

Experienced business analyst with 4 years in the field and a Master's in IT and Analytics. Proficient in SQL, data visualization, and data modeling. Strong commercial awareness and problem-solving skills. Confident with complex data and systems, understanding how IT resolves problems. Excellent communication, interpersonal, and project management skills. Effective in time management and organizational abilities, driving growth through data-driven decision-making.

PROFESSIONAL EXPERIENCE

Business Intelligence Manager, STPL

(August 2021 - July 2023)

Leading textile retailer transitioning to e-commerce, expanding to provide B2C services online.

- Achieved a 30% quarterly revenue increase and gained 5k new customers by leveraging strong SQL skills for efficient database querying and manipulation, driven by data-driven market insights.
- Enhanced profit margins by 20% through comprehensive sales data analysis and inventory optimization, applying data mining techniques to extract valuable insights from large datasets.
- Created data visualizations using Tableau and Power BI to present insights on product features and user behaviors.
- Defined new data driven features from 50+ customer attributes to determine customer journey for rapid experimentation across various marketing channels based on data modeling and recommendation systems.

Business Analyst (Team Lead), UpGrad

(July 2020 - June 2021)

Education technology company for immersive online learning of higher education

- Achieved 30% quarterly revenue growth and acquired 5k new customers through data-driven market insights.
- Boosted conversion rates by 70% through strategic data visualization using Tableau, revealing actionable insights into admissions metrics such as applicant demographics and enrollment trends.
- Successfully reduced refund transactions from 15% to less than 3% through strategic utilization of Salesforce CRM, optimizing processes and enhancing customer satisfaction.
- Drove collaboration and cultivate a growth mindset to foster teamwork and enhance employee retention in remote, distributed teams through process improvements.

Business Analyst, Disney BYJU's

(May 2018 - March 2020)

Disney sponsored an education technology company for learning applications.

- Derived actionable insights and developed a reporting system for business development that integrates data for advanced analysis from diverse channels such as CRM systems (Salesforce and LeadSquared), spreadsheet, databases.
- Increased conversion rate by 80% utilizing insights and reporting systems to optimize lead generation and targeting, pricing strategies, and negotiation techniques.
- Empowered team members, driving performance through enhanced collaboration, resulting in surpassing monthly revenue generation by \$20k, utilizing consultative sales approaches, maximizing team synergies, and adeptly managing post-sales inquiries.

EDUCATION

- Masters in Information Technology and Analytics – Rutgers University (GPA: 3.8) December 2024
- Bachelor of Engr. (Electronics & Communication) – Gujarat Tech University (GPA: 3.5) June 2018

PROJECTS

HR Analytics using Tableau

Utilized advanced analytics and visualizations to optimize HR management through a comprehensive Tableau dashboard.

- Developed a comprehensive Tableau dashboard for tracking key HR performance indicators.
- Analyzed critical metrics such as employee turnover, recruitment performance, attrition control, engagement levels.
- Generated actionable insights, empowering informed decision-making and strategic initiatives.

Mapping HIV: Trends and Responses in New Jersey

Leveraged SQL to develop a powerful database system for detailed analysis of HIV trends in New Jersey.

- Created a robust SQL database for analyzing HIV trends in New Jersey (2008-2019), driving impactful data insights.
- Designed precise SQL queries and ER diagrams to extract and define clear data relationships.
- Ensured data integrity through normalization, enhancing strategic data-driven decision-making.

Road Segmentation with Neural Networks

Applied advanced neural networks to improve road segmentation for autonomous vehicles and urban planning.

- Led a project on road segmentation using advanced neural networks (VGG16, GoogLeNet, and U-Net), achieving up to 99.95% accuracy for enhanced autonomous vehicle perception.
- Utilized extensive datasets with pixel-level annotations, optimizing segmentation accuracy through sophisticated neural network preprocessing and training techniques.
- Demonstrated significant improvements in obstacle detection, lane keeping, and traffic flow optimization, contributing to safer autonomous navigation and urban planning.

SKILLS AND COURSEWORK

- **Tools and Languages:** SQL, Amazon Web Services, Python, R, Tableau, MS Excel, MS PowerPoint, Google Analytics
- **Coursework:** Business Data Management, Business Forecasting, Data Analysis and Visualization, Analytics for Business Intelligence, Business Analytics Programming, Information Security, Project Management, Graph Theory
- **Others:** Machine Learning, AI, Optimization Algorithm, Data Analysis, Cloud Computing, Stakeholder Management

ACHIEVEMENT AND COCURRICULARS

- President of the Master's in Information Technology Student Association (MITSA) at Rutgers University, spearheading technology, business and innovation.
- Recipient of the Times of India Public Speaking Competition award twice.
