PROFESSIONAL SUMMARY

Experienced Data Analyst with a proven track record in predictive modeling, visualization, and cloud solutions. Drove 15% ROI boost, 85.4% model accuracy, and 30% error reduction using Python, SQL, Power BI, AWS, and Snowflake.

EDUCATION

University Of Texas at Dallas — Richardson, TX

GPA: 3.613

Information Technology and Management

August. 2023 – May 2025

- Relevant Coursework: Database Fundamentals, Business Intelligence, Data Visualization, Web Development, System Analysis and Project Management, Object Oriented Programming (Python).
- **Awards:** Dean's Excellence Scholarship, Scholar with Recognition

CVR College Of Engineering — Hyderabad, India

GPA: 3.3

Bachelor of Technology, Computer Science and Engineering

August. 2019 – May 2023

- Relevant Coursework: Data Structures, Algorithms, Computer Networks, Operating Systems, Artificial Intelligence, Software Engineering

TECHNICAL SKILLS

Data Analysis: Python (pandas, NumPy), SQL (Snowflake, PostgreSQL), R, Power BI/Tableau

Cloud & Big Data: Snowflake, Google BigQuery, Spark (PySpark), AWS

Data Engineering: ETL, Airflow, dbt, Snowflake Tasks/Streams

Machine Learning: Scikit-learn, Feature Engineering, Model Evaluation

Tools: Git, Docker, VS Code, Jupyter, Matplotlib/Seaborn

EXPERIENCE

Data Analyst

May 2021 – June 2023

VMR Financial Services

Hyderabad, India

- Automated 15+ financial reports using **Python (pandas)** and **SQL**, reducing manual effort by **40%** and improving accuracy for leadership decision-making
- Developed interactive dashboards in **Power BI/Tableau** to visualize revenue trends and cost structures, identifying **\$150K+** in cost-saving opportunities
- Optimized SQL queries and migrated legacy data to **SQL Server**, improving query performance by **50%** and enabling real-time analytics
- Cleaned and transformed raw financial data (handling missing values, outliers) using **Python**, reducing reconciliation errors by **30%**
- Conducted **A/B testing** and **regression analysis** to evaluate investments, leading to **15% ROI improvement** for key product line
- Collaborated with IT and Finance teams to integrate new data sources, ensuring seamless reporting pipelines

PROJECTS

Data Center Migration for United Airlines

January 2025 – May 2025

AstrallyTech (Industry Collaboration)

- Partnered with AstrallyTech as Cloud Consultant to migrate 2,500+ servers to AWS using Terraform (IaC), reducing infrastructure costs by 15%
- Implemented AWS Security Hub/Macie to ensure PCI DSS/HIPAA compliance for airline operations
- Developed predictive maintenance models via SageMaker, improving operational efficiency
- Accelerated deployments by 30% through CI/CD pipeline automation

Cryptocurrency Price Prediction

August 2024 – December 2024

- Built LSTM model with VADER sentiment analysis to predict Bitcoin prices using historical data, Twitter feeds.
- Achieved 85.4% accuracy through feature engineering and hyperparameter tuning
- Designed data pipeline (Python, Pandas) and deployed model on AWS EC2
- Reduced prediction error by 30% versus baseline ARIMA model

Impact of COVID-19 on Industrial Sectors

January 2024 – May 2024

- Analyzed 5+ datasets (aviation, finance, energy, employment, EVs) to uncover pandemic-driven trends, including a 20% drop in California employment (2020) and exponential EV adoption growth in Washington.
- Cleaned and visualized data (Excel, Power BI/Tableau), revealing airport traffic recovery patterns and Alphabet Inc. stock resilience post-March 2020 market crash.
- Delivered actionable insights for sector-specific recovery (e.g., smart energy management, targeted unemployment support), demonstrating data storytelling and hypothesis validation skills.
