SUMMARY

Analytical and detail-oriented Data Analyst with 2+ years of experience in transforming data into actionable insights. Proficient in SQL, Python, Power BI, and Tableau with a strong foundation in data cleaning, visualization, and predictive modeling. Skilled in building dashboards, automating workflows, and communicating findings to stakeholders.

EDUCATION

Master of Science, Information Technology and Project Management Arizona State University	Aug 2023 - May 2025 GPA: 3.80/4.0
Bachelor of Technology, Computer Science and Engineering Vellore Institute of Technology - AP	Aug 2019 - May 2023 GPA: 3.19/4.0

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Java, JavaScript.

Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, Pytorch, Matplotlib, Seaborn, Plotly.

Cloud Platforms: AWS, GCP, Azure, Snowflake.

Databases: MySQL, PostgreSQL, MongoDB, Oracle, BigQuery, No-SQL.

Data Visualization: Excel, Tableau, Power BI, Looker.

Tools & Workflow: Git, JIRA, Agile, CI/CD pipelines, SDLC.

PROFESSIONAL EXPERIENCE

Candid Techno Solutions, Chennai, India: Data Analyst (Remote)	May 2021 – May 2023
- Developed dashboards using Power BI and Python to track production KPIs and costs, reducing manual reporting time by 40% and improving time-to-decision by 30%. - Cleaned and analyzed large manufacturing datasets using outlier detection and regression models to identify cost inefficiencies, saving 10% in production costs. - Designed an ETL pipeline using Pandas and SQL to consolidate multi-source data into a centralized reporting schema, improving data availability and accuracy. - Built classification models using Gaussian Process Classifiers and DDNM to detect defect patterns, increasing predictive accuracy by 18%. - Supported cross-functional teams by documenting analytics workflows, contributing to faster onboarding and reduced handover times. - Collaborated closely with engineering and product teams across the SDLC to design scalable solutions.	

PROJECTS & APPLICATIONS

Loan Default Dashboard & Forecasting

- Built a logistic regression model and Power BI dashboard to assess loan default risks using Python, Plotly, and cohort segmentation. Reduced reporting effort by 40%.

Arizona Schools Clustering with ML

- Applied KNN with feature engineering to cluster schools by performance; improved similarity matching by 30% using Scikit-learn.

Streaming Platform SQL Analytics

- Designed relational schema and implemented stored procedures and views for user behavior analytics; boosted query performance by 50%.

Customer Churn Analysis & Retention Dashboard

- Analyzed customer behavior using Python (Pandas, Seaborn) and SQL to identify churn patterns. Built a classification model (Random Forest) with 89% accuracy to predict at-risk customers. Developed an interactive Power BI dashboard with customer segmentation, churn drivers, and retention recommendations.
