

Likhitha Guttapalli

(857)204-7868 | guttapalli.l@northeastern.edu | [linkedin|likhithaguttapalli23/](https://www.linkedin.com/in/likhithaguttapalli23/) | Boston, MA

EDUCATION

Northeastern University – Boston, MA

December 2025

Master's in Data Analytics Engineering | GPA 3.92/4.00

Relevant Coursework: - Foundational Data analytics, Data Management, computation and visualization, Data Mining, ML Operations, Statistical Quality Control

BMS Institute of Technology and Management – Bangalore, India

Aug 2019-May 2023

Bachelor of Engineering in Computer Science | GPA 3.76/4.00

Relevant Coursework: - MySQL, Big Data, Artificial Intelligence, Cloud Computing, Data Structures

TECHNICAL SKILLS

Programming Languages: Python (Pandas, NumPy, Scikit-learn, Seaborn, Matplotlib), HTML, CSS, PHP

Databases: MySQL, NoSQL (MongoDB),

Data Analytics & Visualization: Power BI, Tableau, Excel, Data Cleaning, Statistical Analysis, Feature Engineering

Data Engineering & Cloud: ETL Pipelines, Data Warehousing, API Integration, Git, DVC, Microsoft Azure, GCP

Certifications: DP-900 Exam (Azure Data Fundamentals), Hacker Rank SQL challenge, RPA(Udemy)

Key Competencies: Decision-making, Independent Research, Team Collaboration, Problem solving, Communication

PROJECTS

EstateIQ – Property Valuation Platform, Northeastern University

Jan 2025 – Apr 2024

- Built a property valuation platform using XGBoost and Random Forest models on real Boston housing data, achieving an R^2 score of 92% and reducing prediction error by 38%.
- Developed a complete MLOps pipeline using Docker, DVC, and Airflow for automated data processing, model training, and weekly retraining, reducing manual work by 60%.
- Created a user-friendly web app with Next.js and Supabase that supports instant evaluations, PDF report downloads, email alerts, and real-time feedback from over 500 users.
- Orchestrated end-to-end deployment on Google Cloud Platform (Cloud Build, Cloud Run, Artifact Registry), improving CI/CD efficiency and model update turnaround by 45%.

Work-from-Home vs. Back-to-Office Policies, Northeastern University

Sep 2024 - Dec 2024

- Analyzed over **5,000 employee records** from the WFH Research Database to identify trends in productivity, satisfaction, and operational costs.
- Created **5+ interactive dashboards** in Tableau to visualize key metrics across industries, job roles, and regions.
- Applied data cleaning techniques that improved dataset quality by **20%**, enabling accurate trend identification.
- Developed storytelling dashboards that revealed potential **cost savings of up to 30%** through hybrid work models, aiding executive-level decision-making.

Support Sphere, Northeastern University

Jan 2024 - Apr 2024

- Designed and developed a web-based platform to connect immigrants with personalized guidance via visa processes, fostering cultural adaptation and enhancing accessibility for over 200 users.
- Implemented a robust database architecture using SQL for structured data storage and NoSQL for unstructured data storage, improving data retrieval efficiency by 30%.
- Utilized Python to streamline data exchange between the database and the application interface, enhancing system responsiveness and user experience.
- Created an ER model and UML diagrams to effectively represent the relational database structure, accelerating development time by 20%

PROFESSIONAL EXPERIENCE

Full Stack Web Development Intern - Varcons Technologies, Bengaluru, India

Feb - Mar 2023

- Developed an interactive typing tool using JavaScript and PHP to improve users' typing speed and accuracy through daily practice, resulting in a 15% average increase in typing speed for over 500 users within three months.
- Implemented a categorized classification system to group users into three proficiency levels, enhancing feedback and progress tracking. Analyzed performance metrics over time by integrating data aggregation techniques.
- Designed and built an intuitive dashboard using HTML and CSS, visualizing real-time performance metrics and fostering user engagement through leaderboards.
