Technical Skills

Programming Languages: Java, Python, JavaScript, C, C++, R, bash, shell

Cloud: AWS (EC2, S3, RDS, SQS, SNS), OpenStack

Tools & Methodologies: Git, GitHub, Gradle, Maven, GitHub Copilot, Agile, Scrum, Jira, BitBucket, SDLC

Course Work: Data Structures and Algorithms, Object Oriented Programming, Operating Systems, Software Engineering, Deep Learning, Machine Learning, Parallel and Distributed Systems

Experience

Software Engineer

Jul 2023 – Jul 2024

BPMLinks

- Designed and contributed to a campaign creation workflow for DV360 and LinkedIn, simplifying how campaigns were configured by integrating REST-based services with real-time bidding systems.
- Built and enhanced data synchronization functionality between LinkedIn and DV360, enabling teams to view campaign configuration and performance metrics through a unified internal dashboard.
- Integrated and maintained connections with external platform APIs, adapting to API updates and resolving issues to ensure stable and accurate data synchronization in production.
- Tech Stack:** Java, Spring Boot, Kafka, Rest APIs, SQL, PostgreSQL, Kubernetes, Microservices

Software Engineer

Aug 2022 – June 2023

TATA 1mg

BPMLinks

- Built backend services to support a labs chatbot and self-service order modification flows, enabling users to check, update, or cancel orders without contacting customer support.
- Implemented event-driven workflows using Java and Kafka to generate real-time order and report update notifications, improving customer awareness and reducing support queries at scale.
- Collaborated with frontend teams to integrate backend APIs with customer-facing chatbot interfaces and notification views, reviewing code, fixing integration issues.
- Tech Stack:** Java, Spring Boot, REST APIs, PostgreSQL, MongoDB, Redis, Kafka, React/Angular (Frontend), Android

Associate Software Engineer

Jun 2021 – July 2022

PolicyBazaar

BPMLinks

- Developed and Optimized customer-facing landing and insurance quote pages through RESTful APIs, including integration with multiple external insurer systems.
- Improved page load performance by optimizing backend logic, SQL queries, and API handling, resulting in approximately 25% faster quote response times with stable handling of external API failures.
- Deployed and supported the application on an OpenStack cloud environment using CI/CD pipelines, ensuring reliable production releases and consistent system performance.
- Tech Stack:** Java, Spring Boot, REST APIs, SQL (MySQL), Hibernate, JPA, JDBC, JUnit, Mockito, Maven, OpenStack, Jenkins, Docker, Git

Projects

Lab Reservation System & Online Survey Tool | Python, Django, Django REST Framework, MySQL, React, Angular

- Built and deployed two university-wide web applications using a Django backend to support lab scheduling and online survey creation for students, faculty, and administrators.
- Implemented role-based workflows to allow users to reserve labs, manage availability, and collect survey responses, reducing manual coordination and operational errors.
- Worked across frontend and backend to design REST APIs, implement reservation and survey logic, and manage data persistence, ensuring reliable daily usage.

Education

University at Buffalo

Master's in Computer Science and Engineering (GPA: 3.7 / 4.0)

Indian Institute of Information Technology, Allahabad

Bachelor's in Information Technology (GPA: 8.6 / 10.0)

Aug 2024 – Dec 2025

Buffalo, New York

Aug 2019 – June 2023

Prayagraj, India
