

Likitha Venkata

Data Engineer | Data Analyst | Big Data Pipelines

Phone: [+1 \(940\) 629-4949](tel:+19406294949) | Email: likithavenkata577@gmail.com | Location: [Texas, USA](#) | [LinkedIn](#)

Summary

Hands-on Data Engineer with strong experience in building scalable data pipelines, transforming messy data into business-ready insights, and automating workflows across cloud platforms like AWS, Azure, and GCP. Skilled in Python, SQL, Spark, and modern tools like ADF, Snowflake, and Databricks. Known for clear communication, problem-solving, and a team-first mindset. Currently supporting real-time healthcare data solutions at Johnson & Johnson.

Experience

Johnson & Johnson, USA

Mar 2024 – Present

Data Engineer

- Assisted in building and optimizing scalable data pipelines using SQL, Python, and Apache Spark for batch and streaming data processing across diverse data sources.
- Worked with modern data integration tools like Azure Data Factory and Apache Airflow to automate workflows and ensure timely delivery of datasets to stakeholders.
- Contributed to data warehousing solutions by transforming raw data into structured formats using tools like Snowflake and Google BigQuery, improving query performance and accessibility.
- Performed data cleansing and validation tasks using Pandas and PySpark, ensuring high data quality standards and supporting accurate downstream analytics.
- Collaborated with data analysts and scientists to deliver reliable, queryable datasets, implementing version control and code reviews via Git and CI/CD pipelines.
- Monitored and troubleshooted data jobs in cloud environments such as AWS and GCP, using tools like CloudWatch, DataDog, or BigQuery Logs for maintaining pipeline health and uptime.

Cognizant, India

Aug 2020 – Dec 2022

Data Analyst

- Collect, clean, and validate data from multiple sources (e.g., SQL databases, Excel, APIs) to ensure data quality and consistency before analysis.
- Build dashboards and reports using modern BI tools such as Power BI, Tableau, or Looker, helping stakeholders make data-driven decisions.
- Analyze trends and patterns in structured and semi-structured datasets using SQL and Python (Pandas, NumPy) to identify business insights.
- Collaborate with business and engineering teams to understand requirements and define key performance indicators (KPIs) for regular reporting.
- Automate recurring tasks using Python, Excel VBA, or workflow tools like Alteryx to reduce manual effort and improve efficiency.
- Document data definitions, processes, and insights to ensure knowledge transfer and support data governance best practices.

University Projects

- Supply Chain Dashboard:** Built interactive dashboards (Tableau, Power BI) using real-time logistics data; forecasted trends with 85% accuracy.
- NLP Sentiment Analysis:** Extracted customer insights from 5,000+ reviews using Python, AWS, and NLP libraries; reduced report generation time by 40%.
- Campaign ROI Optimization:** Cleaned and analyzed 500k+ ad records (SQL, Python), optimized ad spend with 12% cost savings and no performance loss.

Certifications

Databricks Certified Data Engineer Associate

Education

Master of Science in Computer Science,

Jan 2023 to Dec 2024

University of North Texas, Dallas, TX

Bachelor of Engineering in Computer Science,

Jul 2017 to Jun 2021

Sri Venkateshwara College of Engineering, Tirupati, India

Skills

Programming & Scripting: Python (Pandas, NumPy, PySpark), SQL, R, Excel VBA

Data Engineering & ETL: Apache Spark, Apache Airflow, Azure Data Factory, AWS Glue, DBT, Informatica, Apache NiFi, SSIS, Batch & Streaming Data Processing, Data Cleaning & Transformation

Big Data Technologies: Kafka, Flink, Hadoop, Hive, EMR, HBase

Databases & Data Warehousing: PostgreSQL, MySQL, MongoDB, Snowflake, Google BigQuery, Amazon Redshift

Cloud Platforms: AWS, Azure, GCP

AWS: S3, EC2, Glue, Lambda, Redshift, CloudWatch

Azure: ADLS Gen2, Data Factory (ADF), Synapse

GCP: BigQuery, BigQuery Logs

Data Analysis & Visualization: Power BI, Tableau, Looker, Trend & Pattern Analysis, KPI Monitoring

Machine Learning & NLP: Scikit-learn, TensorFlow, Sentiment Analysis, Regression, SVM, CNN

Tools & DevOps: Docker, Kubernetes, Git, Jenkins, GitHub, CI/CD Pipelines, Jira, SSRS, PeopleSoft, Postman

Automation & Workflow Tools: Alteryx, Excel Macros/VBA

APIs & Integration: REST APIs, Postman

Operating Systems: Windows, Linux

Soft Skills: Problem-solving, Communication, Team collaboration
