring. Experienced in using JSON for data interchange between AngularJS and Spring MVC. Strong database skills with SQL Server, PostgreSQL, MySQL, PL/SQL, including stored procedures, functions, triggers. Familiarity with NoSQL databases MongoDB, Apache Cassandra, and relational data modeling. Proficient with GitHub for code versioning and Jira for project management.

SKILLS

Languages:	Java, Core Java, JavaScript, and SQL
Web technologies:	HTML, CSS, Bootstrap, React, JSON, XML, jQuery etc.
Frameworks:	Spring, Spring boot, and Hibernate
Database:	MySQL, SQL Server, and PostgreSQL
Tools:	Jira, GitHub, Tableau, Wireshark, SAP, and MS Office
Others:	J2EE, JDBC, Servlets, Microservices, JSP, JPA, TestNG, JUnit, Maven, Gradle, Restful, SOAP, IDEs
Methodologies:	SDLC, Agile, Scrum, and Waterfall
Operating Systems:	Windows, and MacOS

EDUCATION

Bachelor of Science in Information Systems

The University of Texas at Arlington, Arlington, TX

| May 2023

EXPERIENCE

- SumatoSoft, Remote, USA
- Java Developer
- | Jan 2022 – Present
- Coordinated with 5+ business units monthly for critical program maintenance and modifications.
 - Engineered scalable server-side services using Java multithreading, boosting application performance by 30%.
 - Architected application components with Java Collections, enabling concurrent database access and slashing query latency by 25%.
 - Enhanced code readability and reduced errors by 20% through the implementation of over 15 enhancements with Java annotations and generic collections.
 - Developed backend layers integrating Hibernate, jQuery, and React.JS, cutting page load times by 40% and elevating user satisfaction; leveraged React.JS for REST API interactions, achieving a 50% reduction in API response time and enhancing user experience.
 - Led and contributed to complete SDLC phases across 3 major projects, ensuring timely delivery and client satisfaction.
 - Successfully transitioned 2 applications to client-side rendering with React.JS, resulting in a 30% faster rendering speed and responsiveness.
 - Created 5 RESTful Web APIs for JSON data consumption, seamlessly integrating with external systems and improving data exchange efficiency by 35%.
 - Designed cross-device compatible layouts using HTML5, CSS3, and Bootstrap for optimal user experience.
 - Managed simultaneous execution of 10+ projects via GitHub for version control, ensuring efficient collaboration and code integrity.
 - Employed Jira for project management, tracking progress and enhancing task completion efficiency by 25% through optimized workflows and prioritization.
- ACL Digital, TX
- Jr. Java Developer
- | Jun 2020 – Dec 2021
- Utilized Agile Scrum Methodology to implement over 20 functionalities, ensuring iterative development and timely achievement of sprint goals.
 - Demonstrated proficiency in front-end development with JSP, JavaScript, TypeScript, HTML, CSS, jQuery, AJAX, JSON, and Bootstrap.

- Employed Java streams, lambdas, and interfaces across 15+ modules to optimize core functionality and increase code efficiency by 30%.
- Designed intuitive UI/UX utilizing JSP, HTML, CSS, JavaScript, and jQuery to enhance user interaction and satisfaction.
- Addressed concurrency issues and improved data synchronization by 40% through the implementation of multithreading solutions using Singleton Class.
- Implemented Spring and Hibernate frameworks to streamline business layer development, enhancing application performance; optimized and refined 25+ SQL queries for MySQL and SQL Server databases, resulting in improved database performance and query execution speed by 25%.
- Leveraged Bootstrap, React.JS, and Node.JS to create visually appealing and responsive web designs.
- Engineered JavaScript frameworks for UI Configuration widgets using Ajax, JavaScript, JSP, jQuery, HTML5, and CSS3, improving user interface customization and functionality.
