SUMMARY

Results-driven Data Analyst / Business Analyst with 3 years of experience in turning complex data into actionable insights to support strategic business decisions. Proficient in data extraction, cleaning, visualization, and reporting using tools such as SQL, Excel, Tableau, and Power BI. Experienced in working with cross-functional teams to gather business requirements, analyze performance trends, and drive process improvements. Strong command over KPIs, business intelligence, and statistical analysis. Demonstrated ability to enhance reporting efficiency and deliver insights that lead to measurable business impact.

TECHNICAL SKILLS:

Data Analysis	Data Wrangling, Descriptive Analytics, Predictive Modeling, Root Cause Analysis, Forecasting
Tools & Software	Microsoft Excel (Advanced), Power BI, Tableau, Looker, Alteryx, RapidMiner
Databases	SQL (MySQL, PostgreSQL, Oracle), Snowflake, MS Access, MongoDB
Programming Languages	Python (Pandas, NumPy, Seaborn, Matplotlib), R, SAS
ETL & Data Management	SSIS, Informatica, Talend, Apache Nifi, Data Cleaning, Data Mapping
Reporting & BI	KPI Dashboards, Ad-hoc Reports, Financial Reporting, Executive Dashboards
Statistical Skills	Hypothesis Testing, Regression, A/B Testing, Time Series Analysis
Business Tools	Microsoft PowerPoint, Microsoft Word, Jira, Confluence, ServiceNow
ERP & CRM Systems	Salesforce, Workday, SAP, Oracle ERP
Cloud & Big Data	Snowflake, AWS Redshift, Google BigQuery, Azure Synapse
Operating Systems	Windows, Linux, Unix
Methodologies	Agile, Scrum, SDLC, Waterfall, Design Thinking
Testing & QA	UAT, Functional Testing, Data Validation, Regression Testing

EDUCATION:

Masters in Management Science	Aug 2023 – May 2025
University of Scranton, USA	
Bachelor of Business Administration	May 2020 – Apr 2023
TJPS Guntur, AP – India	

PROFESSIONAL EXPERIENCE:

Business Data Analyst	Nov 2024 – Present
CVS Healthcare, USA	

- Applied SDLC practices to design, test, and deploy reporting and data solutions across dev, UAT, and production environments; Gathered, analyzed business requirements from stakeholders and translated them into BRD, FRD, user stories, and use case diagrams for Agile delivery.
- Used window functions, joins, subqueries, and SQL scripts to support ad-hoc analysis, dashboards, reporting with relational databases; Queried & analyzed large-scale financial datasets in Snowflake, optimizing performance for high-speed BI dashboards.
- Used Python with Pandas and NumPy to clean, transform, and analyze financial datasets, automating workflows and visualizing trends with Seaborn. Built dynamic Excel dashboards and models using advanced formulas, pivot tables, conditional formatting, and automated recurring financial reports with VBA and macros.
- Utilized PostgreSQL for building data pipelines, writing stored procedures, and managing datasets with performance-tuned indexing strategies. Conducted gap analysis & proposed improvements that reduced operational delays & improved reporting.
- Actively participated in Agile ceremonies—standups, sprint planning, and retrospectives—and collaborated with cross-functional teams including development, QA, and product; Built custom DAX metrics and calculations tailored to finance reporting requirements and created interactive KPI dashboards in Power BI and Excel.
- Used SQL to extract, clean, and analyze data for ad hoc and scheduled reporting and collaborated using JIRA and Confluence to track tasks and maintain documentation.

Data Analyst	May 2021 – June 2023
ACL Digital, India	

- Analyzed business processes and assisted in identifying automation opportunities using Excel and Power Query; Helped build interactive dashboards in Google Data Studio and Excel for the operations and sales teams; Used Excel for budgeting, variance analysis, and forecasting to support quarterly business planning.
- Designed interactive Tableau dashboards to track revenue, expenses, headcount, and cost optimization; Used Linux environment for automating ETL jobs and managing server-side data validation scripts. Integrated Snowflake with tools like dbt and Power BI for modern data stack adoption.
- Defined key financial and operational KPIs aligned with strategic goals; collaborated with product owners to prioritize backlog based on reporting needs and created executive-level presentations integrating Excel, Tableau, and Power BI visuals to deliver financial insights, trends, and risk assessments to stakeholders.
- Created recurring and ad-hoc financial and operational reports to support management, accounting, and compliance; Wrote and optimized complex SQL queries to extract, transform, and validate large financial datasets from relational databases.
- Designed and executed UAT test plans to validate report outputs, data models, and ETL pipelines; created flowcharts and process maps using Lucidchart and Visio to support development and QA teams, performed competitor analysis, and assisted in CRM data cleanup and standardization.
