PROFESSIONAL OBJECTIVES

Motivated and data-driven mathematics graduate seeking a challenging position as a Data Analyst. Offering a strong foundation in statistical analysis, data visualization, and mathematical research, with a proven ability to promote efficiency, collaborate within teams, and provide meaningful results.

KEY COMPETENCIES

- Microsoft Office (Excel, PowerPoint, Word, Outlook)
- Python, Java, JavaScript, R, and Structured Query Language (SQL)
- Statistical data analysis and visualization in Tableau
- Exceptional organizational skills and attention to detail
- Proficiency in French and Arabic

EDUCATION

University of Richmond (UR), Richmond, VA

Aug 2020 - May 2024

Bachelor of Science

- Majors: Mathematics, Cognitive Science
- Minors: Data Science and Statistics, Linguistics
- GPA: 3.99, Summa Cum Laude

PROFESSIONAL EXPERIENCE

Naval Undersea Warfare Center - Division Newport, Newport, RI

Aug 2024 - Present

Data Analyst

- Work with the Human Systems Integration (HSI) Team to improve efficiency and usability of systems.
- Provide useful data analysis in R, Python, and Excel.
- Develop and maintain data-driven dashboards using various analytics platforms, such as Tableau, to inform decision-making processes.

Center for Undergraduate Research in Mathematics (CURM), Richmond, VA

Aug 2022 - May 2023

Mathematics Researcher

- Implemented a mathematical model in R to analyze the impact of incarceration rates on the ongoing opioid crisis in Virginia with a research group led by Dr. Joanna Wares at UR.
- Developed research-backed public policy suggestions to mitigate the opioid epidemic.
- Presented research at the Vanderbilt University Shanks Workshop; bestowed The Best Paper Award.

Center for Discrete Mathematics and Theoretical Computer Science (DIMACS)

May 2022 - Aug 2022

Research Experience for Undergraduate Students (REU), New Brunswick, NJ

Data Science Researcher

- Explored the advantages and disadvantages of modern privacy methods, specifically focused on the differential privacy methods implemented by the U.S. Census Bureau.
- Conducted an in-depth literature review of the Census Bureau's 2020 Disclosure Avoidance System (DAS), and worked to replicate its mechanisms in R, which included the injection of Gaussian noise.

AWARDS AND HONORS

- Outstanding Student in Mathematics – Spring 2024
- Dean's List – Fall 2020 - Spring 2023, Spring 2024
- Bessie Pond Eppes Scholarship – Spring 2023
- Department of Defense Science, Mathematics, and Research for Transformation Scholarship – Fall 2023
- Member of seven honor societies, including Phi Beta Kappa
