

LOHITH BOLLINENI

lohithbollineni9@gmail.com • +1-845-633-9088 • <https://belohithdev.framer.website/>

Analytical professional with experience in data visualization, machine learning, and reporting. Skilled in translating complex data into actionable insights using tools like Tableau, Power BI, and Python.

EXPERIENCE

- Data Analyst (Social Media)**, Take Trips MES, NY (remote)**Nov 2024 – present**
 - Leveraged Tableau and Power BI to build dashboards, boosting engagement by 15% and follower growth by 10%.
 - Analyzed Instagram and Fanbase insights to optimize content strategy, increasing social-driven web traffic by 20%.
 - Utilized trend analysis and reporting tools to enhance post reach by 25%; mentored 5 interns on data viz best practices.
- Data & IT Analyst/Mentor**, The Source of Hope, TX (remote, volunteer)**Nov 2024 – present**
 - Mentored 20+ learners in Tableau and Power BI, teaching data visualization principles, data modeling, and DAX.
 - Configured Salesforce and WordPress environments, streamlining data workflows and reducing setup time by 25%.
 - Delivered technical support for IT systems, enhancing user efficiency and increasing data-driven decisions.
- Graduate Teaching Assistant**, SUNY New Paltz, NY**Jan 2021 – Aug 2021**
 - Collaborated with students as part of the IT Department, fostering a diverse and inclusive academic environment.
 - Assisted 15 students per month with VISA documentation, ensuring compliance with regulations and a smooth application process.
- Freelance Analyst**, India (remote)**Jun 2020 - Nov 2020**
 - Analyzed traffic, engagement, and social media for 5+ clients, increasing retention by 22% and page views by 18%.
 - Built 10+ dashboards (Tableau, Power BI, Google Data Studio) and processed 5,000+ row datasets (Excel, SQL), boosting marketing ROI by 15% and lead generation by 12%.

EDUCATION

- Webster University, TX**, Masters in Information Technology Management**Oct 2024**
CGPA: 3.9/4.0 | Courses: Information Technology Management, Business Management, Project Management

PROJECTS

- AI News Summary App – Python, Streamlit, Hugging Face Transformers**[Link](#) [GitHub](#)
 - Created a news summarization tool that pulls top headlines from Y Combinator's Hacker News
 - Used Hugging Face Transformers for real-time AI-generated summaries
 - Delivered a clean, responsive experience using Streamlit for deployment
- Spam Classifier using Naive Bayes Algorithm**[GitHub](#)
 - Built a ML-based spam classifier using Python, achieving over 98% accuracy using Naive Bayes algorithm.
 - Preprocessed 5K+ emails by applying tokenization, stopwords, and stemming to enhance model performance.
 - Evaluated model using confusion matrix, precision, recall, and F1-score to ensure balanced classification.
- Bike Shop Sales Analysis - PowerBI**[GitHub](#)
 - Analysed over 3 million rider transactions to identify key trends in customer demographics and product performance.
 - Developed interactive dashboards using Power BI, SQL, and Excel to track a 25% increase in prices generated around a 64% increase in revenue, and also provided solutions to optimize sales strategies.
- British Airways Reviews Analysis - Tableau**[GitHub](#)
 - Built an interactive Tableau dashboard analyzing 1,300+ British Airways reviews (2016–2023) across aircraft types.
 - Designed dynamic visualizations with filters for , seat class, continent, and aircraft group to enable deeper insights.
- Data related Jobs Survey Analysis - PowerBI**[GitHub](#)
 - Explored a survey with 600+ respondents to understand skill demands and salary expectations in data-related roles.
 - Utilized Power BI and Excel to visualize findings, revealing that 57% of participants have a good work-life balance in data-related roles, over 400 people prefer Python to code and the average age of respondents is around 30 years.
- Shark Tank India Data Analysis**[Link](#)
 - Analysed 300+ investment deals from Shark Tank India, identifying patterns in funding decisions.
 - Used Python, Excel, and React to present interactive results. 65% of pitches received investments from investors.

SKILLS & TOOLS

- Technical:** Python, SQL, Google Analytics, Adobe Suite, Microsoft Office, Data Analysis, Power BI, Tableau, Salesforce, Microsoft Dynamics, Azure, Constant Contact, Wordpress, HTML, CSS, JavaScript
- Project Management:** Jira, Agile, Scrum, Waterfall, Market Research, Digital Marketing
- Business Analysis:** Requirements gathering, process mapping, workflow analysis
- Support:** Troubleshooting, helpdesk management, user training, IT Service Management (ITSM) practices

ACHIEVEMENTS & ACTIVITIES

- Recipient of the Dr. John W. Rice, Jr, Endowed Scholarship for academic excellence in Webster University.
- [Google UX Certificate](#), [Microsoft UX Certificate](#), [PMF Certificate](#), [Microsoft Data Analyst Certificate](#)
- Sold 200+ copies of my published book which is a fiction story called “Waiting in Bangalore” - [Link](#)
