

# LOKESH VINJAMURY

Pittsburgh, United States

☎ 412-292-5417 ✉ [lokeshvinjamury56@gmail.com](mailto:lokeshvinjamury56@gmail.com) 💻 <https://www.linkedin.com/in/lokesh-vinjamury-a79592213>

## Education

### Robert Morris University

*Masters in Data Analytics*

**2023 - 2024**

*Moon Township, PA*

### Jawaharlal Nehru Technological University

*Bachelors in Mechanical engineering*

**2018 - 2021**

*India*

## Professional Summary

- Extensive experience managing the full End-to-End Agile Development Lifecycle, including crafting technical specifications, UML diagrams, and ER models for complex systems.
- Highly proficient in SQL and advanced query development, with proven expertise designing and building robust solutions in modern programming languages such as Python.
- Deep expertise in Databricks and Apache Spark for large-scale data processing, analytics, and performance optimization.
- Strong background in designing and integrating RESTful Web Services and implementing data persistence with both NoSQL and RDBMS technologies including MSSQL, Oracle, MySQL, and MongoDB.
- Solid knowledge of diverse data structures and formats such as JSON, XML, and Parquet, with extensive experience in data mapping, cleansing, and transformation techniques.
- Significant hands-on experience in cloud computing, primarily AWS, with a focus on architecting event-driven, serverless solutions for scalable data workloads.
- Proven ability to handle large datasets and high-performance computing needs, specializing in data integration and aligning disparate data sources for unified analytics.
- Proficient in Unix/Linux environments, with expertise in CI/CD best practices, integration testing, and automation pipelines using tools like Jenkins, TeamCity, and Bamboo.
- Additional skills in Hadoop ecosystem tools, and practical exposure to Machine Learning and AI techniques; adept at issue triaging and driving resolutions efficiently.

## Experience

### PNC Financial Services

*Senior Data Engineer*

**May 2024 - Present**

*Pittsburgh, Pennsylvania, USA*

- Led the full Agile development lifecycle for 12+ enterprise data solutions, increasing delivery speed by 30% through efficient UML and ER modeling.
- Improved SQL query performance by 40% by optimizing complex joins and subqueries for high-volume banking datasets.
- Developed Spark and Databricks pipelines that reduced ETL runtime by 50% for mission-critical financial reporting.
- Implemented RESTful APIs to integrate 25+ internal banking applications, boosting data consistency by 35%.
- Modernized legacy RDBMS and integrated NoSQL solutions (MongoDB) to improve data retrieval by 45%.
- Enhanced event-driven AWS serverless architecture, cutting operational costs by 20% through Lambda and S3 optimizations.
- Consolidated disparate financial data sources, increasing reporting accuracy by 30% and reducing manual integration effort by 50%.
- Automated CI/CD pipelines using Jenkins, achieving a 70% faster deployment cycle with zero critical rollbacks.
- Collaborated on Hadoop and ML-based fraud detection prototypes, improving anomaly detection rates by 15%.

### Allegheny Health Network

*Data Engineer*

**March 2023 - April 2024**

*Pennsylvania, USA*

- Delivered end-to-end Agile solutions for 10+ healthcare data platforms, shortening release cycles by 35% with precise UML documentation.
- Enhanced SQL procedures, leading to a 50% reduction in query runtime for patient analytics systems.

- Engineered Databricks and Spark workflows that processed 2TB+ of medical data daily with 40% improved compute efficiency.
- Designed and maintained RESTful APIs to securely expose EMR data, improving interoperability by 25%.
- Integrated NoSQL (MongoDB) for real-time patient monitoring, reducing latency by 60% compared to traditional RDBMS alone.
- Implemented AWS Lambda functions for serverless processing, achieving 99.99% uptime for critical health data feeds.
- Led data integration across 15+ hospital systems, improving unified patient records coverage by 50%.
- Deployed CI/CD pipelines via TeamCity, automating 80% of manual testing and build tasks for faster releases.
- Piloted Hadoop and AI models for predictive patient care, increasing early risk identification accuracy by 20%.

## Piramal Enterprises Limited

Jan 2020 - Dec 2022

*Junior Data Engineer/ PySpark Developer*

*Bangalore, India*

- Managed Agile development of 8+ enterprise data products, improving time-to-market by 40% with comprehensive use case documentation.
- Refined SQL scripts to deliver a 35% boost in performance for pharmaceutical sales data analytics.
- Developed robust Databricks and Spark pipelines to handle 5TB+ of supply chain data, enhancing processing speed by 45%.
- Built RESTful Web Services connecting business units, streamlining data exchange and increasing API reliability by 30%.
- Migrated legacy Oracle workloads to hybrid RDBMS/NoSQL architecture, boosting data accessibility by 50%.
- Architected serverless solutions on AWS for global product tracking, reducing infrastructure costs by 25%.
- Unified data pipelines across R&D, manufacturing, and sales, aligning siloed data streams with 40% fewer integration issues.
- Implemented CI/CD automation using Bamboo, decreasing deployment errors by 60% and accelerating delivery cycles.
- Explored Hadoop ecosystem and ML capabilities to optimize supply chain forecasting with a 15% increase in demand prediction accuracy.

## Technical Skills

---

- **Languages:** SQL, Python, Bash.
- **Frameworks & Tools:** Databricks, Apache Spark, Hadoop, Airflow, Jenkins, TeamCity, Bamboo, RESTful APIs.
- **Cloud Platforms:** AWS (Lambda, S3, EC2, CloudWatch, EventBridge, SNS, SQS).
- **Database Systems:** MSSQL, Oracle, MySQL, MongoDB, NoSQL, RDBMS.
- **Data Formats:** JSON, XML, Parquet.
- **Data Modeling:** UML Diagrams, ER Modeling, Data Mapping, Data Transformation.
- **Systems:** Unix, Linux, Event-driven Serverless Architecture, High-performance Data Processing.
- **DevOps:** CI/CD Pipelines, Integration Testing, Automation Scripts, Version Control (Git).
- **Big Data Ecosystem:** Hadoop, Hive, HDFS.
- **Other:** Machine Learning, AI Concepts, Issue Triage, Problem Resolution Tracking.
