WORK EXPERIENCE

bwtech@UMBC Research and Technology Park	January 2024- May 2024
Project Management Fellow Member, Baltimore, MD	
- Transformed technology solution ideas into viable business ventures by collaborating with technologists and entrepreneurs, resulting in the development of three market-aligned products. - Boosted team productivity by 20% by facilitating weekly virtual meetings with structured agendas, assignments, and deadlines. - Enhanced market strategy effectiveness by conducting customer discovery interviews and comprehensive research, resulting in detailed pitch decks with pricing, licensing strategies, and budgets. - Improved entrepreneurial and commercialization skills by actively participating in finance and marketing sessions, leveraging industry experts' knowledge and required reading materials. - Ensured project advancement and success by leveraging mentor guidance, effectively navigating challenges and capitalizing on strategic opportunities.	
UMBC Product Management Club	September 2023- Feb 2024
Vice President and Business Head, Baltimore, MD	
- Secured crucial sponsorships by actively seeking and exceeding sponsor expectations, resulting in increased financial support for club events. - Optimized financial operations by developing and maintaining a budgeted calendar, ensuring all events were well-resourced. - Enhanced member growth by effectively utilizing personal development funds, providing opportunities for professional advancement within the community. - Ensured successful events by meticulously planning and executing a well-organized calendar, delivering value to members and partners.	

- Strengthened key relationships by managing stakeholders, including speakers, judges, members, and university departments, leading to enhanced collaboration.
- Fostered a supportive environment by collaborating with various UMBC departments and teams, ensuring seamless execution of club activities.

Odessa, Senior Business Analyst, Bengaluru, India

June 2020 – January 2023

Technical Expertise and Implementation:

- Increased system efficiency by 20% through spearheading software implementations, leveraging SDLC expertise for notable improvements.
- Enhanced issue resolution efficiency by 15% by independently describing, demonstrating, and documenting technical processes to resolve functional errors effectively.
- Optimized client/server architectures by applying in-depth knowledge, resulting in enhanced communication between applications and databases.
- Managed Accounts Payables & Receivables, Invoice Management, General Ledger, Asset Accounting, Billing, and Cash Management to ensure seamless financial operations.

Client Advocacy and Support:

- Reduced issue resolution time by 25% by efficiently managing technical requests and advocating for client needs.
- Improved financial reporting accuracy by configuring the Odessa platform for over 10 clients, leveraging accounting knowledge for precise financial reports.

Testing and Quality Assurance:

- Ensured comprehensive system functionality and performance by managing end-to-end testing activities, including functional, integration, and UAT.
- Enhanced testing efficiency and coverage by developing detailed test cases and comprehensive test plans, implementing automation testing.

Mock Preparation and Demos:

- Clarified requirements for developers and QA teams by preparing and presenting mock-ups and demos, ensuring alignment and understanding.
- Validated and approved system functionalities during UAT by collaborating with clients, ensuring successful user acceptance.

Risk and Issue Management:

- Reduced project delays by 20% by proactively identifying and addressing impediments, risks, and issues, collaborating with teams for timely resolution.

Resource Optimization:

- Enhanced overall project efficiency by optimizing resource allocation by 15%, ensuring demand alignment and effective resource use.

Team Leadership and Productivity:

- Boosted team productivity by 25% by deeply understanding project needs and motivating teams to achieve goals, leading to significant productivity gains.

Project Management and Delivery:

- Increased project completion efficiency by 30% by translating customer business requirements into system functionalities, supporting design, development, and testing phases.

Strategic Account Management:

- Increased new business by 20% by developing and executing strategic account plans, collaborating with executive management to identify new revenue opportunities.
- Grew client satisfaction scores by 15% by organizing and leading Executive Business Reviews, fostering strong relationships and maximizing client value.
- Achieved a 95% client retention rate by managing complex enterprise accounts, overseeing multiple delivery workstreams, and acting as a subject matter expert.

Product Vision and Strategy:

- Aligned product vision and strategy with company goals and customer needs by developing and maintaining a clear product vision and strategy.
- Ensured timely delivery of product milestones by creating and managing the product roadmap, aligning with business objectives.
- Facilitated effective communication by clearly articulating product vision, goals, and requirements to stakeholders, development teams, and users.
- Maintained comprehensive documentation by creating and updating business requirements, functional specifications, process flows, and user guides.
- Captured business requirements accurately by writing clear, concise, and comprehensive user stories.
- Ensured thorough testing by developing and executing UAT plans, and test cases based on user stories.
- Translated business requirements into detailed technical specifications and user stories by gathering and documenting business requirements.
- Ensured efficient and effective product development cycles by leading and participating in Agile and Scrum practices.
- Built products collaboratively with customers by engaging deeply to understand their needs, fostering a customer-centric approach.

PROJECTS

<i>Automated Resume Evaluation with NLP, SpaCy, and Topic Modeling</i>	Spring 2024
• Developed and implemented an automated resume evaluation system utilizing NLP techniques and SpaCy for text analysis and entity recognition, combined with Latent Dirichlet Allocation (LDA) for topic modeling. • Enhances candidate selection by matching resumes with job descriptions, saving time and ensuring fairness. Provides instant feedback with compatibility scores for resume optimization.	
<i>Unveiling trends and anomalies in bike rentals using PySpark</i>	Fall 2023
• Revolutionized Divvy's bike-share program with a data-driven marketing strategy by merging diverse CSV files using Python (Py-Spark) for uniform exploratory data analysis (EDA) and compelling visualizations. • Uncovered user behaviors, patterns, and trends, laying the foundation for targeted marketing. Propelling Divvy to the forefront of the competitive bike rental market in Chicago.
